DIRECTORY OF AIRPORTS
RADIO FACILITY DATA
NOTICES TO AIRMEN

VOL. 3, NO.1 .... MARCH 30, 1948

This issue includes all data on record as of 0001 E.S.T. on the date above. For later information consult teletype NOTAMS.

U. S. DEPARTMENT OF COMMERCE
CIVIL AERONAUTICS ADMINISTRATION
OFFICE OF AVIATION INFORMATION

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO CIVIL PILOTS AS WELL AS ARMY AND NAVY. All GCA facilities (Air Force, Navy, or CAA) are available to any plane in emergency. To secure GCA assistance, pilots should first call the associated control tower.

In addition to the working frequencies listed below, Air Force and Navy GCA emergency VHF transmissions are made on 140.58 mcs. Simplex service on 3117.5 kcs will be provided at all Air Force and Navy installations to provide an alternate means of communications for scheduled air carrier aircraft. Army towers will relay GCA instructions on 200-400 kcs band to civil aircraft not equipped to receive VHF or HF. Most GCA units can transmit instructions directly on tower low frequency. Those identified by a (&) are forced to relay instructions on tower low frequency, if low frequency required.

A minimum of 30 minutes will generally be required to assemble a GCA crew and prepare the equipment for operation AFTER an alert has been received at those locations not providing continuous service. CAA GCA units, however, operate continuously. Pilots desirous of making practice GCA approaches should make their own arrangements with the tower concerned.

CAA GCA UNITS

N.B. It must be remembered that practically all VHF omni-directional ranges (VOR) have not yet been formally commissioned and a great number of the VHF visual-aural ranges (VAR) are in the same status, being on test basis and not to be used for navigation. These on-test basis VHF ranges are indicated by a prefixed asterisk (*) in the above tabulation.

* = Test basis-not to be used for navigation. + = voice on 111.1 and 116.1 mcs. - = voice on 111.1 mcs but not on 116.1 mcs. (U) Unmonitored, but usable for navigation.

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(Where city and airport names are identical, the airport name is omitted in the interest of space-conservation)

(A) Airport name* (with A in Type column) - Owned or leased totally by U.S. Air Force
(N) " (with N in Type column) - Owned or leased totally by Navy
(CG) " (with CG in Type column) - Owned or leased totally by Coast Guard
(NG) " (with NG in Type column) - Owned or leased totally by National Guard

(A) Airport name - Open to civilians but owned or leased wholly or in part by U.S. Air Force, Air Reserve, U.S. Air Force servicing detachment or contract gas usually available.
(N) " - Open to civilians but owned or leased wholly or in part by Navy
(CG) " - Open to civilians but owned or leased wholly or in part by Coast Guard.
(NG) " - Open to civilians but owned or leased wholly or in part by Army or State Government for Air National Guard. Limited servicing and maintenance for transient military aircraft.
(P) " - Civil airport open to military aircraft. (See Note 2).
* " - C.A.A. Intermediate Field.

* Air Force and Navy fields are listed alphabetically by airport name followed by city name in parenthesis.

N.B. ALL AIRPORTS EXCEPT THOSE CITED WITH AN "A" or an "N" IN THE TYPE COLUMN ARE OPEN TO CIVIL FLIERS. AIRPORTS WITH NO PREFIX ARE EXCLUSIVELY CIVIL AIRPORTS.

TYPE

A	- U.S. Air Force	I	- Intermediate	NG	- National Guard
C	- Commercial	M	- Municipal		
CG	- Coast Guard	N	- Navy	P	- Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified.

CLASS

(Sea Level Runway and Strip Requirements)

Class	Strip Length	Runway (Paved) Length
B-1	Less than 1800'	Less than 1800'
1	1800-2699'	1800-2499'
2	2700-3699'	2500-3499'
3	3700-4699'	3500-4499'
4	4700-5699'	4500-5499'
5	5700-6699'	5500-6499'
6	6700-7699'	6500-7499'
7	7700-8699'	7500-8499'
8	8700-9699'	8500-9499'
9	9700' +	9500' +

RUNWAYS

In "longest" column is stated length of longest landing area in hundreds of feet.

"h" indicates landing area is hard-surfaced or paved.
"sw" indicates allway field.

No differentiation is made between runways and strips as far as number of landing areas in field is concerned. In other words, two hard-surfaced runways and two sod surfaced strips will be listed as four runways.

FACILITIES AND SERVICING

RADIO

R1: Control tower voice
R2: Range (or R facility) with voice
R3: Range (or R facility) and tower
R4: Range (or R facility), tower, and ILS

LIGHTS

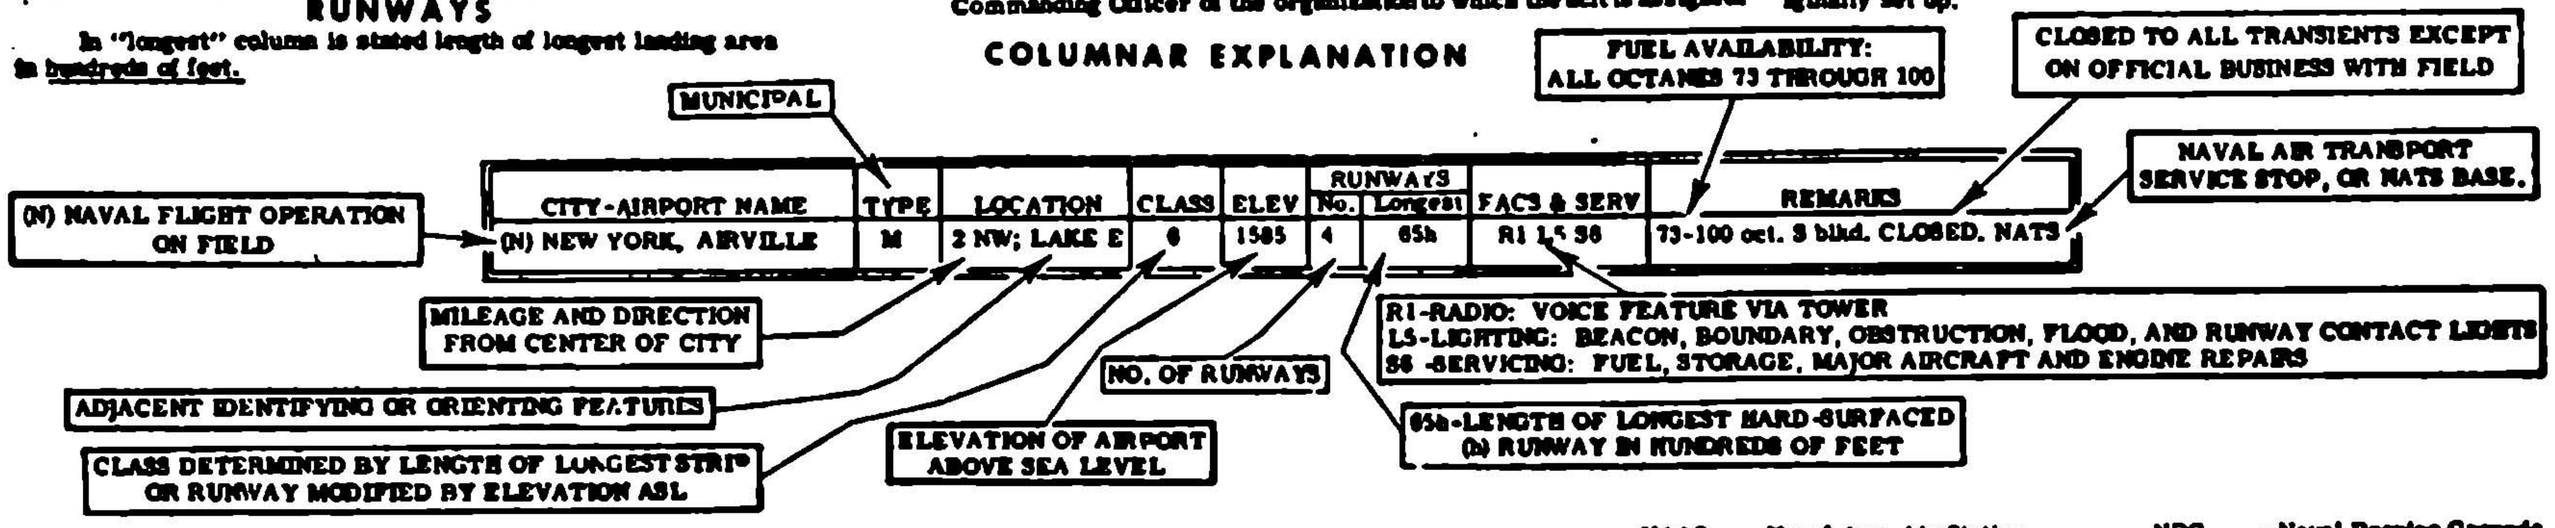
L : Incomplete lighting, such as flood or strip lights, which are generally available only on prior request
L1: Beacon only
L2: Beacon and boundary
L3: Beacon, boundary, and obstruction
L4: Beacon, boundary, obstruction, and flood
L5: Beacon, boundary, obstruction, flood, and runway contact
(L5): Identical to L5 except that runway contact lights are high intensity
L8: Beacon, boundary, obstruction, flood, runway contact, and instrument approach
(L8): Identical to L8 except that instrument approach lights are high intensity

(The class always indicates the highest element available but does not necessarily include all intermediate elements)

SERVICING

S1: Fuel (Any S combination in parenthesis indicates only part time or irregular attendant)
S2: Fuel, storage
S3: Fuel, storage, minor aircraft repairs
S4: Fuel, storage, minor aircraft, and minor engine repairs
S5: Fuel, storage, major aircraft, and minor engine repairs
S8: Fuel, storage, major aircraft, and major engine repairs

REMARKS



(a) "91 oct." indicates fuel octanes available. "AF" , or "Navy", preceding octane indicates USAF or Navy contract fuel available.
(b) "CLOSED" indicates closed to all civil aircraft and all transient military aircraft except on official business with written orders this station or in emergency. "CLOSED MIL" and "CLOSED NAVY" on civil fields indicate same restrictions as above are applicable to armed services.
(c) "Port. B-2 lgts" indicates cone-mounted lights outlining runways. These lights are portable and may be shifted from runway to runway, or strips.
(d) "TEMP INACT.NO FACS." indicates USAF and/or Navy airfields used either exclusively by them or municipal airfields used jointly by them and civil interests at which both the USAF and/or the Navy and the civil interests are inactive. Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the organization to which the acft is assigned.
(e) "USAF and NAVY TEMP INACT. CIVIL FACS." indicates municipal airfields used jointly by the USAF and/or Navy and civil interests at which the USAF, or Navy facilities are inactive but civil facilities are available. Such fields may be used by military aircraft, however, only commercial service is avail.
(f) OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, clearly discernible for contact operations, are frequently omitted, for example. On the other hand, all pole lines within at least a 15-1 glide angle are indicated.
(g) "Fld lights on prior req." indicates field lights are available only by previous phone call, telegram, or letter. It must be remembered that most fields do not have 24-hour operation. Accordingly the field lights, indicated for such a lighted field, (and in some instances, even the rotating beacons) are available only by prior request. When an airport classification indicates a lighted field, and there is no notation in the REMARKS column, the field lights burn all night or will be turned on when a radio request is made or a plane circles the field.
(h) "FEE" indicates landing charges for revenue producing aircraft.

NOTES

1. ← Notam data revising previous issues.
2. "(P)" in City and Airport Name column indicates: (1) those municipal airports improved with public funds and covered by an agreement between the municipality and the U.S. Government permitting government planes to use such fields in common with others and without charge, to the extent possible without restriction of non-military operations, or (2) other civil airports for which legal permits covering their limited use by military aircraft have been procured and filed with the real estate agency of the Department of the Army.
3. "*Effingham, 10, LS-ID" in City and Airport Name column indicates that the airport is Effingham CAA Intermediate Field, Site 10 on the St. Louis-Indianapolis Airway. Municipal airports where the lights are maintained by the C.A.A. are listed similarly except that there is no prefixed star.
4. AIRLINE STOP airport names are capitalized.
5. PRIVATE AIRPORTS are available for owner only, and not to be used by others except in emergency. Since no servicing is available for transients no "S" combination is ever assigned these fields.
6. "BLKD" indicates approaches where glide angle to runway is 3:1 or less.
7. "(Formerly Air Force)" or "(Formerly Navy)": These former Air Force and Navy fields are in the process of being disposed of by the War Assets Administration and Farm Credit Administration. Their type is difficult of determination currently and they should be used with caution as some, unable to be disposed of as airport property, are being diverted to agricultural purposes.

•• At the end of each state, under the heading of NEW AIRPORTS, will be found, out of alphabetical alignment, all the new airports tabulated after the type for that page had been originally set up.

AIR FORCES SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to Commanding General, Air Transport Command, Attention: Flight Operations Division, A-3. Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over 10 days should be forwarded to the same address for submittal to Chief of Staff, USAF, as required. Restrictions in Air National Guard Fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. That Bureau will forward approved restrictions to the above address for publishing. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration.

In connection with the above the attention of all base operations officers is invited to AF Regulation 55-12 of February 20, 1948, subject, "Notices to Airmen", and to AF Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of AF Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant with itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of AF Regulation 60-8 of August 28, 1947, U.S.A.F. aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated: AFRICA & AZORES - Brookley AFB, Ala., MacDill AFB, Fla., Washington National Airport, D.C., or Westover AFB, Mass. ALASKA - McChord AFB, Wash., or Great Falls AFB, Mont. BERMUDA - Mitchel AFB, N.Y., Brookley AFB, Ala., MacDill AFB, Fla., Washington National Airport, D.C., or Westover AFB, Mass., or Fairfield-Suisun AFB, Calif. CANADA - Great Falls AFB, Mont., Brookley AFB, Ala., McChord AFB, Wash., Washington National Airport, D.C., Selfridge AFB, Mich., or Westover AFB, Mass. CANAL ZONE, CENTRAL AMERICA, MEXICO, & SOUTH AMERICA - March AFB, Calif., MacDill AFB, Fla., Kelly AFB, Tex., or Brookley AFB. Ala. CARIBBEAN - Brookley AFB, Ala., Kelly AFB, Tex., or MacDill AFB, Fla. ENGLAND, GREENLAND, ICELAND, & NORTH IRELAND Washington National Airport, D.C., or Westover AFB, Mass. NOVA SCOTIA & NEWFOUNDLAND - Washington National Airport, D.C., Westover AFB, Mass., Selfridge AFB, Mich., or Brookley AFB, Ala. HAWAII - Fairfield-Suisun AFB, Calif. EUROPEAN THEATER - Brookley AFB, Ala., MacDill AFB, Fla., Washington National Airport, D.C., or Westover AFB, Mass.

V.H.F. CHANNEL ASSIGNMENTS: Following are USAF assignments:

CHANNEL	AF FREQUENCY	CHANNEL	AF FREQUENCY
A	116.1	H	134.10
B	126.18	U	108.3
C	137.88	V	108.7
D	140.58	W	109.1
G	137.70		

MINIMUM SAFE ALTITUDES ON AIRWAYS: Under USAF Regulation 60-16 and policy of USAF, minimum safe altitudes for flight along airways will be identical to those established by the Civil Aeronautics Administration. Action is being taken to amend pertinent USAF flight information publications to show these minimums.

✓ Indicates new or revised Special Notices

SPECIAL NOTICES

IFR CLEARANCE MINIMUMS FOR CIVIL FIELDS: For IFR clearance to civil fields when minimum altitude over field is not shown on let-down chart contained in T.O. 08-15-3 or Pilots Handbook, USAF policy states that the "REGULAR - DAY" minimum as shown in CAA Flight Information Manual will apply. Necessary action is being taken to amend all charts to show the proper minimums.

OFFICIAL AIR FORCE FIELD DESIGNATIONS: The official names and designations of Air Force Fields have been changed to new designations by the Department of the Air Force General Orders No. 2 of January 13, 1948. The abbreviation "AF Aux." stands for Air Force Auxiliary Field and the abbreviation "AFB" is for Air Force Base.

POLICY ON CONTROL TOWER PROCEDURE: Base Commanding Officers at bases where the tower is operated by CAA will discontinue requesting the tower to determine the highest rank aboard incoming aircraft. This action is taken in an attempt to curtail the congested communications situation and at the request of CAA. In case of VIP, the desired information will be transmitted from point of departure to destination in the flight plan.

UNAUTHORIZED USE OF VHF EMERGENCY FREQUENCY (140.58 MCS)
The attention of all operations officers and pilots is invited to AF Letter 100-31, of January 13, 1948, subject, "Unauthorized Use of VHF Emergency Frequency (140.58 mcs.)"

✓ CORRECTIONS FOR AND ADDITIONS TO USAF T.O. 08-15-1:

(1) Correct Canadian data as follows: Kenora, Ont. Class: SBRAZ; Sioux Lookout, Ont., Class: BRAZ; Rivers,Man.,.Control Tower transmits also on 3017.5; Show VHF/DF station on Channel D and 139.32, Channels A and B on request and AN/CPN-6 (YM) radar beacon, ident. 2-2-2, 335°,0.5 mi. from field at Edmonton, Alta. (page 5); Argentia NAS, Nfld., Tower transmits, but does not guard Channels B,D, and (9). Range guards 3017.5, 3105, and 4495 kcs. Goose Bay, Lab. ACS/VOAV operates on 2912, 6543, 8485, 11306 kcs, also on 3285,6577 on req. Delete "Weather on 4220 kcs voice, 3365,6625 kcs."; Wesleyville, Nfld. H fac. deleted; Dartmouth, N.S., Control tower transmits on 278 kcs as well as 3027.5 and also on Channel B only; Greenwood, N.S. Delete Channel A for Tower listing; Sydney, N.S., distance, station to field, 6.0; NW course of Montreal is 159°; Argentia, Nfld, localizer courses: 69-159-249-339; Copper Lake, N.S., radio range courses: 147-263-327-81; Comox, B.C., radio range does not guard 3082.5,5037.5 kcs. These two freqs. are transmitted and guarded by International Air Carrier Station at this point; Crescent Valley, B.C., radio range courses: 169-242-352-68; Dartmouth, N.S., control tower transmits on 278,3027.5 kcs, 126.18 mcs., guards 3105,3117.5, 6210 kcs, 126.18 mcs.; Gander, Nfld., radio range guards 3105,3117.5,6210 kcs only (although tower guards 3105,3117.5,4495,6210 kcs.) VOAC transmits on 363, 5410 kcs CW; Goose Bay, Lab., radio range guards 3105,3117.5,6210 kcs. Control tower guards 3105,4220,6210 kcs, 126.18 mcs, and transmits on 278 kcs, 126.18 mcs. only; Greenwood, N.S. control tower transmits on 278 kcs, 126.18 mcs., guards 3105,6210 kcs, 126.18 mcs. Operates 1200-2200Z and on one hour notice; Patricia Bay, B.C. control tower transmits only on 278 kcs, and 126.18 mcs. (Correct page 21). Radio range operates cont. (Correct page 21).; Penhold, Alta., radio range guards 3105,3117.5,6210 kcs.; Penticton, B.C. radio range courses: 155-238-329-63; Saskatoon, Sask., distance, station to field: 3.1 mi.; St. Andres, Nfld, radio range guards 3105, 3117.5,6210 kcs.; Torbay, Nfld. radio range guards 3105,3117.5,6210 kcs.; Vancouver, B.C. control tower guards 116.1 mcs, in addition to freqs. now listed; Argentia, Nfld localizer is inoperative; Stephenville, Nfld: ILS on Channel X, mag. heading 190° operates continuously. Airways station transmits and guards 4220 kcs, channels C and D voice, 2890 kcs voice on req. only; 6475,3117.5,6355 kcs CW. Broadcasts weather on 3365 and 6625 kcs simultaneously on hour and half hour by A-1 transmission. HF/DF is in cont. oper. GCA on Channels A-B-C-D, 3475-4890-6640 kcs, receiving also on 4495-6210 kcs, operates 0800 to 1700 and on 40 min. req. in instrument weather.

(2) Correct page 22: Charlestown NAS, R.I.: Channel D is avail. at tower; South Weymouth NAF, Mass., Channel D available at tower; Squantum NAS, Mass., Channel D available at tower.

(3) Correct page 64, by showing control tower at Phoenix (Sky Harbor) guarding Channels A and B.

(4) Correct page 66: Muroc AFB, Calif., by deleting "Use range for homing only" and substitute "Multiples are present"; Santa Barbara, Calif., bearing and dist, stn to field: 77°, 1.6 mi. Delete Channel B.

(5) Correct page 72, by showing non-compulsory reporting points at McLean, Springfield, Huntingtown, Loch Raven, Riverdale, Charlotte Hall, and Ashburn.

(6) Correct page 84, by deleting all scheduled weather bdcasts for gnd/air stations.

(7) Correct page 86, by showing Castle AFB, Calif, GCA facility on operational status and oper. cont. during IFR; practice 0800-1800 Mon thru Fri.; and on 40 min.notice other hrs.

(8) Correct page 88: Navy Channel listings on Channel 4 is 137.88. Delete from Corpus Christi NAS, Tex., Glenview NAS, Ill., Memphis NAS, Tenn., Olathe NAS, Kans., "(4-137.88 mcs)" and insert instead, "128.70 mcs"; Saufley Field MCAAS, Fla. GCA receives on 3105, 6210,4495 kcs.; Squantum NAS, Mass. with VHF communication channels of 1-2-3-5-6-7-8-9 and 128.70 mcs with HF communications on 3475-4890- 6640, transmitting on 3295, receiving on 3105,4495,6210 kcs.; Willow Grove NAS, Pa.: Operates on following freqs.: VHF communications Channels 1-2-5-6-7-8-9, HF communications: 3475-4890-6640-3195-6370-6420. Transmits 3295,receives 3105,4495,6210 kcs.

(9) Correct page 96, by showing McChord AFB, Wash. VHF/DF fac on training status.

(10) Castle AFB, Calif., bearing and dist. stn to fld., 119°, 48.5 mi. from Stockton Range deleted, as homing fac. is nowlocated on field.

(11) Telephone no. for Olmsted Flight Service Center, Pa. (to be published under Pilot Procedures with Flight Service, Using USAF Military Flight Service Communications System (Plan 62) on page 81) will be changed to Steelton 9892 effective April 15, rather than April 1 as previously published. Telephone no. for San Rafael LD90for Hamilton Flight Service Ctr changed to San Rafael 90.

(12) Nautical mileage scale shown in March 2, 1948 issue is incorrect and should not be used.

(13) Correct page 50, by deleting listing of tower freq for Moody, as twr is not in oper.

(14) Correct page 22: Albany, N.Y., bear. and dist stn to field: 195°; New Hackensack, N.Y., bear. and dist stn to field: 5.2 mi. (This also corrects page 24).

(15) Correct page 24: Bolling AFB, D.C., bear. and dist stn to field: 82°, 1.2 mi.; Bridgeport, Conn., class of station: MRLWZ; MacArthur, NAY.: Tower operates 0900-1700 Mon. thru Sat. (This also corrects page 22); Millville, N.J.: Dist, stn to field: 4.2 mi.; Webster, Md.: control tower operates on 142.74 mcs also, on 24 hrs notice; Baltimore, Md.: Radio range guards 3 instead of 4 freqs.

(16) Correct page 34, by showing Burley radio range instead of Buckley. Data correct.

(17) Correct page 114, under Navy VHF Channels, delete "(Gds 140.58)" from position shown and list GUARD under Channel column, and 140.58 under freq. column. Also change freq. shown for Channel 4 to 137.88 mcs.

(17) Correct page 97, by showing change in Flight Service boundary near Billings, Mont. as shown on page 56.

(18) Correct page 24: Arcola, Class: SBRAZ; Brandywine, Class: SBMRLZ; Phillips (Aberdeen), Bear. and dist, stn to field: 56°, 26.2; Reading, Elevation: 343'; Washington, delete broadcast. Class: SRAZ; Buffalo, ILS on Channel Y with voice; Youngstown, Ohio, radio range class: SBMRLZ; Toronto, delete freq. of 118.1 and Channel A for tower and list for remarks column only. Control tower and radio range guard 3105,3117.5,6210 kcs.

(19) Correct page 28, by listing weather broadcast for Saginaw as :15 and :45 from 0600 to 2200.

(20) Correct page 38, by showing Weeksville NAF Tower operating 0800-1630 Mon-Fri.

(21) Correct page 40: Godman AFB, delete "Use range primarily for homing". Louisville, Bowman Field: Elevation: 549'; Standiford Field: Tower guards 4 freqs.

(22) Correct page 48, Hammer Tower on 278 kcs, guards 3105,3117.5,4495,6210 kcs, in operation 0700-2300.

(23) Correct page 52: Daytona Beach, delete 118.3 mcs as unnecessary to list; Palm Beach Airways, delete "Racon inop."

(24) Correct page 54: Saufley Field, by showing Channel D at Chevalier instead of Saufley; Tyndall AFB, Class: BMRAZ, Weather broadcast: :15 and :45.

(25) Correct page 62, by listing the radio range now shown under Goodfellow AFB under San Angelo instead.

(26) Page 87, Tyndall AFB, GCA facility transmitting on VHF Communications Channel B in addition to other freqs published.

(27) Page 26, Lockbourne AFB should be given separate listing. Remarks: ". . .see page 84.".

(28) The St. Louis-Cincinnati Air Route Traffic Control boundary on Green Airway 4 has been changed from 25 miles SW of Effingham, Ill., to 25 mi. NE of Effingham. Correct charts accordingly.

(29) Selfridge AFB (Mt. Clemens, Mich.). Fuel: ABCJ.

(30) Lincoln, Nebr. Substitute the following remarks: NG svcg 0800-1630.

(31) Mitchel AFB, N.Y. Class: P57H-(L6)-S6

(32) Asheville-Hendersonville, N.C., Class: P40M-L5-S4

(33) Camp Mackall AF Aux (Hoffman, N.C.). Add "(Pope Aux.)"

(34) Cherry Point MCAS, N.C. Delete "(Pope Aux.)".

(35) Wright-Patterson AFB/Patterson (Dayton, Ohio): Substitute remarks: Rnwy 7-25 closed perm.

(36) Chickasha, Okla.: Sub. remarks: No bcn. Lgts prior req.

(37) Medford, Ore. Add to remarks: Twr SSE.

(38) Brookville Int,45A,CG-LG, Pa., Class: U30-L3. Sub.remarks: E,SW blkd.

(39) Chemung Valley (Athens, Pa.). Class: U30-L3-S6. Remarks: Right traffic. No bcn. Lgts on req. NE blkd.

(40) Olmsted AFB (Middletown, Pa.). Sub. remarks: Poles NE,N. River S. Closed B-29 jet type acft xcp in emerg.

(41) Congaree AFB (Columbia, S.C.). Correct listing is Congaree AB (Columbia).

✓ CHANGES FOR USAF T.O. 08-15-2: (1) Glynco NAF, Ga., Following information is supplemental to listing furnished for X-Band radar beacon at this point: Angular coverage 000-360. Operating hours: Cont. Remarks: Atop 170' blimp hangar SE of field.

(2) Correct page 32, by showing the hrs of operation of Whidbey Island, Wash. facility, as on request on 30 minutes notice. (This corrects Airgi, Vol. 2, No. 26).

(3) Correct page 32, by showing the operation of West Palm Beach, Fla. facility as unreliable. (This corrects Airgi, Vol. 2, No. 26).

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators No. 9, July 29, 1946, Hydrographic Office information concerning naval and marine corps air stations and facilities, including changes in field facilities, operation rules, air/ground communications facilities, instrument approach procedures and navigational aids, should be directed to: The Division of Air Navigation, Hydrographic Office, Washington 25, D.C., for transmittal to the C.A.A. In accordance with Aviation Circular Letter No. 96-46 of June 13, 1946, approval for the closing of any naval or marine corps air station or facility to transient military aircraft for a period in excess of 10 days must be obtained from the Chief of Naval Operations. Also, approval is to be obtained from the Chief of Naval Operations before relocation or modification of any aid to air navigation, such as reorientation of radio ranges.

V.H.F. CHANNEL ASSIGNMENTS: Following are Navy assignments:

CHANNEL	NAVY FREQUENCY	CHANNEL	NAVY FREQUENCY
1	116.1	6	134.64
2	142.56	7	143.64
3	126.18	8	142.02
4	137.88	9	142.74
5	143.28	GUARD	140.58

RESTRICTIONS ON NAVAL AIRCRAFT AT LAGUARDIA FIELD, INTERNATIONAL AIRPORT, AND NEWARK AIRPORT: La Guardia Field, N.Y., New York International Airport, N.Y., and Newark Airport, N.J., are closed to all Naval air traffic except that involving urgent official business which cannot be properly handled by landing at Floyd Bennett Field.

USE OF AIRPORT UTILITY FREQUENCIES - 121.9 & 121.7 MCS.: The airport ground control frequencies of 121.9 mcs (standard civil channel) and 121.7 mcs (alternate channel) are provided to eliminate the frequency congestion caused by numerous radio contacts between the tower and taxiing aircraft and the tower and airport utility vehicles thus providing a clear VHF channel for arriving and departing aircraft. The ground control frequency is used for the issuance of taxi information, clearances, and any other contacts between the tower and aircraft or vehicles operating on the airport.

Landing aircraft should guard the appropriate ground control frequency (normally 121.9 mcs) as soon as the aircraft has cleared the active runway. At locations where a ground control frequency is not available or the aircraft is not equipped with the VHF ground control channel, the tower will handle all transmissions to aircraft on the ground over its low frequency channel (278 kcs or equivalent). Departing aircraft should communicate with the control tower on the appropriate ground control channel (121.9 or 121.7 mcs) for taxi and clearance information and should remain tuned to that frequency until the pilot is ready to request take-off clearance. At the time, the pilot should communicate with the tower on the appropriate airborne VHF channel. Further communication with the tower, if necessary, should be made on the latter frequency. Aircraft not VHF equipped should guard the tower low frequency channel (278 kcs or equivalent) for taxi information and take-off clearance.

CIVIL USAGE OF MILITARY FIELDS: U.S.A.F. and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

CIVIL USE OF MILITARY GCA UNITS: It must be recognized that, while Navy and Air Force GCA units may be used by civil fliers in emergency or by prior arrangement with the C.O. of the fields having such units, civil ceiling and visibility minimums of 400' and 1 mile respectively are mandatory.

CANADIAN AIRPORT UTILITY FREQUENCIES: The Department of Reconstruction and Supply (formerly the Department of Transport) of Canada has adopted the airport utility frequency 121.9 mcs at 15 airport control stations in Canada. This practice will be applied generally, in the future, with the second airport utility frequency 121.7 mcs to be assigned only if and when congestion is experienced on 121.9 mcs.

V.H.F. IFR FLIGHTS: Until further notice, Air Traffic Control will be exercised on the assumption that aircraft are utilizing intermediate frequency radio ranges.

If a pilot desires to conduct IFR flight using VHF ranges over all or a portion of the route, his flight plan should so indicate. Further, flights should not be conducted on civil airways in IFR weather using VHF ranges unless the A.T.C. clearances so authorize.

PRIVATE FLIER VHF FREQUENCIES: CAA Communications Stations and Towers guard the private flier frequencies of 122.1 mcs for transmission to CAA Communications Stations and 122.5 mcs for transmission to CAA operated towers.

CAA Communications Stations normally reply to itinerant aircraft on the voice feature of the range, low frequency or VHF, whichever is applicable. Replies are made on 111.1 mcs if VHF reply has been requested on other than range frequency. CAA airport control towers will reply to itinerant aircraft on one of the frequencies in the 118.3 to 121.3 mcs band as cited in the "Transmitting Frequencies and Identifiers" listing on Page VI.

VISUAL-AURAL RANGE (VAR) MONITORING: Only visual courses of VAR facilities are monitored continuously.

INSTRUMENT LANDING SYSTEM (ILS) APPROACHES: Effective March 15, 1948, pilots are requested to give advance information to Air Traffic Control when planning to make an ILS approach, upon reaching the reporting point preceding the holding fix at airport of intended landing. This will permit assignment to the proper holding pattern and eliminate unnecessary delays in landing. Failure to use this procedure, however, will not preclude the pilot's right to request an ILS approach after reaching the holding point if weather conditions or other factors make such request advisable.

INSTRUMENT APPROACH LIGHT SYSTEMS: Normally neon approach light systems will be operated regardless of the runway being used whenever the light intensity is equivalent to that between dusk and dawn, day or night, regardless of weather conditions or when otherwise necessary or requested.

C.A.A. TOWER VHF TRANSMITTING FREQUENCY CHANGES: Between the hours 0001, local time, March 31, 1948, and 2400, local time, March 31, 1948, the VHF transmitting frequency at the CAA Airport Traffic Control Tower Stations listed below will be changed to the channels indicated opposite each location. It is expected that the changeover will be accomplished in less than the 24 hour period and service restored on the new frequency. However, since unforeseen circumstances may cause delays, VHF airport control communication service in the frequency band 118.3-121.3 mcs will not be guaranteed at these locations during the above period.

✓ ON-REQUEST REPORTING POINTS: The following "On-Request" Reporting Points have been established as follows:

(1) "Fairmount" Intersection (Intersection of the E course of Topeka, Kans, VAR radio range and the S course of St. Joseph, Mo. LF radio range). Location identifier: 'FMT'.

(2) "Goose Creek" Intersection (Intersection of the SW course of Burley radio range and the NE course of Elko radio range).

(3) "Oakley" Intersection (Intersection of the N course of Lucin radio range and the SW course of Burley radio range).

(4) Thurman, Colo. VAR radio range station has been designated as an on-request reporting point.

✓ AERONAUTICAL CHART AND PUBLICATION CORRECTION: Correct Instrument Approach Chart AL-129, dated January 6, 1948, by changing the name of Keddie Field to Elko Municipal Airport.

✓ AIR FORCE-CAA AGREEMENT ON CONTROL OF IFR TRAFFIC IN WASHINGTON METROPOLITAN AREA (As Amended): Joint Air Force and CAA procedures have been established to expedite movement of IFR traffic in the Washington Area. Detailed information on these procedures is contained in Washington Air Route Traffic Control Center Operations Letter No. 9 and No. 3 and in Andrews Air Force Base Approach Control Operations Letter No. 1, available from agencies named above.

These procedures establish a second method of approach in the Washington Area utilizing radar approach control from the Brandywine range to Andrews Field. Aircraft may be routed for approach to these procedures on request or with the pilot's concurrence. To facilitate operations of these procedures Andrews Field, Bolling Field, and Washington National Airport have been designated as co-terminals with respect to the in-bound Air Force aircraft on IFR. This designation as co-terminal does not abrogate or alter existing restrictions on Washington National Airport landings. When delays are encounted in approach times under procedures on the Washington range pilots may be routed with concurrence to make approaches on Brandywine or Andrews ranges using either normal procedures, radar control, GCA or a combination of all. When ultimate destination is changed in this manner Flight Service approval or notification is not necessary. IFR flight plans to Washington Area will be handled in normal manner with exception that information copy will be sent to other co-terminals in that area.

All pilots and base operations officers clearing into the Washington Area are advised to become familiar with these procedures.

✓ THREE-LETTER IDENTIFIER KEYING CHANGEOVER: The 3-letter identifier keying changeover has been accomplished at the following additional stations:

Ark.: Little Rock (R) LIT; Fla.: Eglin AFB (R) VPS; La.: New Orleans (R) MSY; Shreveport (R) SHV; N.M.: Albuquerque (R) ABQ; El Morro (R) EMO; Okla: Oklahoma City (R) OKC; Ore.: Eugene (VHFR,R) EUG; Klamath Falls (R) LMT; Pa.: Philadelphia NE (R) PHF; Philadelphia SW (R) PHL; Tex.: Amarillo (R) AMA; Austin (R) AUS; Brownsville (R) BRO; Dallas (R) DAL; El Paso (R) ELP; Ft. Worth (R) FTW; Galveston (R) GLS; Houston (R) HOU; San Antonio (Alamo) (R) SAT; Wink (R) INK.

✓ METEOROLOGICAL SERVICES AVAILABLE TO CIVIL PILOTS: Weather forecasting and reporting services for civil aviation are provided by the United States Weather Bureau of the Department of Commerce. Observations and reports are made at hourly intervals at approximately 500 stations and special reports are made for sudden changes in weather conditions.

The stations from which forecasts and reports may be obtained fall in three categories as follows: Airway Forecast Centers: At these 18 offices forecasters are on duty 24 hours of every day to provide forecasts, information, and advice concerning aviation weather.

Albuquerque, N.M.	Denver, Colo.	Minneapolis, Minn.
Atlanta, Ga.	Ft. Worth, Tex.	New Orleans, La.
Billings, Mont.	Kansas City, Mo.	Salt Lake City, Utah
Boston, Mass.	LaGuardia Field, N.Y.	San Francisco, Calif.
Chicago, Ill.	Los Angeles, Calif.	Seattle, Wash.
Dayton, Ohio	Miami, Fla.	Washington, D. C.

Flight Advisory Weather Service Units: These offices are located in the 26 CAA Airway Traffic Control Centers and are staffed 24 hours a day to give short range detailed information and advice. The weather service available from FAWS should be particularly helpful to pilots in the air, who can obtain it by calling any Airway Communications Station by radio.

Weather Bureau Airport Stations and Airway Communications Stations: Most of these stations are open 24 hours a day, and weather reports, regional forecasts and terminal forecasts as distributed by teletype may be obtained from them. In many cases, however, professional forecasters are not on duty throughout the 24 hours at these stations and requests for specific trip forecasts must be made a sufficient time in advance to permit obtaining the information from the appropriate forecast center. Where full meteorological service is required, at least two hours' notice (in addition to communication time) should be given for a flight exceeding 500 miles from point of departure to point of first landing, and at least one hours' notice for flights not exceeding 500 miles.

Requests for trip forecasts should include details of the route to be followed, time of departure, estimated time of arrival, air speed and type of aircraft, flight altitude and whether flights will be made VFR or IFR.

The attention of all pilots is also directed to the fact that weather reports and other information are broadcast at 15 and 45 minutes past the hour from all continuously operated CAA radio range stations. A listing of the commercial weather broadcasts may be obtained by writing to the Chief, U.S. Weather Bureau, Washington, D. C.

✓ THREE-LETTER IDENTIFIER KEYING CHANGEOVER: The 3-letter identifier keying changeover has been accomplished at the following stations: Ala.: Maxwell AFB (R) MXF; Ariz.: Tucson (R) TUS; Calif.: Donner Summit (R) DOS; San Francisco (R,ILS) SFO; San Francisco Gap (H) SFG; Colo.: Colorado Springs (R) COS; Pueblo (R,VHFR) PUB; Conn.: Bradley Field (OMK) W; Fla.: Homestead (R) HST; Miami (R) MIA; West Palm Beach (R,H) PBI; Ga.: Albany (R) ABY; Brunswick (H) SSI; Ill.: Scott AFB (R) BLV; Ind.: Angola (VHFR) ANQ; Indianapolis (ILS) IND; Iowa: Iowa City (H) IOW; Kans.: Garden City (R) GCK; Ky.: Corbin (VHFR) CRB; Louisville (R) LOU; Louisville-Standiford (ILS) SDF; Paducah (VHFR) PUK; Me.: Houlton (R) HUL; Mass.: Westfield (R) BAF; Westover AFB (ILS) CEE; Mich.: Houghton (R) CMX; Jackson (H) JXN; Muskegon (R) MKG; Sault Ste Marie (R) SSM; Miss.: Meridian (R) MEI; Mo.: Chillicothe (H) CII; Mont.: Butte (R) BTM; Lewistown (R) LWT; Missoula (R) MSO; N.H.: Grenier AFB (R) MHT; N.J.: Atlantic City (VHFR) AIY; Millville (R) MIV; N.M.: Tucumcari (R) TCC; N.Y.: Elmira (R) ELM; New Hackensack (R) EWH; N.C.: Rocky Mount (VHFR) RMT; N.D.: Jamestown (R) JMS; Pembina (R) PMB; Ohio: Cleveland (ILS) CLE; Columbus (ILS) CMH; Zanesville (H) ZZV; Okla.: Tinker AFB (R) TIK; Ore.: La Grande (H) LGD; Portland (R,ILS) PDX; Portland (VHFR) HIO; Pa.: Harrisburg (R) HAR; Philipsburg (R,VHFR) PSB; Wilkes-Barre (R) AVP; Williamsport (R) IPT; R.I.: Providence (R,VHFR) PVD; Tenn.: Memphis (R,VHFR) MEM; Tri City (R) TRI; Tex.: Randolph AFB (R) RND; Va.: Arcola (R) ARV; Danville (H) DAN; Gordonsville (R) GVE; Pulaski (R) PSK; Richmond (R) RIC; Wash.: Spokane (R) GEG; Wyo.: Sheridan (VHFR) SHR.

WEATHER REPORTING SERVICE

Weather Reporting Location	Type of Report	Action Taken
West Yellowstone, Montana	3- and 6-hourly Pibals	Temporarily discont
Guadalupe Island, Mexico		Inaugurated

FOREIGN SPECIAL NOTICES

INTERNATIONAL NOTAMS: The only source of internation notams at the present time, is the CAA Overseas-Foreign Aeronautical Communications Stations at the following locations: New York, N.Y.; Miami, Fla., New Orleans, La., Balboa, Canal Zone; San Francisco, Calif.; Seattle, Wash.; Honolulu, Hawaii, Anchorage, Alaska.

In the immediate future a daily International Notams recapitulation, covering all foreign Class I and Class II Notams received in Washington, D.C., will be forwarded to the ninety-odd domestic U.S. international airdromes and Air Force-Navy Foreign Clearing Stations.

FOREIGN ENTRY PROCEDURES, AIRPORTS OF ENTRY, CUSTOMS REPORTS, CIVIL AIRCRAFT CLEARANCE FOR FOREIGN COUNTRIES: These procedures and regulations are now incorporated into the Flight Information Manual. Only amendments to the data contained in the Manual will hereafter be carried in the Airman's Guide.

LONDON, ENGLAND: Pilots entering or operating within this area should be familiar with all notams available at the New York International Notam Office.

N.B. The British Government has reported several violations of local air traffic rules. Disciplinary action will be taken on future violations.

DANGER AREA IN THE VICINITY OF ENIWETOK ATOLL, PACIFIC OCEAN: Effective January 31, 1948, a Danger Area was established in the vicinity of Eniwetok Atoll, about 2400 miles WSW of Honolulu, Hawaii, by the Atomic Energy Commission. The Danger Area, which will be activated throughout the rest of the calendar year 1948, is described as follows:

"Beginning with a point at 10-15 N lat., and 160-35 E long., N along the meridian of 160-35 E long., to a point at 12-45 N lat., 160-35 E long., thence E along the parallel of 12-45 N lat., to a point at 12-45 N lat., and 163-55 E long., thence S along the meridian of 163-55 E long., to a point at 10-15 N lat., and 163-55 E long., thence W to the point of beginning." Because of the grave hazards resulting from tests of military weapons in this area it should be categorically avoided under all circumstances until further notice.

IRELAND, SHANNON AIRPORT: Because control tower and other facilities at Shannon Airport were destroyed by fire, all aircraft expecting to land there will use GCA facility.

CLEARANCE OF NON-SCHEDULED FLIGHTS TO COSTA RICA: The Government of Costa Rica does permit irregular air carriers to make direct application for flight permits through its consular offices in the United States. Applicants who apply directly to the Government in San Jose, Costa Rica are referred back to a Costa Rican consular office in the United States.

Also, the Government of Costa Rica accepts applications for flight permits which have come through United States diplomatic channels, i.e., the Department of State and the American Embassy.

PRECAUTIONS BEFORE ENTERING GREECE: All air carriers and others concerned are advised to use designated International Air Routes in and out of Greece. All pilots should be briefed on international visual signals between aircraft as Greece has indicated they intend to shoot down all intercepted foreign aircraft that are not recognized or fail to comply with instructions when intercepted.

EL-ARISH AIRPORT, EGYPT DANGER AREA: Anti-aircraft and air firing practice is being conducted continuously day and night until further notice within an area of 25 mile radius centered on El-Arish Airport at lat. 31-00 N lat., and 33-50 E long. All aircraft must avoid this area.

PERUVIAN PROHIBITED AREAS: The President of Peru has decreed that flight is prohibited over the following zones: Callao - lat. 12-02, long. 77-16, to lat. 12-02, long. 77-08; to lat. 12-08, long. 77-08; to lat. 12-08, long. 77-17. Pisco - lat. 14, long. 76-28, to lat. 14, long. 76-14; to lat. 14-14, long. 76; to lat. 14-25, long. 76; to lat. 14-25, long. 76-28. Matarini - lat. 16-54, long. 72-15; to lat. 16-54, long. 72-05; to lat. 17-05, long. 72-05; to lat. 17-05, long. 72-15.

AIRPORT AND RADIO NOTICES

PHOENIX: Inst training on Phoenix Rng between 5500 and 9500'.

PHOENIX-SKY HARBOR ARPT-RADIO: About Apr 20, middle compass ltr will be comm at middle mrkr site of CAA ILS. Freq. 219 kcs, ident. "H". (3-23). Outer and middle mrkrs operating on experimental basis. Unmonitored, pending flgt-check. (3-24)

ROOSEVELT-RADIO: Soon, special purpose 2-course VHF aural rng, privately owned will be comm on 110.7 mcs, approx 10 mi. W of Roosevelt at lat 33-41-00, long. 111-25-00. Call letters: "KAJE". Irregular hrs of oper, but chiefly during daylgt hrs. Freqs to be guarded 122.1,122.5 mcs. Stn not to be used for navigation. (3-11)

★TUCSON-RADIO: Mar.17.VHF omni rng placed in intermittent oper on unmonitored test basis, at lat 32-04,long.110-56-30.Not to be used for navigation.Freq.117.1 mcs,ident."TUS".Elev. 2591'. Var.14° E. Class: VORW.

[redacted]: WILLIAMS AFB (CHANDLER)-RADIO: USAF rng unreliable and to be used for training only. (2-3)
WINSLOW ARPT-RADIO: About Apr 20, middle compass lctr will be comm at middle mrkr site of CAA ILS. Freq. 201 kcs, ident. "O". (3-23)
[redacted]: BATESVILLE ARPT: N/S strip and E end E/W strip under const-unusable. Taxiway to fuel pump hazardous. (10-17)
BRINKLEY ARPT: NE/SW and SE end of NW/SE rnwys hazardous when wet. Ctn ngts. (3-29)
FORT SMITH ARPT: W end NW/SE, N end NE/SW rnwys closed. Equip. on fld, lgtd. Taxi strip connecting E/W rnwy with Terminal Bldg closed to acft over 5000 lbs. (2-18)
★HARRISON-RADIO: MH fac operated by AA on 287 kcs, ident. "HRO". Class: MHW.
HOT SPRINGS-MEMORIAL ARPT: Use rwys only. (3-23)
SEARCY MUN ARPT: Const. (10-3)
••WEINER ARPT: New fld. Lat. 35-35-15, long. 90-54-30. (12-2)
WHITMAN ARPT: 195' obst lgtd twr being erected 3 mi NNE (15° true) at lat 35-32-50, long. 93-50-01. (2-11)
[redacted]: ALAMEDA NAS: Maintain high approach on Rnwys 26L and 21. Hvy acft parked these areas 175' unlgtd cranes 2000' from NE corner fld-ctn ngts and during low visibility. Equip. adj to and on rnwys. Fld on positive control. (2-20)
••ANTIOCH: Dive bombing danger area approx 12 mi E being used, during hrs of 0900 to 1700 from the surface up to and including an altitude of 10,000'.
BAKERSFIELD KERN CO. ARPT-RADIO: About Apr 20, compass lctr will be comm at middle mrkr site of CAA ILS. Freq. 227 kcs, ident. "D". (3-24)
BECKWOURTH-PLUMAS CO. ARPT: Rnwys under const. Cross-country students avoid using fld. (2-29)
BOCA, BCN SITE: Bcn inop. Will be discont approx Apr. 6, 1948. (3-29)
••BOREGO VALLEY ARPT: New fld. Lat. 33-15-45, long. 116-19-15. (3-18)
BURBANK-RADIO: About Apr 9, ident. of Chatsworth FM will be changed to four dashes, one dot. (3-23)
BURBANK-LOCKHEED AIR TERMINAL: Closed to all trans P-80 acft except on special projects for modification that stn. Right traffic Rnwys 7,15. Approach lgts Rnwy 7 changed to red. Rnwy 13-31 closed (parked acft). (3-22)
••CARRIZZO VALLEY: Dive bombing and rocket firing danger area approx 24 mi. WNW of El Centro is being used during the hrs of 0830 to 1530 from the surface up to and including an alt of 10,000'.
CASTLE AFB (MERCED): Use Rnwy 12-30 only-acft parked on landing mat. Approach lgts Rnwy 12-30 inop. (1-16)
••CHOCOLATE MTN: Large aerial gunnery danger area over Chocolate Mtn is being used during the hrs of 0900 to 1500 from the surface up to and including 30,000'.
COTATI OLF: Crash truck avail. at Santa Rosa NAAS on req. (10-3)
EL CAJON-GILLESPIE ARPT: Right traffic E take-offs, landings. (10-16)
EL CENTRO-DOUTHITT FLD: 1.3 mi E of El Centro on S side of Hwy 80 is a personal use fld and should not be used by trans pilots. (2-17)
EL CENTRO NAS: Avail. 0700 to 1800. Other hrs on 30 minutes prior notice. (2-24)
••EL TORO: (a) Circular dive bombing and rocket firing danger area immediately E is being used during the hrs 0830 to 1630 from the surface up to and including 15,000'. (b) Circular acrobatic training caution area approx 27 mi ESE being used during the hrs of 0830 to 1600 bet. the altitudes of 3000 and 12,000'.
★FAIRFIELD-SUISUN AFB-RADIO: USAF ILS being relctd to serve Rnwy 21L. Lclzr installed, not yet flgt-checked. Glide path transmitter will be installed soon. Bndry and middle mrkrs will be completed approx Apr 1. (3-23) USAF rng relctd to serve Rnwy 21L at lat 38-19-25, long. 121-50-37. Bear. and dist, stn to fld: 210°, 4.9 mi. (3-26).
FRESNO AIR TERMINAL: Traffic pattern 800'. (2-25)
••FRESNO BCN SITE: Will be perm discont Mar 30, 1948 (3-22)
••GERBER BCN SITE: Discont. (3-26)
HAMILTON AFB (SAN RAFAEL): Extension to Rnwy 12 closed except in emerg. (10-18)
••HILTS BCN SITE: Discont Mar 22, 1948. (3-24)
••HOLTVILLE: Three circular dive bombing and rocket firing danger areas N and NE being used 0830 to 1530 from the surface up to and including 15,000'.
••HOOKER BCN SITE: Discont. (3-26)
INYOKERN NAF-RADIO: FM on S course of Navy rng temp inop. Ident will be changed to 3 dashes. (2-3)

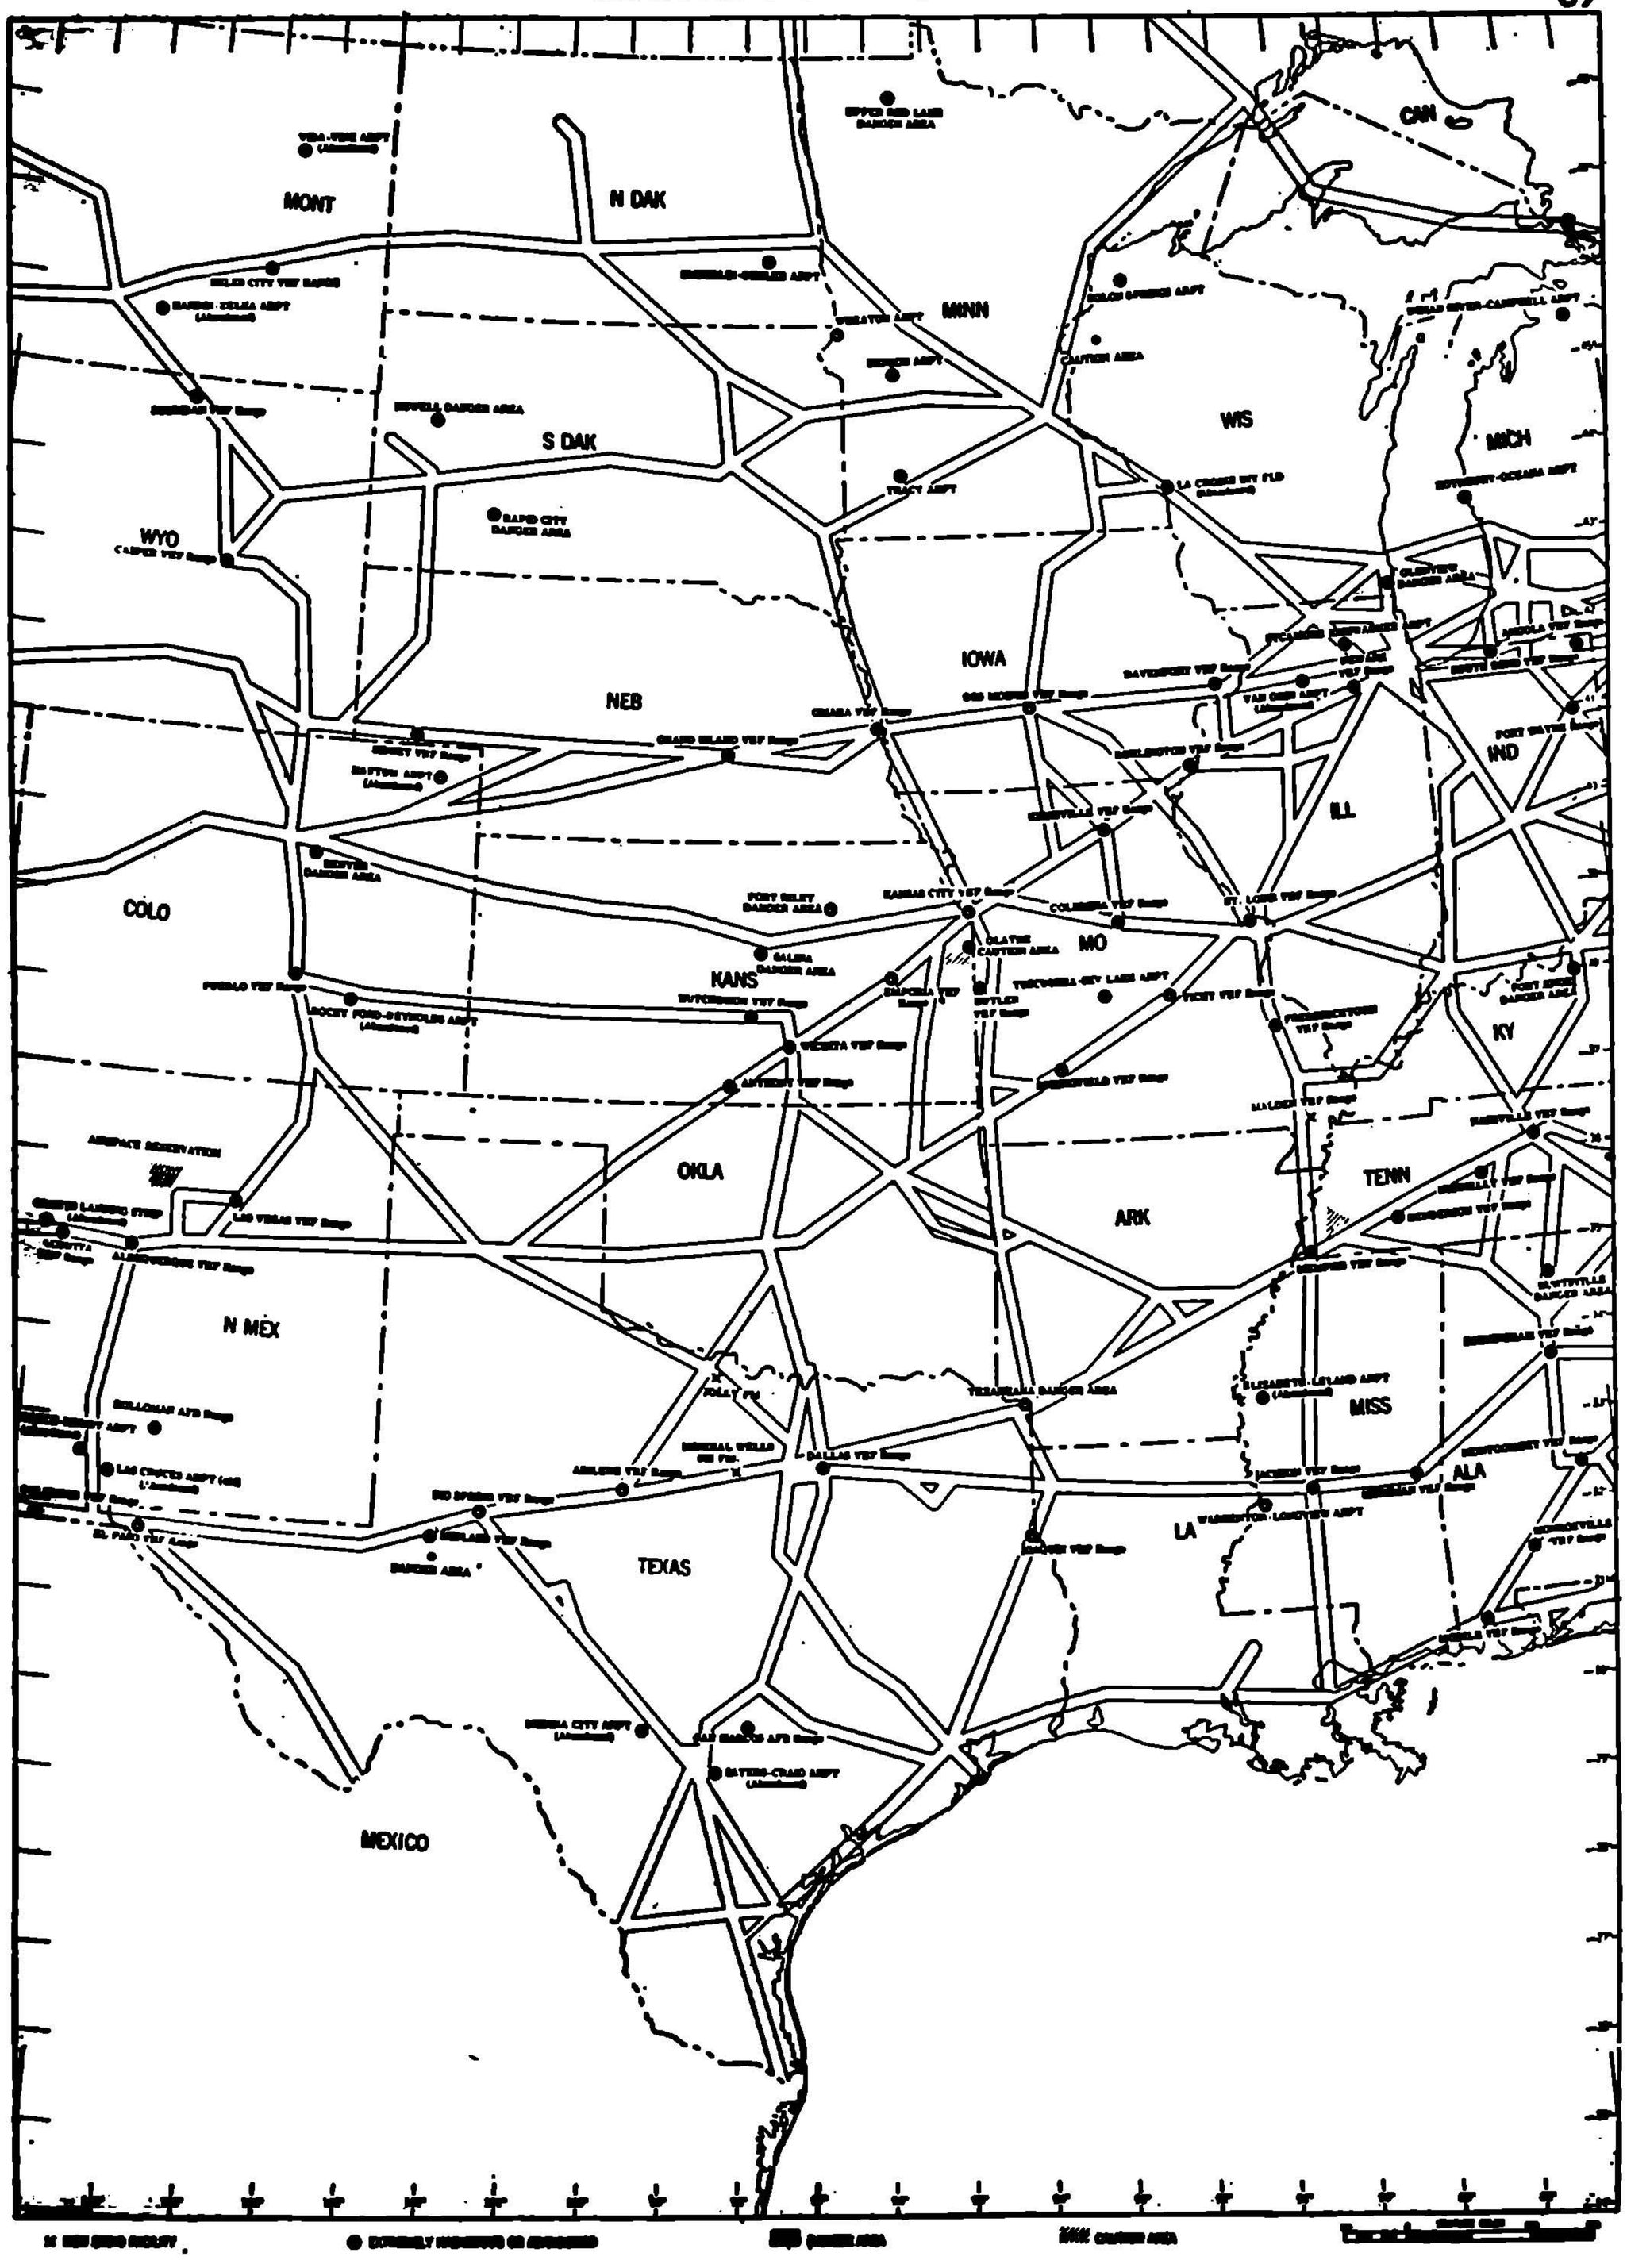
WESTERN NOTAM CHART

NOTAM CHARTS

THESE NOTAM CHARTS INDICATE:

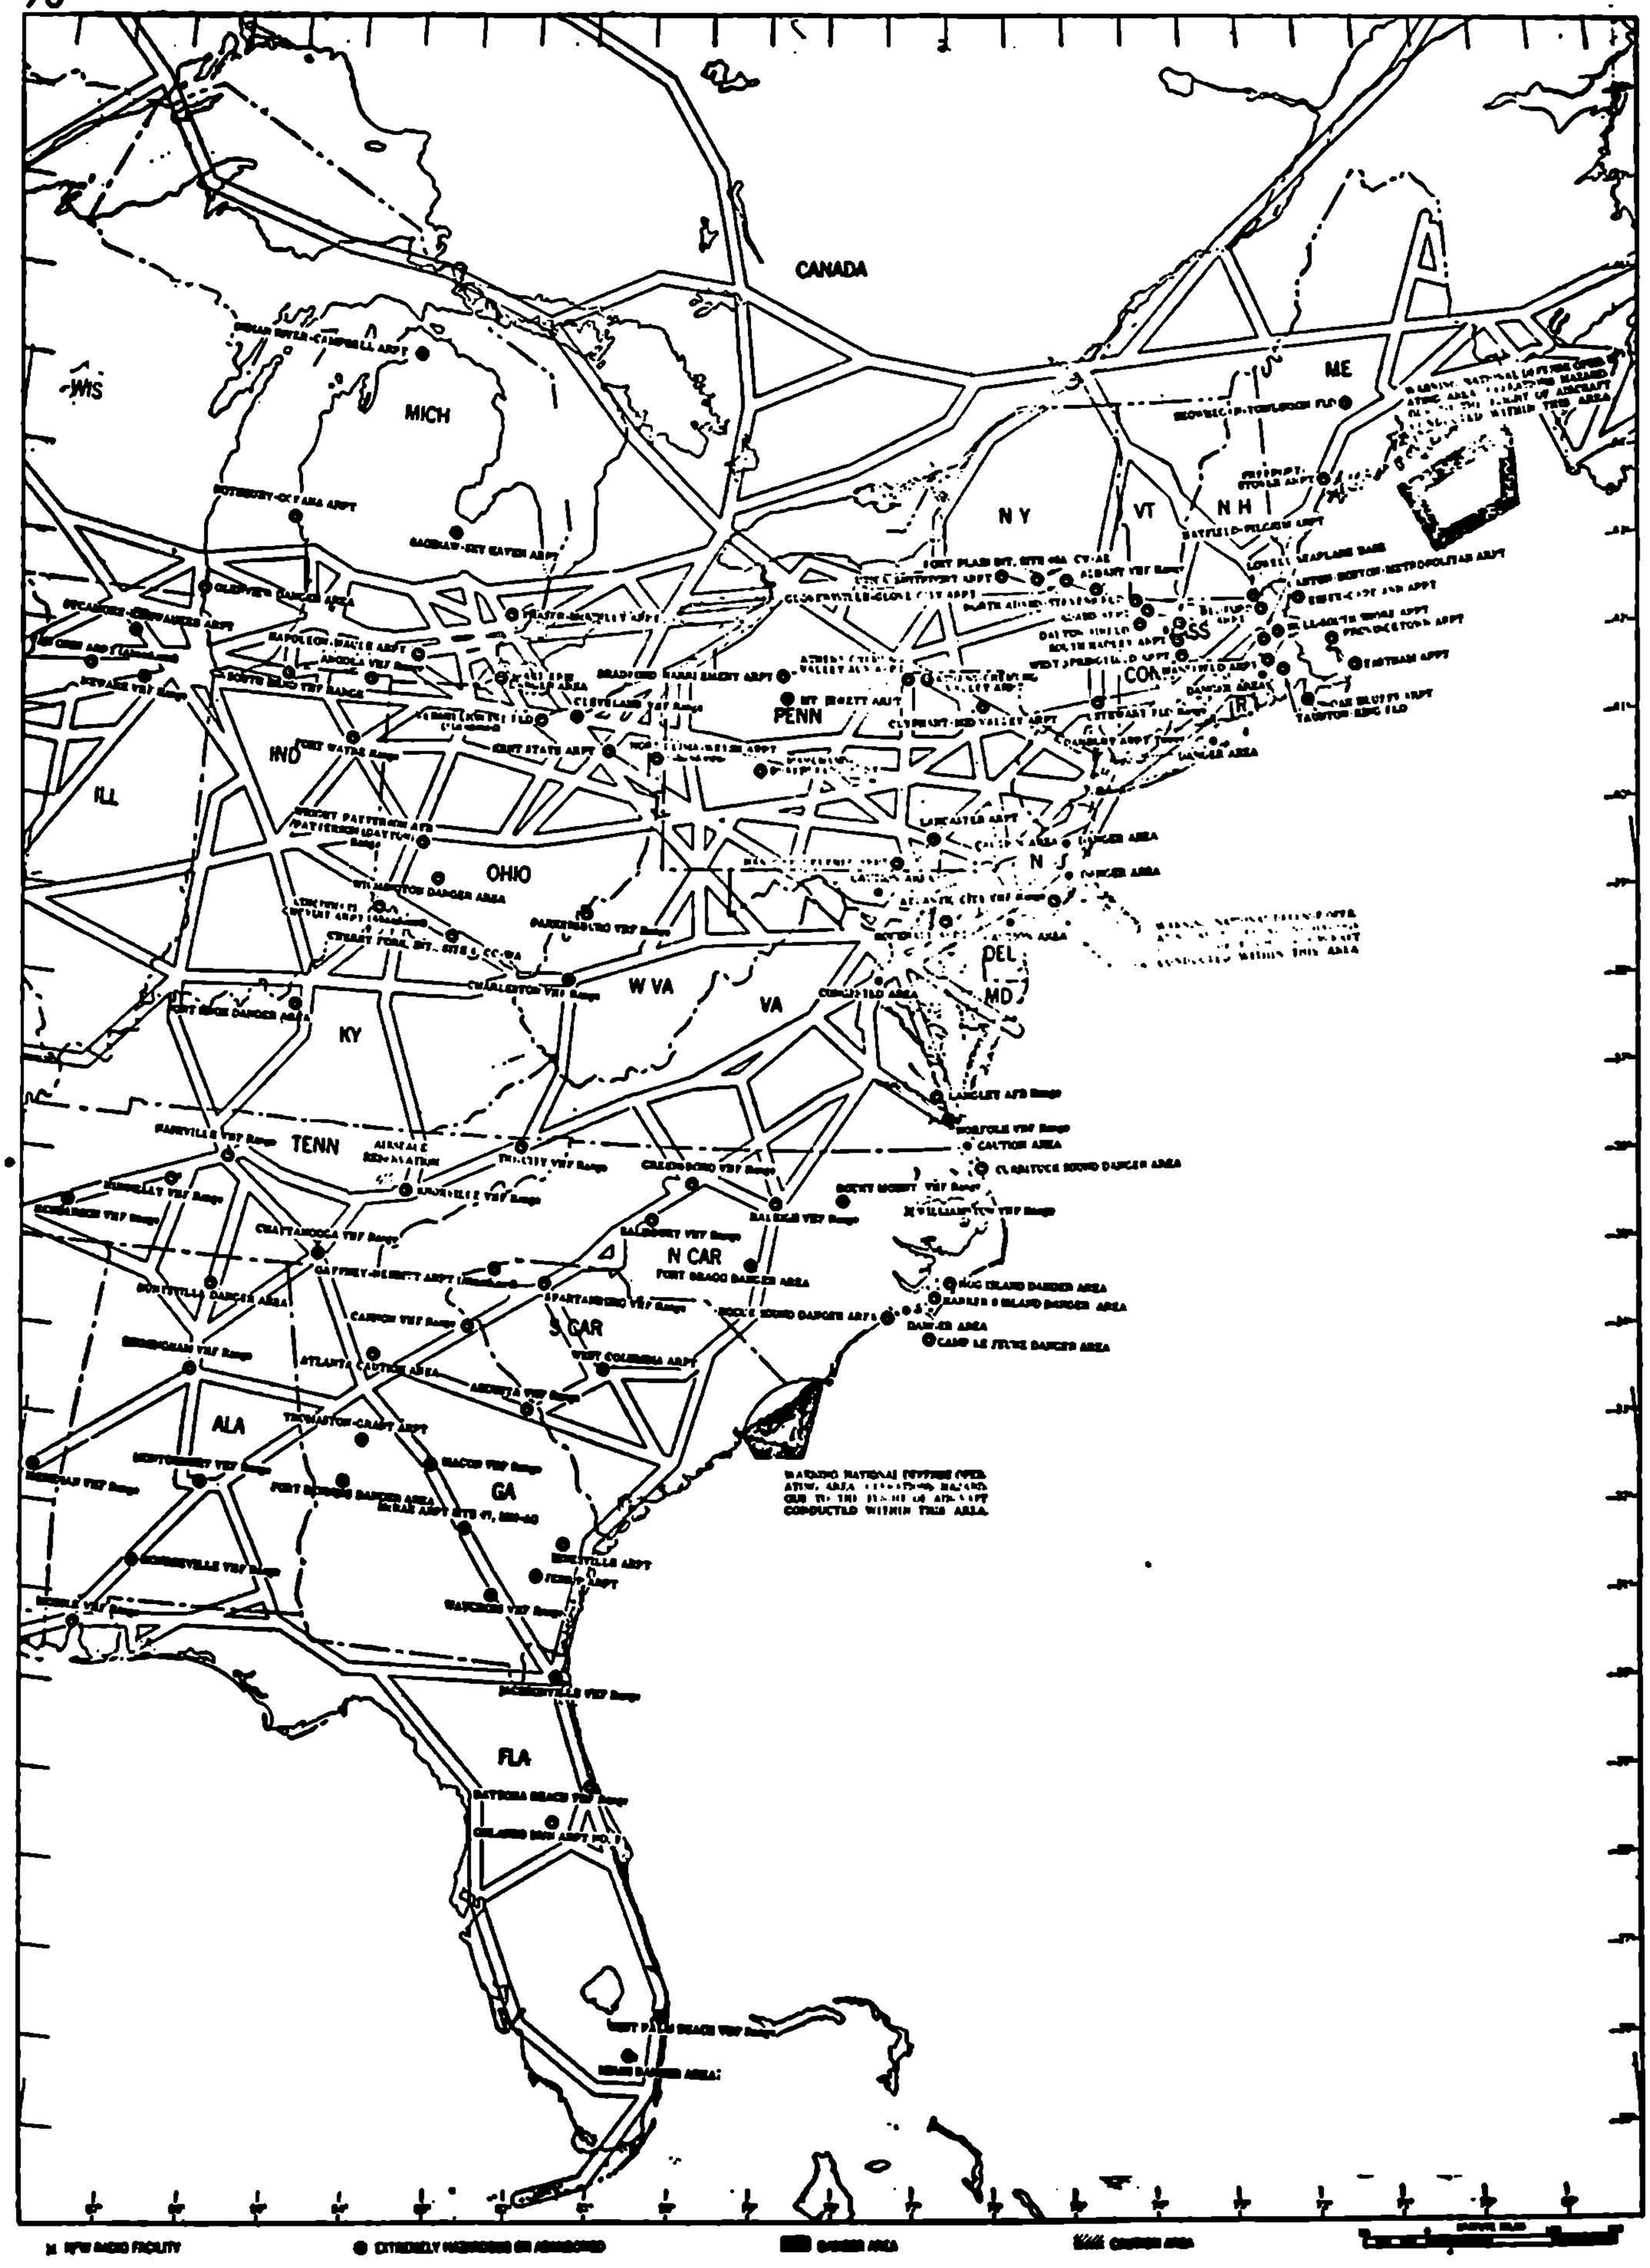
(a) NEW RADIO NAVIGATIONAL AIDS, BY AN X[1]
(b) NEW DANGER OR CAUTION AREAS
(c) ABANDONED AIRPORTS, BY AN (A)[1]
(d) DISCONTINUED RADIO NAVIGATIONAL AIDS, BY AN (D)[1]
(e) AIRPORTS OR RADIO NAVIGATIONAL AIDS TEMPORARILY UNUSABLE OR USABLE ONLY WITH EXTREME CAUTION (OR AIDS AFFECTED BY A CHANGE OF FREQUENCY, IDENTIFICATION, QUADRANTS, OR RANGE COURSES), BY AN (U)[2]

ONLY DANGER AND CAUTION AREAS AND (U) SYMBOLED FACILITIES, HOWEVER, ARE CUMULATIVE IN NATURE, FOR EXAMPLE, A NEW DANGER OR CAUTION AREA IS SPOTTED UNTIL IT IS INDICATED ON THE NEXT REVISION OF THE PERTINENT SECTIONAL CHART.



NOTAMS REFERRED TO BY THE (R) SYMBOL WILL BE FOUND IN EITHER THE "NOTICE TO AIRMEN" SECTION OR THE "REMARKS" COLUMN OF THE "DIRECTORY OF AIRPORTS" SECTION.

[1] NEW NAVIGATIONAL AIDS OR ABANDONED AIRPORTS AND AIDS ARE INDICATED IN ONLY ONE ISSUE



[2] UNUSABLE AIRPORTS AND AIDS OR AIRPORTS AND AIDS USABLE ONLY WITH EXTREME CAUTION ARE INDICATED AS LONG AS THE HAZARDOUS CONDITIONS REMAIN IN EFFECT. VOR OR VAR RANGES ON-TEST BASIS AND NOT TO BE USED FOR NAVIGATION ARE INCLUDED IN THE FREQUENCY AND IDENTIFICATION TABULATION ON PAGE VI AND PREFIXED BY AN ASTERISK.

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO CIVIL PILOTS AS WELL AS ARMY AND NAVY. All GCA facilities (Air Force, Navy, or CAA) are available to any plane in emergency. To secure GCA assistance, pilots should first call the associated control tower.

In addition to the working frequencies listed below, Air Force and Navy GCA emergency VHF transmissions are made on 140.58 mcs. Simplex service on 3117.5 kcs will be provided at all Air Force and Navy installations to provide an alternate means of communications for scheduled air carrier aircraft. Army towers will relay GCA instructions on 200-400 kcs band to civil aircraft not equipped to receive VHF or HF. Most GCA units can transmit instructions directly on tower low frequency. Those identified by a (&) are forced to relay instructions on tower low frequency, if low frequency required.

A minimum of 30 minutes will generally be required to assemble a GCA crew and prepare the equipment for operation AFTER an alert has been received at those locations not providing continuous service. CAA GCA units, however, operate continuously. Pilots desirous of making practice GCA approaches should make their own arrangements with the tower concerned.

N.B. AF and Navy facilities are available to civil aircraft in emergency or by prior arrangement with the C.O. of the respective AFB, NAS or MCAS. Civil minimums are 400' ceiling and 1 mile visibility except in emergency

N.B. It must be remembered that practically all VHF omni-directional ranges (VOR) have not yet been formally commissioned and a great number of the VHF visual-aural ranges (VAR) are in the same status, being on test basis and not to be used for navigation. These on-test basis VHF ranges are indicated by a prefixed asterisk (*) in the above tabulation.

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(When city and airport names are identical, the airport name is omitted in the interest of space-conservation)

(A) Airport name* (with A in Type column) - Owned or leased totally by U.S. Air Force
(N) " (with N in Type column) - Owned or leased totally by Navy
(CG) " (with CG in Type column) - Owned or leased totally by Coast Guard
(NG) " (with NG in Type column) - Owned or leased totally by National Guard

(A) . Airport name - Open to civilians but owned or leased wholly or in part by U.S. Air Force, Air Reserve, U.S. Air Force servicing detachment or contract gas usually available.
(N) " - Open to civilians but owned or leased wholly or in part by Navy
(CG) " - Open to civilians but owned or leased wholly or in part by Coast Guard.
(NG) " - Open to civilians but owned or leased wholly or in part by Army or State Government for Air National Guard. Limited servicing and maintenance for transient military aircraft.
(P) " - Civil airport open to military aircraft. (See Note 2).
* " - C.A.A. Intermediate Field.

* Air Force and Navy fields are listed alphabetically by airport name followed by city name in parenthesis.

N.B. ALL AIRPORTS EXCEPT THOSE CITED WITH AN "A" or an "N" IN THE TYPE COLUMN ARE OPEN TO CIVIL FLIERS. AIRPORTS WITH NO PREFIX ARE EXCLUSIVELY CIVIL AIRPORTS.

TYPE

A	- U.S. Air Force	I	- Intermediate	NG	- National Guard
C	- Commercial	M	- Municipal		
CG	- Coast Guard	N	- Navy	P	- Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified.

CLASS

(Sea Level Runway and Strip Requirements)

Class	Strip Length	Runway (Paved) Length
S-1	Less than 1600'	Less than 1600'
1	1600-2699'	1600-2499'
2	2700-3699'	2500-3499'
3	3700-4699'	3500-4499'
4	4700-5699'	4500-5499'
5	5700-6699'	5500-6499'
6	6700-7699'	6500-7499'
7	7700-8699'	7500-8499'
8	8700-9699'	8500-9499'
9	9700' +	9500' +

RUNWAYS

In "longest" column is stated length of longest landing area in hundreds of feet.

"h" indicates landing area is hard-surfaced or paved.
"sw" indicates allway field.

No differentiation is made between runways and strips as far as number of landing areas in field is concerned. In other words, two hard-surfaced runways and two sod surfaced strips will be listed as four runways.

FACILITIES AND SERVICING

RADIO

R1: Control tower voice
R2: Range (or H facility) with voice
R3: Range (or H facility) and tower
R4: Range (or H facility), tower, and ILS

LIGHTS

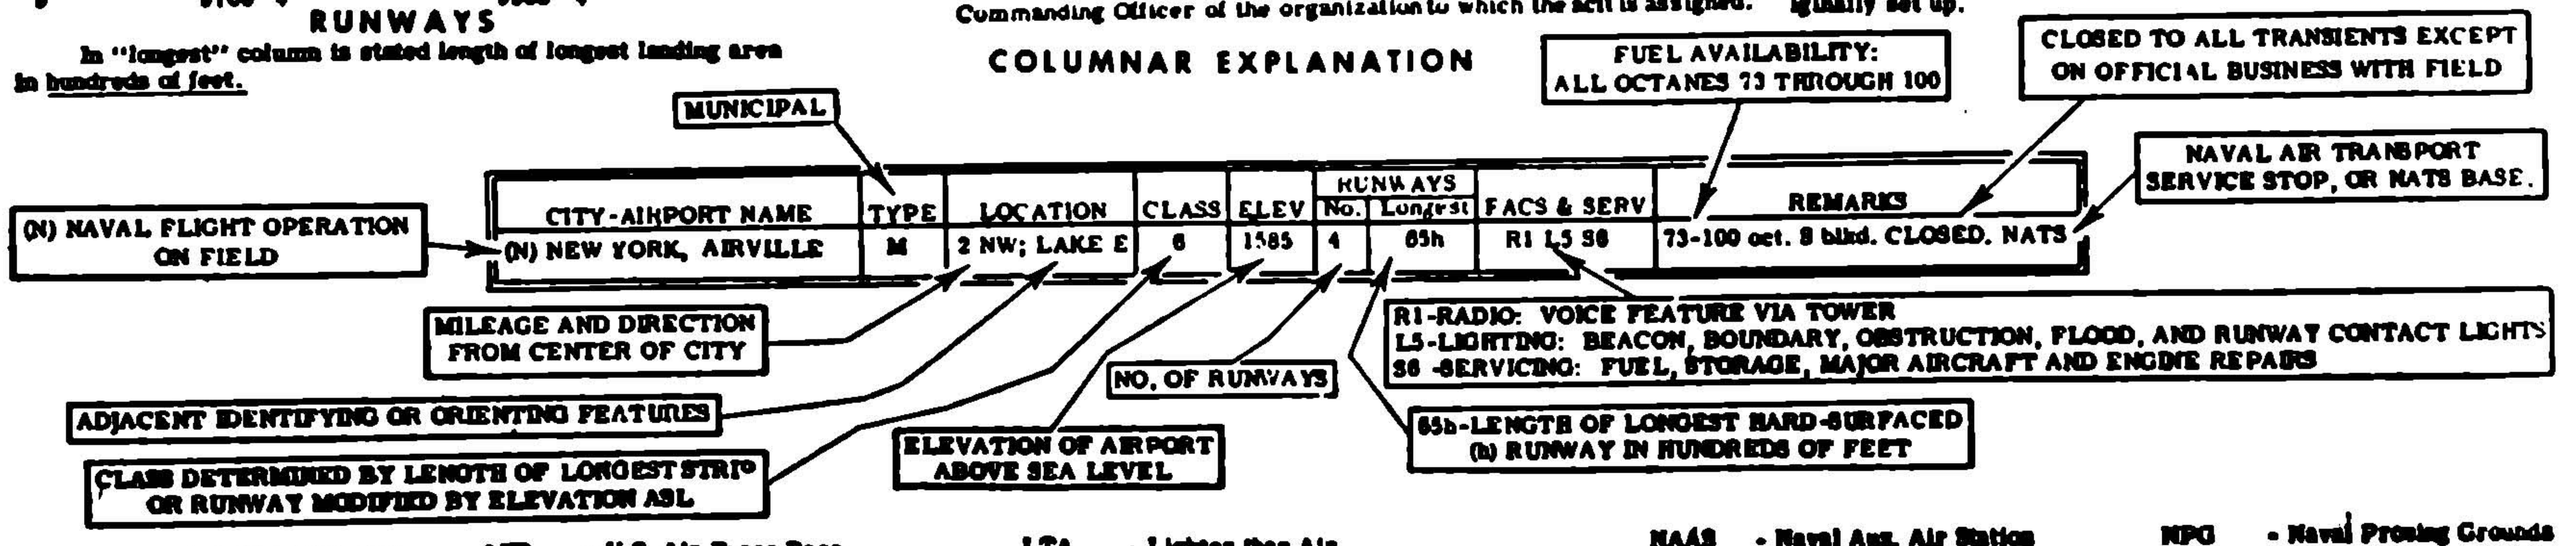
L : Incomplete lighting, such as flood or strip lights, which are generally available only on prior request
L1: Beacon only
L2: Beacon and boundary
L3: Beacon, boundary, and obstruction
L4: Beacon, boundary, obstruction, and flood
L5: Beacon, boundary, obstruction, flood, and runway contact
(L5): Identical to L5 except that runway contact lights are high intensity
L6: Beacon, boundary, obstruction, flood, runway contact, and instrument approach
(L6): Identical to L6 except that instrument approach lights are high intensity

(The class always indicates the highest element available but does not necessarily include all intermediate elements)

SERVICING

S1: Fuel (Any S combination in parenthesis indicates only part time or irregular attendant)
S2: Fuel, storage
S3: Fuel, storage, minor aircraft repairs
S4: Fuel, storage, minor aircraft, and minor engine repairs
S5: Fuel, storage, major aircraft, and minor engine repairs
S6: Fuel, storage, major aircraft, and major engine repairs

REMARKS



(a) "91 oct." indicates fuel octanes available. "AF" , or "Navy", preceding octane indicates USAF or Navy contract fuel available.
(b) "CLOSED" indicates closed to all civil aircraft and all transient military aircraft except on official business with written orders this station or in emergency. "CLOSED MIL" and "CLOSED NAVY" on civil fields indicate same restrictions as above are applicable to armed services.
(c) "Port. B-2 lgts" indicates cone-mounted lights outlining runways. These lights are portable and may be shifted from runway to runway, or strips.
(d) "TEMP INACT.NO FACS." indicates USAF and/or Navy airfields used either exclusively by them or municipal airfields used jointly by them and civil interests at which both the USAF and/or the Navy and the civil interests are inactive. Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the organization to which the acft is assigned.
(e) "USAF and NAVY TEMP INACT. CIVIL FACS." indicates municipal airfields used jointly by the USAF and/or Navy and civil interests at which the USAF, or Navy facilities are inactive but civil facilities are available. Such fields may be used by military aircraft, however, only commercial service is avail.
(f) OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, clearly discernible for contact operations, are frequently omitted, for example. On the other hand, all pole lines within at least a 15-1 glide angle are indicated.
(g) "Fld lights on prior req." indicates field lights are available only by previous phone call, telegram, or letter. It must be remembered that most fields do not have 24-hour operation. Accordingly the field lights, indicated for such a lighted field, (and in some instances, even the rotating beacons) are available only by prior request. When an airport classification indicates a lighted field, and there is no notation in the REMARKS column, the field lights burn all night or will be turned on when a radio request is made or a plane circles the field.
(h) "FEE" indicates landing charges for revenue producing aircraft.

NOTES

1. ← Notam data revising previous issues.
2. "(P)" in City and Airport Name column indicates: (1) those municipal airports improved with public funds and covered by an agreement between the municipality and the U.S. Government permitting government planes to use such fields in common with others and without charge, to the extent possible without restriction of non-military operations, or (2) other civil airports for which legal permits covering their limited use by military aircraft have been procured and filed with the real estate agency of the Department of the Army.
3. "*Effingham, 10, L5-D" in City and Airport Name column indicates that the airport is Effingham CAA Intermediate Field, Site 10 on the St. Louis-Indianapolis Airway. Municipal airports where the lights are maintained by the C.A.A. are listed similarly except that there is no prefixed star.
4. AIRLINE STOP airport names are capitalized.
5. PRIVATE AIRPORTS are available for owner only, and not to be used by others except in emergency. Since no servicing is available for transients no "S" combination is ever assigned these fields.
6. "BLND" indicates approaches where glide angle to runway is 3:1 or less.
7. "(Formerly Air Force)" or "(Formerly Navy)": These former Air Force and Navy fields are in the process of being disposed of by the War Assets Administration and Farm Credit Administration. Their type is difficult of determination currently and they should be used with caution as some, unable to be disposed of as airport property, are being diverted to agricultural purposes.

** At the end of each state, under the heading of NEW AIRPORTS, will be found, out of alphabetical alignment, all the new airports tabulated after the type for that page had been originally set up.

New or revised data (See page X)

AIR FORCES SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to Commanding General, Air Transport Command, Attention: Flight Operations Division, A-3. Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over 10 days should be forwarded to the same address for submittal to Chief of Staff, USAF, as required. Restrictions in Air National Guard Fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. That Bureau will forward approved restrictions to the above address for publishing. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration.

In connection with the above the attention of all base operations officers is invited to AF Regulation 55-12 of February 20, 1948, subject, "Notices to Airmen", and to AF Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of AF Regulation 65-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant with itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of AF Regulation 60-8 of August 28, 1947, U.S.A.F. aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated: AFRICA & AZORES - Brookley AFB, Ala., MacDill AFB, Fla., Washington National Airport, D.C., or Westover AFB, Mass. ALASKA - McChord AFB, Wash., or Great Falls AFB, Mont. BERMUDA - Mitchel AFB, N.Y., Brookley AFB, Ala., MacDill AFB, Fla., Washington National Airport, D.C., or Westover AFB, Mass., or Fairfield-Suisun AFB, Calif. CANADA - Great Falls AFB, Mont., Brookley AFB, Ala., McChord AFB, Wash., Washington National Airport, D.C., Selfridge AFB, Mich., or Westover AFB, Mass. CANAL ZONE, CENTRAL AMERICA, MEXICO, & SOUTH AMERICA - March AFB, Calif., MacDill AFB, Fla., Kelly AFB, Tex., or Brookley AFB, Ala. CARIBBEAN - Brookley AFB, Ala., Kelly AFB, Tex., or MacDill AFB, Fla. ENGLAND, GREENLAND, ICELAND, & NORTH IRELAND Washington National Airport, D.C., or Westover AFB, Mass. NOVA SCOTIA & NEWFOUNDLAND - Washington National Airport, D.C., Westover AFB, Mass., Selfridge AFB, Mich., or Brookley AFB, Ala. HAWAII - Fairfield-Suisun AFB, Calif. EUROPEAN THEATER - Brookley AFB, Ala., MacDill AFB, Fla., Washington National Airport, D.C., or Westover AFB, Mass.

V.H.F. CHANNEL ASSIGNMENTS: Following are USAF assignments:

CHANNEL	AF FREQUENCY	CHANNEL	AF FREQUENCY
A	116.1	H	134.10
B	126.18	U	108.3
C	137.88	V	108.7
D	140.58	W	109.1
G	137.70		

MINIMUM SAFE ALTITUDES ON AIRWAYS: Under USAF Regulation 60-16 and policy of USAF, minimum safe altitudes for flight along airways will be identical to those established by the Civil Aeronautics Administration. Action is being taken to amend pertinent USAF flight information publications to show these minimums.

✓ Indicates new or revised Special Notices

IFR CLEARANCE MINIMUMS FOR CIVIL FIELDS: For IFR clearance to civil fields when minimum altitude over field is not shown on let-down chart contained in T.O. 08-15-3 or Pilots Handbook, USAF policy states that the "REGULAR - DAY" minimum as shown in CAA Flight Information Manual will apply. Necessary action is being taken to amend all charts to show the proper minimums.

OFFICIAL AIR FORCE FIELD DESIGNATIONS: The official names and designations of Air Force Fields have been changed to new designations by the Department of the Air Force General Orders No. 2 of January 13, 1948. The abbreviation "AF Aux." stands for Air Force Auxiliary Field and the abbreviation "AFB" is for Air Force Base.

POLICY ON CONTROL TOWER PROCEDURE: Base Commanding Officers at bases where the tower is operated by CAA will discontinue requesting the tower to determine the highest rank aboard incoming aircraft. This action is taken in an attempt to curtail the congested communications situation and at the request of CAA. In case of VIP, the desired information will be transmitted from point of departure to destination in the flight plan.

UNAUTHORIZED USE OF VHF EMERGENCY FREQUENCY (140.58 MCS) The attention of all operations officers and pilots is invited to AF Letter 100-31, of January 13, 1948, subject, "Unauthorized Use of VHF Emergency Frequency (140.58 mcs.)"

✓ **CORRECTIONS FOR AND ADDITIONS TO USAF T.O. 08-15-1:** (1) Correct page 87, Air Force GCA Training Facilities, by showing GCA Training Facility at Walker AFB, N.M. Operates on VHF Communication Channels: A-B-C-D-G-H. HF Communications: 3475, 4890, 6210, 4495, 6640 kcs transmits and guards. Hours of operation: 0800-1600M Mon. thru Friday.

(2) Correct page 40, by showing Scott AFB Remarks to read as follows: ". . . Operational Air Force GCA Available. . ."

(3) Correct page 38, by showing the elevation of Greenville Mun. Airport as 1049'.

(4) Correct listing under Comox B.C., as follows: Delete "IAC station on 3082.5 and 5037.5". (This is paid service).

(5) Correct page 25, by showing Ambrose compulsory reporting point at the intersection of the SW course of Mitchel range and the SE course of Newark radio range.

(6) Correct page 24, by showing facilities now listed with Philadelphia as Philadelphia (International), and those now listed under Philadelphia NE under North Philadelphia, because of change in name of airports.

(7) Correct Bearing and Distance, station to field, for Santa Barbara radio range, as 74°, 2.2 miles.

(8) Correct page 56, by showing elevation of Austin (Robert Mueller) as 631'.

(9) Correct Canadian data as follows: Dartmouth, N.S. control tower operates also on Channel A(1); Goose Bay, Lab. control tower operates also on Channel A(1); Patricia Bay, B.C. control tower operates from 0800 to 2400.

(10) Correct page 26, by adding Lockbourne Airways Station. Present listing should refer to page 84 rather than 8.

(11) Correct page 96 by deleting from botton of page "For detailed explanation see page 118".

(12) Correct page 50 by showing Tallahassee range freq. as 379 kcs.

(13) Correct page 54 by showing identification of Mobile radio range as MOB.

(14) Correct listing under Palm Beach Airways, Fla., by changing remarks to read: AACS, WZC; also on 11445 and 8200 CW cont. Foreign Air-Route Freqs.: 4280 kcs voice cont; 4595-6475 CW 0600-1800; 3177.5 CW -2890 - 3000 voice on req only. 8280 CW guarded cont; also see page 85. Racon unreliable.

✓ **CORRECTION FOR USAF T.O. 08-15-3:** Correct McChord Field chart to show missed approach procedure as follows: Climb straight ahead to 1500', making a 180° climbing right turn within 5 mi. of McChord AFB and cont. climb to cross McChord Fld Range at 3500'.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators No. 9, July 29, 1946, Hydrographic Office information concerning naval and marine corps air stations and facilities, including changes in field facilities, operation rules, air/ground communications facilities, instrument approach procedures and navigational aids, should be directed to: The Division of Air Navigation, Hydrographic Office, Washington 25, D.C., for transmittal to the C.A.A. In accordance with Aviation Circular Letter No. 96-46 of June 13, 1946, approval for the closing of any naval or marine corps air station or facility to transient military aircraft for a period in excess of 10 days must be obtained from the Chief of Naval Operations. Also, approval is to be obtained from the Chief of Naval Operations before relocation or modification of any aid to air navigation, such as reorientation of radio ranges.

V.H.F. CHANNEL ASSIGNMENTS: Following are Navy assignments:

CHANNEL	NAVY FREQUENCY	CHANNEL	NAVY FREQUENCY
1	116.1	6	134.64
2	142.56	7	143.64
3	126.18	8	142.02
4	137.88	9	142.74
5	143.28	GUARD	140.58

RESTRICTIONS ON NAVAL AIRCRAFT AT LA GUARDIA FIELD, INTERNATIONAL AIRPORT, AND NEWARK AIRPORT: La Guardia Field, N.Y., New York International Airport, N.Y., and Newark Airport, N.J., are closed to all Naval air traffic except that involving urgent official business which cannot be properly handled by landing at Floyd Bennett Field.

CIVIL SPECIAL NOTICES

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout, servicing, lighting, or permanent obstructions of existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or constructions, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airways Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide.

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA District Airport Engineer for coordination before they are included in the Airman's Guide.

DIRECTORY OF AIRPORT NOTAMS: Because of space limitations, the airport directory perforce serves as a notam supplement. Notam data revising previous directory issues are indicated by prefixed arrows. The only airport data (other than temporary conditions) carried in the Notices to Airmen section are coordinates (latitude and longitude).

DIRECTORY AIRPORT NAME CHANGES: Air Force and Navy fields (normally listed under airport name rather than city name) released by the services as surplus to their needs and established as civil fields are carried under the heading of "New Airports or Fields out of Alphabetical Alignment" until the Airport Directory is retyped.

ACKNOWLEDGMENT OF SUBMITTED AIRMAN'S GUIDE DATA: An under-manned staff prevents an individual acknowledgment of data submitted for inclusion in the Airman's Guide by telegram, teletype dispatch, or letter. Your cooperation in permitting a Guide citation to suffice as an acknowledgment will be appreciated.

CIVIL USAGE OF MILITARY FIELDS: USAF and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

CIVIL USE OF MILITARY GCA UNITS: It must be recognized that, while Navy and Air Force GCA units may be used by civil fliers in emergency or by prior arrangement with the C.O. of the fields having such units, civil ceiling and visibility minimums of 400' and 1 mile respectively are mandatory, except in emergency.

USE OF AIRPORT UTILITY FREQUENCIES - 121.9 & 121.7 MCS.: The airport ground control frequencies of 121.9 mcs (standard civil channel) and 121.7 mcs (alternate channel) are provided to eliminate the frequency congestion caused by numerous radio contacts between the tower and taxiing aircraft and the tower and airport utility vehicles thus providing a clear VHF channel for arriving and departing aircraft. The ground control frequency is used for the issuance of taxi information, clearances, and any other contacts between the tower and aircraft or vehicles operating on the airport.

Landing aircraft should guard the appropriate ground control frequency (normally 121.9 mcs) as soon as the aircraft has cleared the active runway. At locations where a ground control frequency is not available or the aircraft is not equipped with the VHF ground control channel, the tower will handle all transmissions to aircraft on the ground over its low frequency channel (278 kcs or equivalent). Departing aircraft should communicate with the control tower on the appropriate ground control channel (121.9 or 121.7 mcs) for taxi and clearance information and should remain tuned to that frequency until the pilot is ready to request take-off clearance. At the time, the pilot should communicate with the tower on the appropriate airborne VHF channel. Further communication with the tower, if necessary, should be made on the latter frequency. Aircraft not VHF equipped should guard the tower low frequency channel (278 kcs or equivalent) for taxi information and take-off clearance.

CANADIAN AIRPORT UTILITY FREQUENCIES: The Department of Reconstruction and Supply (formerly the Department of Transport) of Canada has adopted the airport utility frequency 121.9 mcs at 15 airport control stations in Canada. This practice will be applied generally, in the future, with the second airport utility frequency 121.7 mcs to be assigned only if and when congestion is experienced on 121.9 mcs.

V.H.F. IFR FLIGHTS: Until further notice, Air Traffic Control will be exercised on the assumption that aircraft are utilizing intermediate frequency radio ranges.

If a pilot desires to conduct IFR flight using VHF ranges over all or a portion of the route, his flight plan should so indicate. Further, flights should not be conducted on civil airways in IFR weather using VHF ranges unless the A.T.C. clearances so authorize.

PRIVATE FLIER VHF FREQUENCIES: CAA Communications Stations and Towers guard the private flier frequencies of 122.1 mcs for transmission to CAA Communications Stations and 122.6 mcs for transmission to CAA operated towers.

CAA Communications Stations normally reply to itinerant aircraft on the voice feature of the range, low frequency or VHF, whichever is applicable. Replies are made on 111.1 mcs if VHF reply has been requested on other than range frequency. CAA airport control towers will reply to itinerant aircraft on one of the frequencies in the 118.3 to 121.3 mcs band as cited in the "Transmitting Frequencies and Identifiers" listing on Page VI.

RADIOTELEPHONE COMMUNICATIONS: The word ROGER in radiotelephone communications means "I have received all of your last transmission", and its use in any other sense by CAA stations and towers is not authorized. In order to avoid confusion it is suggested that pilots engaging in air-ground contacts also limit the use of ROGER to acknowledgment of transmissions.

Pilots enroute are requested to avoid, if possible, calling airway communications stations at or about 15 and 45 minutes past the hour (which are the scheduled broadcast times) to request weather information, as such calls may delay starting of scheduled broadcasts and cause inconvenience to other persons who are dependent on the broadcasts for weather reports.

VISUAL-AURAL RANGE (VAR) MONITORING: Only visual courses of VAR facilities are monitored continuously.

RADAR BEACONS: The radar beacon is an electronic beacon designed to serve as an aid to aircraft navigation for such aircraft as are equipped with proper radar equipment. Its purpose is somewhat similar to ordinary low frequency radio ranges, but radar beacons furnish more information. From a radar beacon signal, the radar operator of an aircraft can obtain both the range and azimuth of the beacon. The signal is also coded, so the particular beacon can be identified by reference to a chart or radar beacon list. Thus, the radar operator can obtain rapidly a navigational "fix" Microwave beacons transmit only when interrogated by a special radar pulse length reserved for this function alone.

The essential difference between a radar and a radar beacon is that unlike the radar, which depends on a reflection of its own energy to determine the existence and position of an object, the radar beacon is made up of a receiver -transmitter combination which sends out a coded signal when actuated or "triggered" by a radar signal of the proper frequency in order to receive the radar beacon signals "triggered" by the radar set.

An advantage of radar beacon is that a single beacon in an area will enable aircraft to navigate under all weather conditions if fitted with the necessary radar interrogating equipment, and at a much greater range than radar alone

"Racon List, Book I", Hydrographic Office Publication No 520, gives location, code, operating agency, and all information necessary to use these radar beacons.

BONE-SHAPED (DUMB-BELL) FAN MARKERS The bone-shaped fan markers have been commissioned primarily for approach control purposes as they provide a more definite holding pattern being only 1-1/2 miles wide through the center of the pattern instead of 3 miles as in the elliptical shaped fan marker Eventually all approach control fan markers will be bone-shaped. In some cases fan markers taken over from other agencies, especially the Navy, are not used for approach control purposes even though they have the bone-shaped pattern which will be retained.

INSTRUMENT LANDING SYSTEM (ILS) APPROACHES. Effective March 18, 1948, pilots are requested to give advance information to Air Traffic Control when planning to make an ILS approach, upon reaching the reporting point preceding the holding fix at airport of intended landing. This will permit assignment to the proper holding pattern and eliminate unnecessary delays in landing. Failure to use this procedure, however, will not preclude the pilot's right to request an ILS approach after reaching the holding point if weather conditions or other factors make such request advisable.

INSTRUMENT APPROACH LIGHT SYSTEMS: Normally neon approach light systems will be operated regardless of the runway being used whenever the light intensity is equivalent to that between dusk and dawn, day or night, regardless of weather conditions or when otherwise necessary or requested.

AERONAUTICAL CHART AND PUBLICATION CORRECTIONS: (1) Correct Coast & Geodetic Survey Radio Facility Chart 18A, dated March 10, 1948, by deleting 126.18 mcs. as a receiving watch for Bridgeport, Conn., Tower.

(2) Correct Flight Information Manual, Vol. 2, No. 2, dated January 1, 1948, by correcting Chapter VII, Standard Broadcast Stations, Savannah, Ga., Hunter Field listing as follows: Radio Station WSAV - 630 - 5000 - 4.5 E; 32-03-51, 81-00-52 - 400 DA-N - 0600-2400, Sun.0800-2400. Tower location data shown in Manual is for old Tower not in use. Sacramento, Calif., KNOA 155' Twr, lat. 38-33-58, long. 121-26-06.

TELETYPE NOTAMS: Throughout the year climatic conditions (snow storms, floods, etc.) render many fields temporarily unusable or unsafe. In addition, there are intermittent maintenance operations in progress on many fields. Radio facilities suffer temporary power failures or couse misalignments, and lighting facilities are temporarily inoperative. Because these temporary conditions cannot be given immediate coverage in the "Airman's Guide", full cognizance must be taken of Teletype Notam service which gives the desired coverage on any facility or field at which teletype transmitting stations are based. Cross-country pilots, accordingly, should consult these Teletype Notams for latest available data on air navigation aids. These teletype notams are posted in CAA Communications Stations and in all Air Force Field and Naval Air Station Operations Offices having teletype drops.

METEOROLOGICAL SERVICES AVAILABLE TO CIVIL PILOTS: Weather forecasting and reporting services for civil aviation are provided by the United States Weather Bureau of the Department of Commerce Observations and reports are made at hourly intervals at approximately 500 stations and special reports are made for sudden changes in weather conditions.

The stations from which forecasts and reports may be obtained fall in three categories as follows. Airway Forecast Centers. At these 18 offices forecasters are on duty 24 hours of every day to provide forecasts, information, and advice concerning aviation weather

Albuquerque, N.M.	Denver, Colo	Minneapolis, Minn
Atlanta, Ga.	Ft. Worth, Tex	New Orleans, La
Billings, Mont.	Kansas City, Mo	Salt Lake City, Utah
Boston Mass	LaGuardia Field, N.Y	San Francisco, Calif
Chicago, Ill	Los Angeles, Calif	Seattle, Wash.
Dayton, Ohio	Miami, Fla	Washington, D. C.

Flight Advisory Weather Service Units: These offices are located in the 26 CAA Airway Traffic Control Centers and are staffed 24 hours a day to give short range detailed information and advice The weather service available from FAWS should be particularly helpful to pilots in the air, who can obtain it by calling any Airway Communications Station by radio

Weather Bureau Airport Stations and Airway Communications Stations: Most of these stations are open 24 hours a day, and weather reports, regional forecasts and terminal forecasts as distributed by teletype may be obtained from them. In many cases, however, professional forecasters are not on duty throughout the 24 hours at these stations and requests for specific trip forecasts must be made a sufficient time in advance to permit obtaining the information from the appropriate forecast center Where full meteorological service is required, at least two hours' notice (in addition to communication time) should be given for a flight exceeding 500 miles from point of departure to point of first landing, and at least one hours' notice for flights not exceeding 500 miles.

Requests for trip forecasts should include details of the route to be followed, time of departure, estimated time of arrival, air speed and type of aircraft, flight altitude and whether flights will be made VFR or IFR.

The attention of all pilots is also directed to the fact that weather reports and other information are broadcast at 15 and 45 minutes past the hour from all continuously operated CAA radio range stations. A listing of the commercial weather broadcasts may be obtained by writing to the Chief, U.S. Weather Bureau, Washington, D. C:

WEATHER REPORTING SERVICE

Weather Reporting Location	Type of Report	Lat., Long.	Action Taken
Harlingen, Tex., Airport	SW	26-10, 97-43	Established
Mission, Tex. (Moore Field)	SW	26-23, 98-20	Established
Tucson, Ariz., Mun. Airport	SW		Established

✓ DESIGNATION OF NON-COMPULSORY REPORTING POINT : The following reporting point has been designated as a non-compulsory reporting point: "ASHLAND" - Intersection of the S course of Medford, Ore. radio range and the W course of Klamath Falls, Ore. radio range.

✓ AMENDMENTS TO PUBLISHED MINIMUM ENROUTE INSTRUMENT ALTITUDES: Correct Minimum Enroute Altitudes, carried in the Flight Information Manual, Vol. 2, No. 2, dated January 1, 1948, as follows:

✓ THREE-LETTER IDENTIFIER-KEYING CHANGE-OVER: Hereafter, the only notice in the Airman's Guide of the three-letter keying change-over will be the current listing of all identifiers indicated on Pages VI through IX.

FOREIGN SPECIAL NOTICES

✓ INTERNATIONAL NOTAMS: The only source of international notams at the present time is the C.A.A. Overseas-Foreign Aeronautical Communications Stations at the following locations: New York, N.Y.; Miami, Fla.; New Orleans, La.; Balboa, Canal Zone; San Francisco, Calif.; Seattle, Wash.; Honolulu, Hawaii; Anchorage, Alaska.

In the immediate future a daily International Notams recapitulation, covering all foreing Class I and Class II Notams received in Washington will be forwarded to the ninety-odd domestic U.S. international airdromes and Air Force-Navy Foreign Clearing Stations.

Air Force requests for this publication should be addressed to Flight Operations Division, Asst. Chief of Staff, A-3, Headquarters, Air Transport Command, Washington, D.C.

FOREIGN ENTRY PROCEDURES, AIRPORTS OF ENTRY, CUSTOMS REPORTS, CIVIL AIRCRAFT CLEARANCE FOR FOREIGN COUNTRIES: These procedures and regulations are now incorporated into the Flight Information Manual. Only amendments to the data contained in the Manual will hereafter be carried in the Airman's Guide.

✓ DISTRESS PROCEDURE: If it is believed essential, any radio station of the aeronautical mobile service near an aircraft in distress may impose silence either on all stations of the aeronautical mobile service in the vicinity or on any station which impedes the distress traffic.

In either case, use is made of the service abbreviation "QRT" followed by the word DISTRESS; the instructions being addressed "TO ALL STATIONS" or to one station only, according to circumstances. The use of the abbreviation "QRT" must be reserved, so far as practicable for the aircraft in distress and the station on which controls the distress traffic.

When the station in distress wishes to impose silence, it shall use the abbreviation "QRT" followed by the distress signal "SOS" in lieu of the word "DISTRESS".

It should be understood that the station in distress is the only station authorized to use "QRT SOS"; other stations may use "QRT DISTRESS"

CLEARANCE OF NON-SCHEDULED FLIGHTS TO COSTA RICA: The Government of Costa Rica does permit irregular air carriers to make direct application for flight permits through its consular offices in the United States. Applicants who apply directly to the Government in San Jose, Costa Rica are referred back to a Costa Rican consular office in the United States.

Also, the Government of Costa Rica accepts applications for flight permits which have come through the United States diplomatic channels, i.e., the Department of State and the American Embassy.

EL-ARISH AIRPORT, EGYPT DANGER AREA: Anti-aircraft and air firing practice is being conducted continuously day and night until further notice within an area of 25 miles radius centered on El-Arish Airport at 31-00 N lat., and 33-50 E long. All aircraft must avoid this area.

LONDON, ENGLAND: Pilots entering or operating within this area should be familiar with all notams available at the New York International Notam Office.

N.B. The British Government has reported several violations of local air traffic rules. Disciplinary action will be taken on future violations.

PRECAUTIONS BEFORE ENTERING GREECE: All air carriers and others concerned are advised to use designated International Air Routes in and out of Greece. All pilots should be briefed on international visual signals between aircraft as Greece has indicated they intend to shoot down all intercepted foreign aircraft that are not recognized or fail to comply with instructions when intercepted.

IRELAND, SHANNON AIRPORT: Because control tower and other facilities at Shannon Airport were destroyed by fire, all aircraft expecting to land there will use GCA facility.

DANGER AREA IN THE VICINITY OF ENIWETOK ATOLL, PACIFIC OCEAN: Effective January 31, 1948, a Danger Area was established in the vicinity of Eniwetok Atoll, about 2400 miles WSW of Honolulu, Hawaii, by the Atomic Energy Commission. The Danger Area, which will be activated throughout the rest of the calendar year 1948, is described as follows: "Beginning with a point at 10-15 N lat., and 160-35 E long, N along the meridian of 160-35 E long, to a point at 12-45 N lat., 160-35 E long, thence E along the parallel of 12-45 N lat, to a point at 12-45 N lat., and 163-55 E long., thence S along the meridian of 163-55 E long, to a point at 10-15 N lat., and 163-55 E long, thence W to the point of beginning".

Because of the grave hazards resulting from tests of military weapons in this area it should be categorically avoided under all circumstances until further notice.

PERUVIAN PROHIBITED AREAS: The President of Peru has decreed that flight is prohibited over the following zones: Callao - lat 12-02, long. 77-16, to lat 12-02, long. 77-08; to lat 12-08, long. 77-08; to lat 12-08, long. 77-17.

Pisco - lat 14, long. 76-28; to lat 14, long. 76-14, to lat 14-14, long. 76; to lat 14-25, long. 76, to lat 14-25, long. 76-28.

Matarini - lat 16-54, long. 72-15; to lat 16-54, long. 72-05; to lat 17-05, long. 72-05, to lat 17-05, long. 72-15.

CLOSING OF PHILIPPINE AIRPORTS: The following five airports have been closed because of construction: Ragabag, Nueva Viseaya; Lucena, Tayabas; Daet, Camarines Norte; Masbato, Masbato; Cotabato, Mindanao.

The following five air strips have been forbidden to C-47s and other planes weighing more than 10,000 pounds including cargo and passengers, until the runways are lengthened. These air strips are as follows: Balor, Tayabas; Capiz, Capiz; Cagayan, Occidental Misamis; Plaridel, Bulacan; Calapan, Mindoro.

Another nine strips have been closed to regular use by commercial planes but may be used by C-47s and C-45s for emergency stopovers. They are as follows: Alabat, Tayabas; Catarman, Samar, Nagullian, La Union; Badas-Placer, Surigao; Culion, Palawan; Rosales, Pangasinen; Cataneuan, Quezon; Ilagen, Isabele; Wasig, Mindoro.

AIRPORT AND RADIO NOTICES

LEGEND

** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.

★ - New or revised radio data to be inscribed on charts or added to records.

[redacted]: BIRMINGHAM ARPT: Rdo rcvr rqrd. Sod unsafe when wet. Ctn ngts or under IFR, plant S of fld has long taxi and parking strips resembling rnwys. (3-9)

DOTHAN-NAPIER FLD: Obst lgts atop 175' water tank 6 mi N inop. (3-23)

**HUNTSVILLE-Danger area for mortar firing and bombing approx 6 mi SW is being used during hrs of daylgt, from the surface up to and including an alt of 5000'.

JASPER-WALKER CO. ARPT: Avoid new strip-being graded. (3-25)

MAXWELL AFB (MONTGOMERY): At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (10-17)

MOBILE-RADIO: Auto. rng monitor. sys inop. (3-20)

MOBILE-BATES FLD: N/S rnwy lgts inop. Equip. on fld. (3-22)

MONTGOMERY-DANNELLY FLD-RADIO: Apr 14, CAA will assume oper of mobile twr lctd approx 50' S of Admin Bldg. Twr will transmit on 119.5 mcs, 126.18 mcs on req only. Twr will grd 3105,4495,6210,3117.5 kcs, 119.5 mcs, 126.18 mcs on req. Hrs of oper: 0700 to 1900. (4-9)

[redacted]: **DATELAND ARPT: New fld. Lat. 32-48-15, long. 113-32-30. (11-21)

DAVIS MONTHAN AFB (TUCSON): E fld closed-acft parked on rnwys. Obst lgt inop on 75' pole SE of twr. Former taxi strips 12R and 30L are now open as Rnwy 12R-30L, to be used by lgt acft days only. (2-26)

★DOUGLAS-RADIO: Coordinates for VHF rng: lat 31-30-09, long. 109-40-17. (4-5) MRLW fac will be comm soon at lat 31-30-19.8, long. 109-39-20.4. Freq. 379 kcs, ident. "DUG". Courses: 50°,130°,230°,300° Var 14°E. Bear and dist, stn to fld: 120°,3 mi. (2-17) About Mar. 12, voice and bdcast fac will be comm. (3-11)

**ELOY-JONES AIRPORT: New fld. Lat. 32-46-15, long. 111-31-00. (12-16)

**GILA BEND-HUNT'S ARPT: New fld. Lat. 32-57-15, long. 112-43-46. (11-22)

PHOENIX: Inst training on Phoenix Rng between 5500' and 9500'.

PHOENIX-SKY HARBOR ARPT-RADIO: About Apr 20, middle compass ltr will be comm at middle mrkr site of CAA ILS. Freq. 219 kcs, ident. "H" (3-23). Outer and middle mrkrs operating on experimental basis. Unmonitored, pending flgt-check. (3-24)

ROOSEVELT-RADIO: Soon, special purpose 2-course VHF Aural rng, privately owned will be comm on 110.7 mcs, approx 10 mi W of Roosevelt at lat 33-41-00, long. 111-29-00. Call letters: "KAJE". Irregular hrs of oper, but chiefly during daylgt hrs. Freqs to be guarded 122.1, 122.5 mcs. Stn not to be used for navigation. (3-11)

**THEBA-GILLESPIE ARPT: New fld. Lat. 32-54-00, long. 112-54-30. (11-21)

**TUCSON-Danger Areas with a radius of 3 mi centered at the following points have been discont.: (a) lat 31-54, long. 111-02 (b) lat. 31-56, long. 111-21; (c) lat 31-42, long. 111-21; (d) lat 31-40, long. 111-06.

WILLIAMS AFB (CHANDLER)-RADIO: USAF rng not reliable and to be used for training only. (2-3)

WINSLOW ARPT-RADIO: About Apr 20, middle compass ltr will be comm at middle mrkr site of CAA ILS. Freq. 201 kcs, ident. "O". (3-23)

[redacted]: BATESVILLE ARPT: N/S strip and E end E/W strip under const-unusable. Taxiway to fuel pump hazardous. (10-17)

BRINKLEY ARPT: NE/SW and SE end of NW/SE rnwys hazardous when wet. Ctn ngts. (3-29)

**FOREST CITY ARPT: 150' obst lgtd twr rdo stn KFRP erected 1 mi NE (53° true) at lat. 35-01-44, long. 90-46-28. (4-2)

FORT SMITH ARPT: W end NW/SE, N end NE/SW rnwys closed. Equip. on fld, lgtd. Taxi stripc onnecting E/W rnwy with terminal Bldg closed to acft over 5000 lbs. (3-18)

★HARRISON-RADIO: MH fac operated by American Airlines comm at lat 36-16-25, long. 93-18-00. Class: MH. Freq. 287 kcs, ident. "HRO".

HOT SPRINGS-MEMORIAL ARPT: Use rnwys only. (3-23)

★LITTLE ROCK-RADIO: Apr 2, VOR placed in oper on experimental unmonitored basis, not to be used for navigation. Freq. 113.9 mcs., ident. "LIT". Lctn: lat 34-40-36, long. 92-10-48. Class: VORW. Elev. 341'. Var. 7°E..

SEARCY MUN ARPT: Const. (10-3)

[redacted]: ALAMEDA NAS: Mntn high approach on Rnwys 26L and 21. Hvy acft parked these areas 175' unlgtd cranes 2000' from NE corner fld-ctn ngts and during low visibility. Equip. adj to and on rnwys. Fld on positive control. (2-20)

★BAKERSFIELD-RADIO: Apr 6, VHF omni rng comm on an experimental unmonitored basis Freq. 115.4 mcs, ident. "BFL". Stn lctn: lat 35-29-05, long. 119-05-45. Elev. 550'. Var. 16°E. Class: VORW.

BAKERSFIELD KERN CO. ARPT-RADIO: About Apr 20, compass lctr will be comm at middle mrkr site of CAA ILS. Freq. 227 kcs, ident. "D". (3-24)

BECKWOURTH-PLUMAS CO. ARPT: Rnwys under const. Cross-co. students avoid using fld (2-26)

[redacted]: BOCA BCN SITE #17: Bcn inop..Will be discontinued soon. (3-29)
★BURBANK-RADIO: Apr. 9, ident. of Chatsworth FM changed to one dot four dashes
BURBANK-LOCKHEED AIR TERMINAL: Closed to all trans P-80 acft except on special projects for modification that stn. Right traffic Rnwys 7,15. Approach lgts Rnwy 7 changed to red. Rnwy 13-31 closed (parked acft)(3-22)
CASTLE AFB (MERCED): Use Rnwy 12-30 only-acft parked on landing mat. Approach lgts Rnwy 12-30 inop. (1-16)
COTATI OLF: Crash truck avail. at Santa Rosa NAAS on req. (10-3)
EL CAJON-GILLESPIE ARPT: Right traffic E take-offs, landings. (3-26)
EL CENTRO-DOUTHITT FLD: 1.3 mi E of El Centro on S side of Hwy 80 is a personal use fld and should not be used by trans pilots. (2-17)
EL CENTRO NAS: Avail. 0700 to 1800. Other hrs on 30 minutes prior notice. (2-24)
FAIRFIELD-SUISUN AFB-RADIO: USAF ILS being relctd to serve Rnwy 21L. Lclzr installed, not yet flgt-checked. Glide path transmitter will be installed soon. Bndry and middle mrkrs will be completed approx Apr 1. (3-23) FLD: 75' derrick 1 mi SSW, lgtd. (4-8)
★FRESNO AIR TERMINAL-RADIO: CAA twr now transmits on 278 kcs, 118.7 mcs. Grds 3105,4495,6210,3117.5 kcs, 118.7,122.5 mcs. Twr also equipped to transmit on and grd 121.9 mcs for mobile grnd traffic. Operates 0700 to 2300. FLD: Traffic pattern 800'.(2-25)
••FRESNO BCN SITE 20 LAZ-SFO: Discont. Mar. 30, 1948. (3-21)
HAMILTON AFB (SAN RAFAEL): Extension to Rnwy 12 closed except in emerg. (10-18)
INYOKERN NAF-RADIO: FM on S course of Navy rng temp inop. ident. will be changed to 3 dashes. (2-3)
JACKSON-AMADOR CO. ARPT: CLOSED (const). (1-22)
LONG BEACH ARPT: About Apr 20, compass lctr will be comm at middle mrkr site of CAA ILS. Freq. 254 kcs, ident. "B". (3-23)
LOS ALAMITOS NAS (LONG BEACH): Closed 1630 to 0800 except in emerg or by prior arrangement. (4-7)
★LOS ANGELES-RADIO: Apr 9, ident. of Castiac FM changed to 2 dots 4 dashes.
Apr. 9, Hollywood Hills low-powered FM comm 13.3 mi on NW course at lat 34-07-18, long. 118-24-24, ident. 4 dashes. Class: LFM.
LOS ANGELES ARPT: Unlgtd oil derricks on approach to Rnwy 34. E/W rnwy S side fld avail. taxiing only. All landings, take-offs and taxiing rstd to paved areas. Rnwy 4-22 closed. Rnwy 11-29 avail. for day and ngt take-offs and day landings only. Equip. on fld days. (2-20)
MARCH AFB (RIVERSIDE): Inten instrument flying training in AT-6 type acft days Mon thru Fri. (2-18)
MATHER AFB (SACRAMENTO): Use rnwys only-mat unserviceable. (2-6)
McCLELLAN AFB (SACRAMENTO): Rnwy 4-22 closed (parked acft)(2-26)
MERCED MUN ARPT: All lgts inop. (3-24)
MOFFETT FLD NAS-LTA-HTA (MOUNTAIN VIEW): Fld on positive control. Multi-engine acft above JRB class use Rnwy 14L-32R only, except in emerg. N connecting taxiway closed to all traffic. (6-17)
MOJAVE NAS: CLOSED to all acft except on off. govt bus. (3-22)
MONTAGUE-RADIO: Soon, teletype and weather reporting facs, voice transmitting fac on 116.1 mcs and receiving facs on 3105,4495,6210.3117.5 kcs, 116.1 mcs will be comm at Siskiyou Co. Arpt. Simultaneously rng, bdcast, rcvg and voice facs will be decomm at Mt. Shasta, Calif.
MONTEREY PENINSULA ARPT: Right traffic Rnwys 24, 28. (3-26)
★MT. SHASTA-RADIO: Apr 8, rng, bdcast, rcvg and voice facs discont. Teletype and weather reporting services will continue to operate.
MUROC AFB-RADIO: Multiples are present on USAF rng. (3-29) FLD: Lctd within a danger area. Closed to all trans acft except on written permission CG, Air Materiel Command Acft will not carry trans passengers to this fld. Ctc twr at least 25 mi. out during daylgt hrs for permission to continue to fld. (1-30)
OAKLAND ARPT-RADIO: About Apr 20, middle compass lctr will be comm at middle mrkr site of CAA ILS. Freq 242 kcs, ident. "B". FLD: 2-way rdo rqrd. Rnwy 6-24 avail lg t acft. only. Hvy acft use rnwys, taxi strips only. (2-20)
★ONTARIO INTERNATIONAL ARPT-RADIO: CI twr now operates 0900 to 1800. (3-31)
SACRAMENTO-SKY RANCH ARPT: Rnwy const. Land at own risk. (3-23)
••SALINAS ARPT: 202' obst lgtd twr rdo stn KDON erected 10.5 mi S (180° true) at lat 36-32-02, long. 121-37-10. (4-1)
SALTON SEA ARPT: Closed to all acft except by authorization fld mgr. (3-10)

[redacted]: SAN DIEGO-RADIO: Rng flgt-checked Apr 1, courses correctly aligned.
••SAN DIEGO: Circular Danger Area for dive bombing and rocket firing has been estab. approx. 12 mi NE having a radius of 3 mi centered at lat 32-55-05, long. 117-00-15. The area is being used during the hrs bet. 0830 to 1630 from the surface up to and including an alt of 15,000'.
SAN DIEGO-SPECIAL NOTICE: Pilots flying into lower Calif., Mex. must have Mexican Consular clearance into Mexico prior to flgt. Pilots not securing prior consular clearance will have their acft impounded upon landing in Mexico. For complete Mexico entry procedures see "Flight Information Manual".
SAN DIEGO-LINDBERGH FLD: Right traffic Rnwys 27,31. (1-29)
SAN DIEGO NAS: Traffic circle oval in shape with left turns at 800'. Landing will not be made without passing thru Point Love (black and orange checkered floating pyramid) unless directed by twr. Point Love is lctd 1-1/2 mi S of Hotel Del Coronado. Multi-engine acft land on hvy duty rnwys, single-engine acft on asphalt mat. Mntn at least 1500' over Coronado, Amphibious Base, traffic lanes at North Island.
★SAN FRANCISCO ARPT-RADIO: Back course of CAA ILS lclzr perm unusable. (4-5) Middle mrkr of CAA ILS now lctd 3500' E of E end Rnwy 28. (3-31) FLD: Turf area clsd. (3-10)
••SAN FRANCISCO-"Airspace Warning Areas" established over-water for Aerial Gunnery from sea level up to and including an altitude of 10,000' during hrs 0830 to 1630 Mon thru Fri. within the following described areas: (a) Beginning at lat 38-40, long 123-38, thence to lat 39-02-30, long. 124-33-30, thence to lat 38-29-30, long. 124-38, thence to lat 38-40, long. 123-38, point of beginning. (b) Beginning at lat 37-30, long. 122-44, thence to lat 37-15-30, long. 124, thence to lat 36-58, long. 123-50, thence to lat 37-30, long. 122-44, point of beginning. (c) Beginning at lat 36-53, long. 122-14-30, thence to lat 36-25, long. 123-04-30, thence to lat 36-04-45, long. 122-08, thence to lat 36-53, long. 122-14-30, point of beginning.
★SANTA BARBARA ARPT-RADIO: Apr 1, CAA twr operates 0600 to 2200 daily. FLD: No rng, ctc lgts Rnwys 3-21, 15-33. (4-1)
TRUCKEE INT: CLOSED (snow)(3-17)
VALLEY SPRINGS-MOTHER LODE ARPT: CLOSED (const)(3-8)
••VICTORVILLE: The following described Danger Area for aerial gunnery has been discont: Beginning at lat 34-46-30, long. 116-27-40, thence SE to lat 34-26, long. 116-13, thence S to lat 34-13, thence W to long. 116-18, thence NW to lat 34-25, long. 117-04-50, thence NE to lat 34-42-20, long. 116-47, thence counterclockwise around the arc of a circle with a 10 mi radius centered at lat 34-51, long. 116-47, to lat 34-46-30, long. 116-39, thence E to point of beginning.
VICTORVILLE AFB: Use only Rnwys 16L-34R, 7R-25L, 3R-21L. (2-12)

Acft inbound to Randolph AFB or operating in that vcnty under IFR ctc Randolph, Alamo, or San Antonio Rng Stn and adhere to instructions issued by San Antonio ATC. Acft outbound from Randolph AFB adhere to instructions issued thru Randolph Twr. (2-12)

SAN ANTONIO ARPT-ALAMO FLD-RADIO: About Apr 16, compass lctr will be comm at CAA ILS middle mrkr site. Freq 239 kcs, ident. "T". (4-7) FLD: Acft arriving after dark rqrd to have 2-way rdo. Svcg not avail. between midngt and daylgt without previous arrangements. Const on ramp and parking area in front of Hangars No. 1 and 2. Const: near taxi strip in front center bldg, mrkd. Const at approach end Rnwys 3, 35, lgtd ngts. (1-21)

•SAN ANTONIO-HARLEM AVIATION: New fld. lat. 29-23-00, long. 98-18-30. (2-4)

SAN ANTONIO-STINSON FLD: Right traffic Rnwys 9, 14, 17, 22. Traffic 600' above terrain 1167' MSL. Acft entering Stinson Fld control zone after dark shall be equipped with 2-way rdo. (2-20)

SAN MARCOS AFB-RADIO: USAF rng unreliable. (3-4) FLD: Helicopter and liaison pilot training. (2-3)

★SIERRA BLANCA-RADIO: Apr 10, name of visual-aural rng changed to Van Horn.

TYLER-POUNDS FLD: Use rnwys only. (2-9)

★VAN HORN-RADIO: Visual-aural rng formerly carried under Sierra Blanca. Fac designation changed Apr 10.

WICHITA FALLS ARPT: N/S rnwy W side fld closed to acft over 450 HP. (3-22)

[redacted]: BOUNTIFUL-SKY HAVEN ARPT: NW/SE rnwy closed. (1-4)

BRYCE CANYON INT FLD: CLOSED (snow). (2-20)

DELTA ARPT: NW/SE rnwy lgts inop. Trans acft use rnwys, taxi strips only. (4-5)

ENTERPRISE-RADIO: About May 10, rdo rcvg facs and voice communs on all freqs will be discont for relctn of control quarters. About May 25, service will be resumed at Cedar City, Utah. (4-12)

MILFORD ARPT: Unlgtd bldgs SE corner S of and adj to bcn twr. Three 25' poles E side N of new const. Use only center of rnwys, taxi strips. (2-21)

★OGDEN-RADIO: Apr 1, VHF omni rng placed in oper on unmonitored test basis. Freq 113.1 mcs, ident "OGD". Stn lctn: lat 41-13-16, long 112-06-27. Bear. and dist, stn to Ogden Arpt: 97°, 4.3 mi. Elev 4222' Var 17° E. Class: VORW. Fac not flgt-checked.

★OGDEN ARPT-RADIO: Cl twr now operates 0600 to 2200M daily. (3-31)

PROVO ARPT: Farming equip. on non-landing areas intermittently. (4-5)

ST. GEORGE INT. FLD: Bndry lgts comm Mar 9 on test basis. (3-10)

SALT LAKE CITY-RADIO: Auto. rng monitor. sys on N course temp inop. Temp remote monitor. sys which provides cont aural and visual monitor. at control stn recomm on N course. Warning signal not avail. (3-22)

SALT LAKE CITY ARPT NO. 1-RADIO: About Apr 20, middle compass lctr will be comm at middle mrkr site of CAA ILS. Freq 201 kcs, ident "L". (3-23) FLD: Use only rnwys, taxi strips when wet-shoulders soft. Right traffic when winds from S, SE, E. Prevailing wind rnwy lgts operate ngts. (2-22)

SALT LAKE CITY ARPT NO. 2: Use rnwys, taxiways only-shoulders rough. (3-23)

WENDOVER: Grnd firing to 45,000' 60 mi E, in Low Flgt Strip area 0800 to 1800.

[redacted]: BURLINGTON ARPT: Vermont NG P-47's use NW/SE rnwy only. Use rnwys only lgt acft taxi on sod to taxi strips. Parked acft N side E/W taxi strip. (2-20)

NEWPORT ARPT: NNW/SSE rnwy badly cracked and frost heaves in rnwy pavement just S of stub taxiway. (4-6)

[redacted]: ALEXANDRIA ARPT: Lgts prior req. (3-25)

••ALEXANDRIA-WASHINGTON-VIRGINIA ARPT: lat. 38-50-30, long. 77-07-00. (3-25)

BLACKSTONE-RADIO: At intermittent periods, reception on high freqs unreliable (hvy lcl interference). (3-25)

BLACKSTONE AAF: E/W rnwy lgts inop. Avoid SE side NE/SW rnwy-bulges, rough. (3-25)

CHINCOTEAGUE NAAS: Closed 1700 to 0800 except on req with 2 hrs notice. Bcn operates ngts except during local ngt flying with VFR conditions. Bcn turned on during ngt flying in emerg or on req. IFR flgt plans accepted only 0800 to 1630 Mon thru Fri except on holidays and on 2 hrs notice. Lgts being repaired-unreliable. Use rnwys, taxi strips only soft shoulders and trenches along sides of rnwys and taxi strips. Pilotless rdo-controlled acft oper days Mon thru Fri. Other acft in vcnty proceed with ctn. Equip. on fld. Red rot. bcn operates when fld closed. It also is turned on when fld under positive control for oper of rdo-controlled acft, target tows and similar hazardous opers. Acft in vcnty proceed with ctn. (3-13)

[redacted]: DAHLGREN NAF PROVING GROUNDS: Except in emerg or on req (with 2 hrs notice) fld open only 0730 to 1615 Mon thru Fri inclusive. Off. flgts must be cleared thru one of the following: NAS Anacostia, D. C.; NAS Patuxent River, Md.; NAS Norfolk, Va.; NAS Quonset Point, R.I.; Cape May CGAS, N. J.; Inyokern NAF, Calif.; NAF Torpedo Stn, Newport, R.I.; Naval Acft Factory, Philadelphia, Pa.; Cherry Point MCAS, N. C.; Quantico, MCAS, Va.; AAF Proving Grnds, Eglin AFB, Valparaiso Fla.; Langley AFB, Hampton, Va.; Wright AFB, Dayton, Ohio; Aberdeen Proving Grnd, Aberdeen, Md.; Lakehurst NAS, N. J. Fld lgts inop.

HAMPTON-PENINSULA ARPT: Right traffic for take-offs and landings to SW (Newport News). (3-24)

LANGLEY AFB (HAMPTON)-RADIO: USAF rng operating for homing only. (3-2) Stn lctn mrkr inop. (3-9) FLD: Rnwy 2-20 closed. Rnwy 12-30 closed to all 4-engine acft. (2-19)

LYNCHBURG-PRESTON GLENN ARPT: Use rnwys when wet. (2-25)

★NORFOLK ARPT-RADIO: CAA ILS lclar and glide path units operating intermittently for TEST purposes only, disregard spurious signals. Lclar freq 109.9 mcs. Glide path freq 333.8 mcs. (4-2)

NORFOLK-NAS-EAST FLD: Pilots inbound IFR to NAS Norfolk from any direction other than via Green 6 obtain specific ATC instructions for flight within Norfolk Control Area (25 mi radius) prior to entering this area. The aforementioned specific ATC instructions may be obtained from Chincoteague Rdo or Twr (0700-2400), Patuxent Rdo or Twr, Richmond Rdo, Weeksville Rdo (0700-1900), Elizabeth City Coast Guard Twr (0700-1900) Langley Rdo or Twr, Navy Norfolk Rdo or Twr, Norfolk Rdo or Twr. Tetrahedron lgtd but uncontrollable. (3-18)

OCEANA NAAS: Facs avail. 0800 to 1630 Mon thru Fri. Ltd facs 1630 to sunset Mon thru Fri, 0800 to sunset Sat, Sun and holidays for essential mil flgts only. After sunset emerg landings only. Lgts under const-unreliable. Soft shoulders and trenches along sides of rnwys, taxi strips. Equip. on fld. (9-30)

RICHMOND: Elko Aux Fld 5 mi E of Byrd Fld is similar in design and layout to Byrd Fld, BUT RUNWAYS ARE UNSUITABLE FOR LANDING BY ACFT OF ANY TYPE. Care should be taken not to confuse the two flds.

RICHMOND-BYRD FLD-RADIO: Middle and outer mrkrs of CAA ILS temp inop (relctn), concurrently with this relctn compass lctrs will be installed. Lclar will remain in oper. (3-21)

RICHMOND-HERMITAGE ARPT: Right traffic on S and SW take-offs and landings. (1-19)

RICHMOND-PARNELL ARPT: Const S end N/S strip, mrkd. NNW/SSE rnwy unusable, soft. (4-5)

••ROANOKE-WOODRUM FLD: 420' obst lgtd twr rdo stn WDBJ/FM erected 14 mi SW (211° true) at lat. 37-09-00, long. 80-05-46. (3-24) Following flashing bcns placed in oper around Woodrum Fld:

ROCK SPRINGS MUN ARPT: 100' of snow fence 4-1/2' high const 100' W of glide path bldg. Fence runs in a N/S line. N end of fence 350' S of centerline of E/W rnwy. (1-22)
★SHERIDAN-RADIO: Ident of VHF rng: "SHR". (4-7)
SHERIDAN CO. ARPT: N/S rnwy unsafe hvy acft. Taxi strips parallel all rnwys except N/S rnwy and terminate at ramp. Equip. on fld intermittently. (2-23)
TEAPOT ROCK BCN SITE 190 CYS-GTF: To be discont. (4-9)

WESTERN NOTAM CHART

NOTAM CHARTS

THESE NOTAM CHARTS INDICATE:

(a) NEW RADIO NAVIGATIONAL AIDS, BY AN X[1]

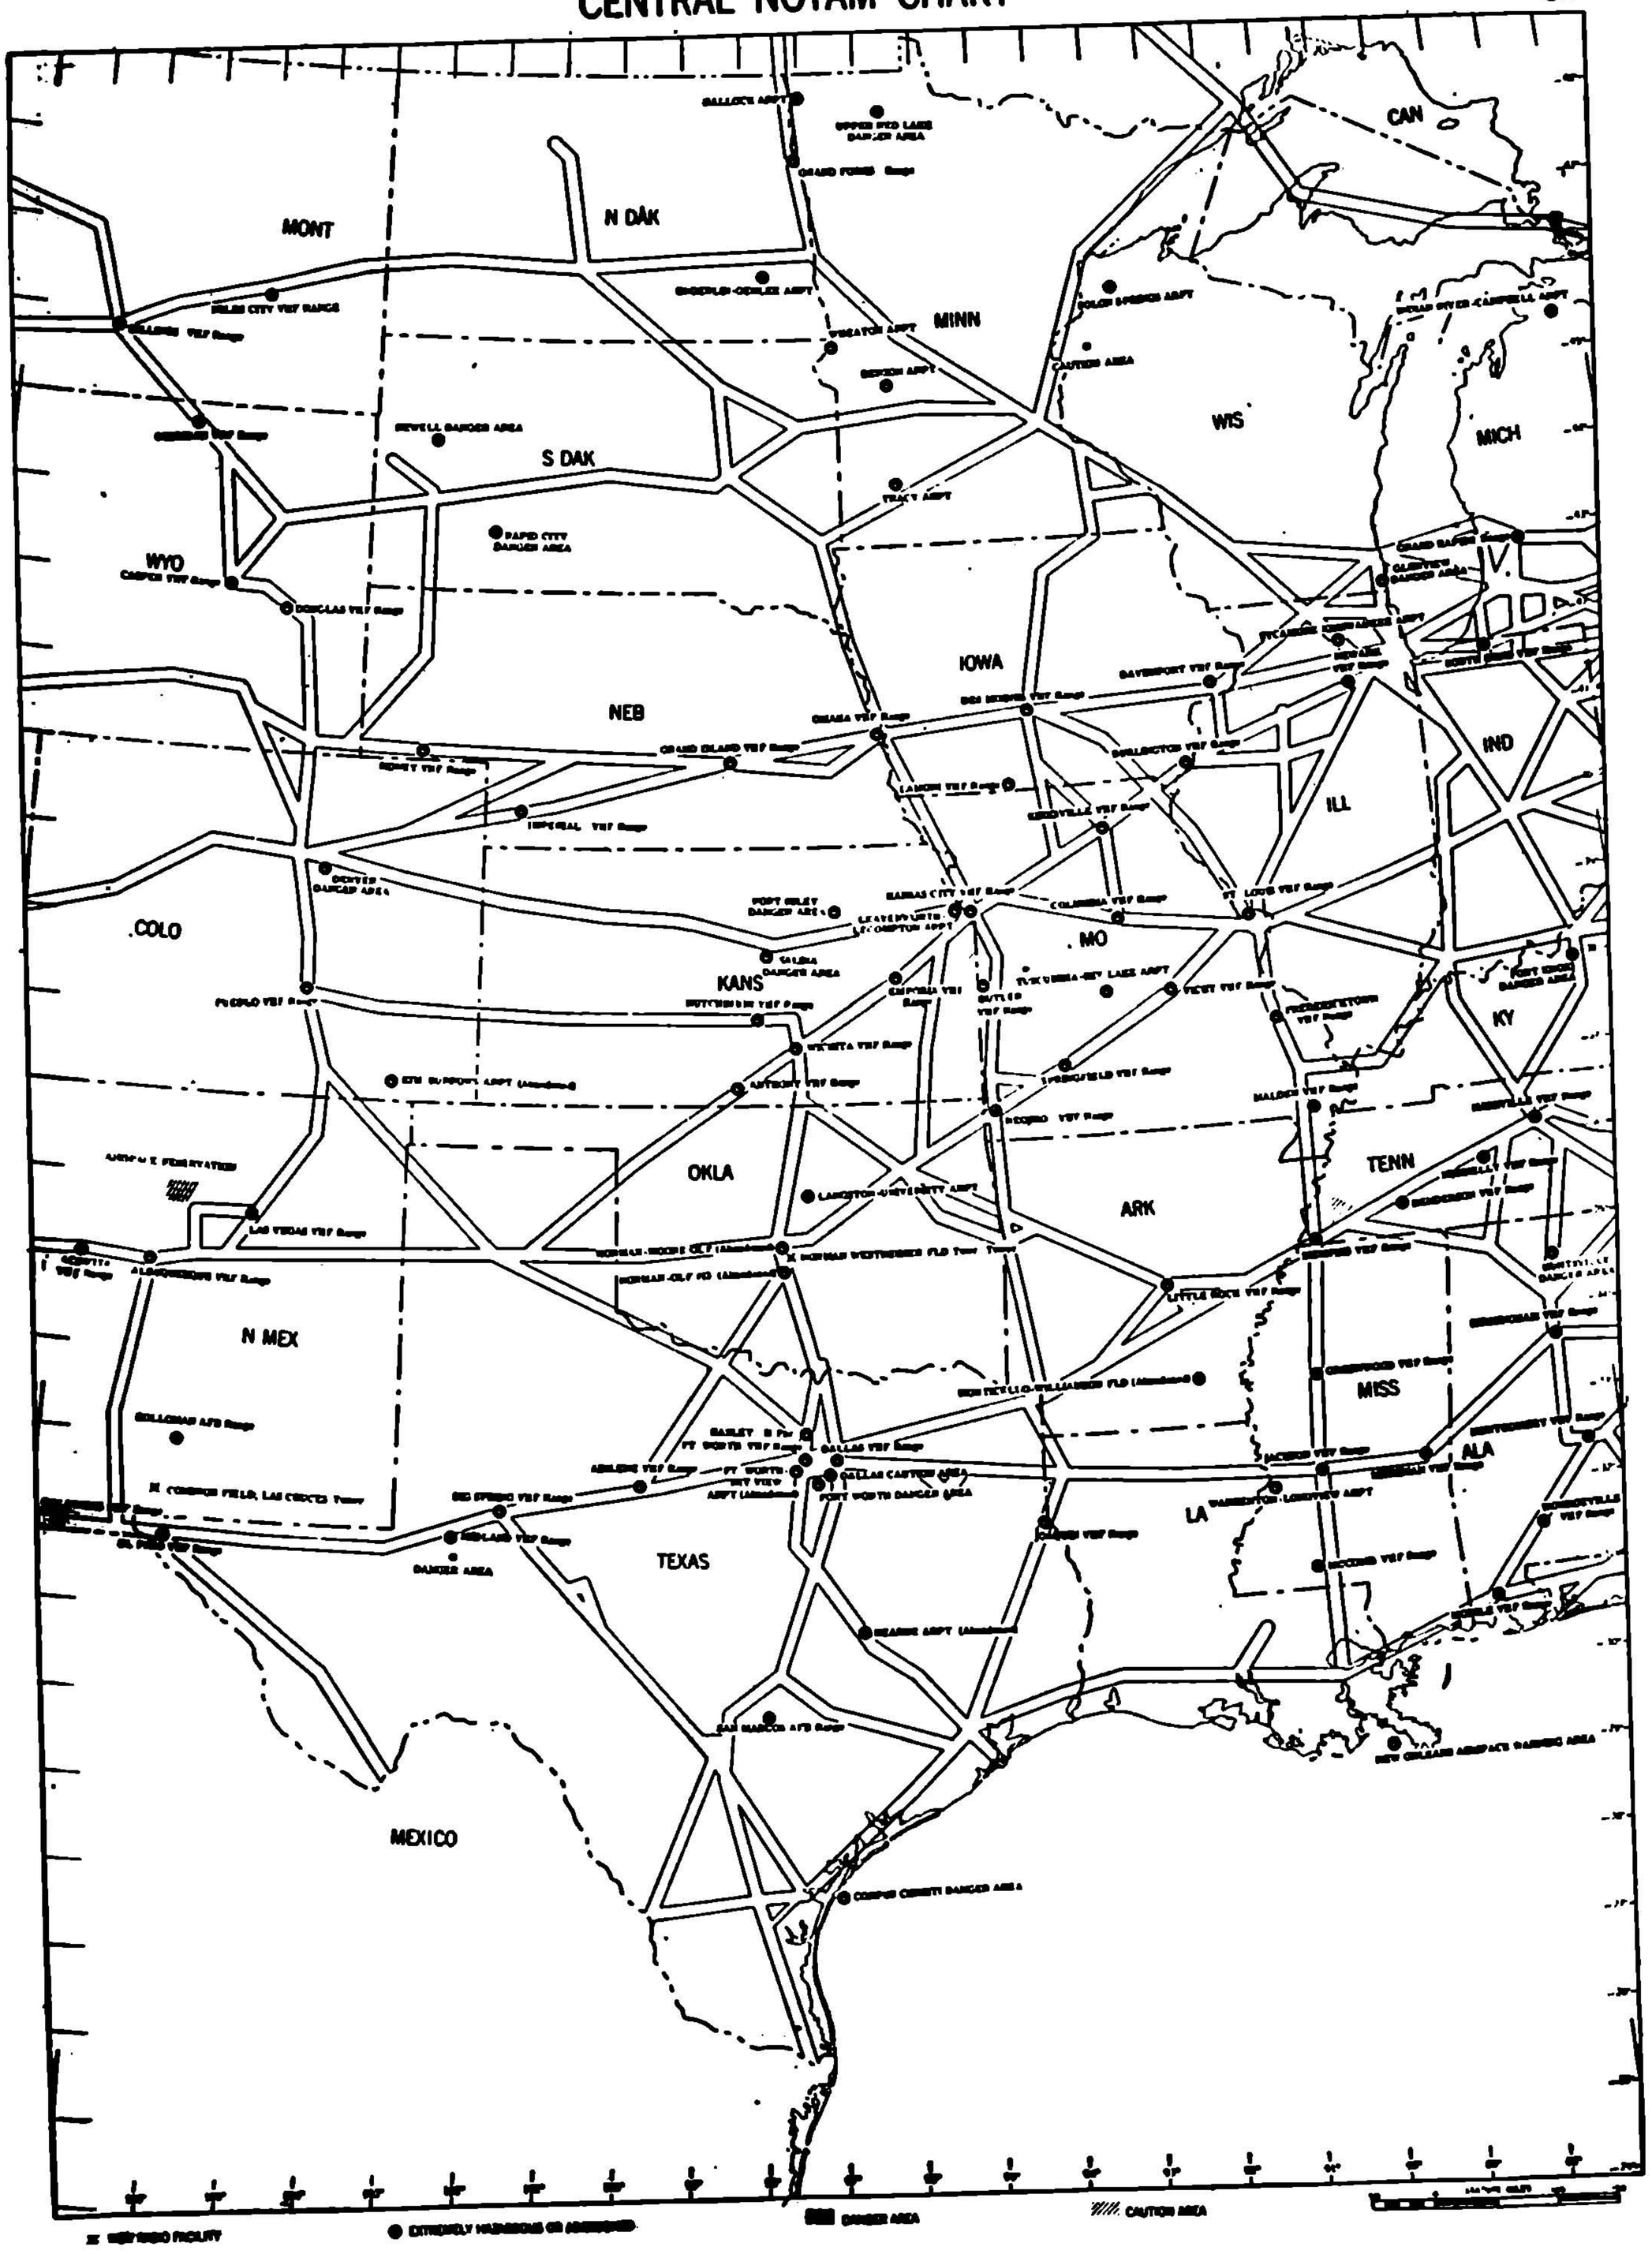
(b) NEW DANGER OR CAUTION AREAS

(c) ABANDONED AIRPORTS, BY AN (R)[1]

(d) DISCONTINUED RADIO NAVIGATIONAL AIDS, BY AN (R)[1]

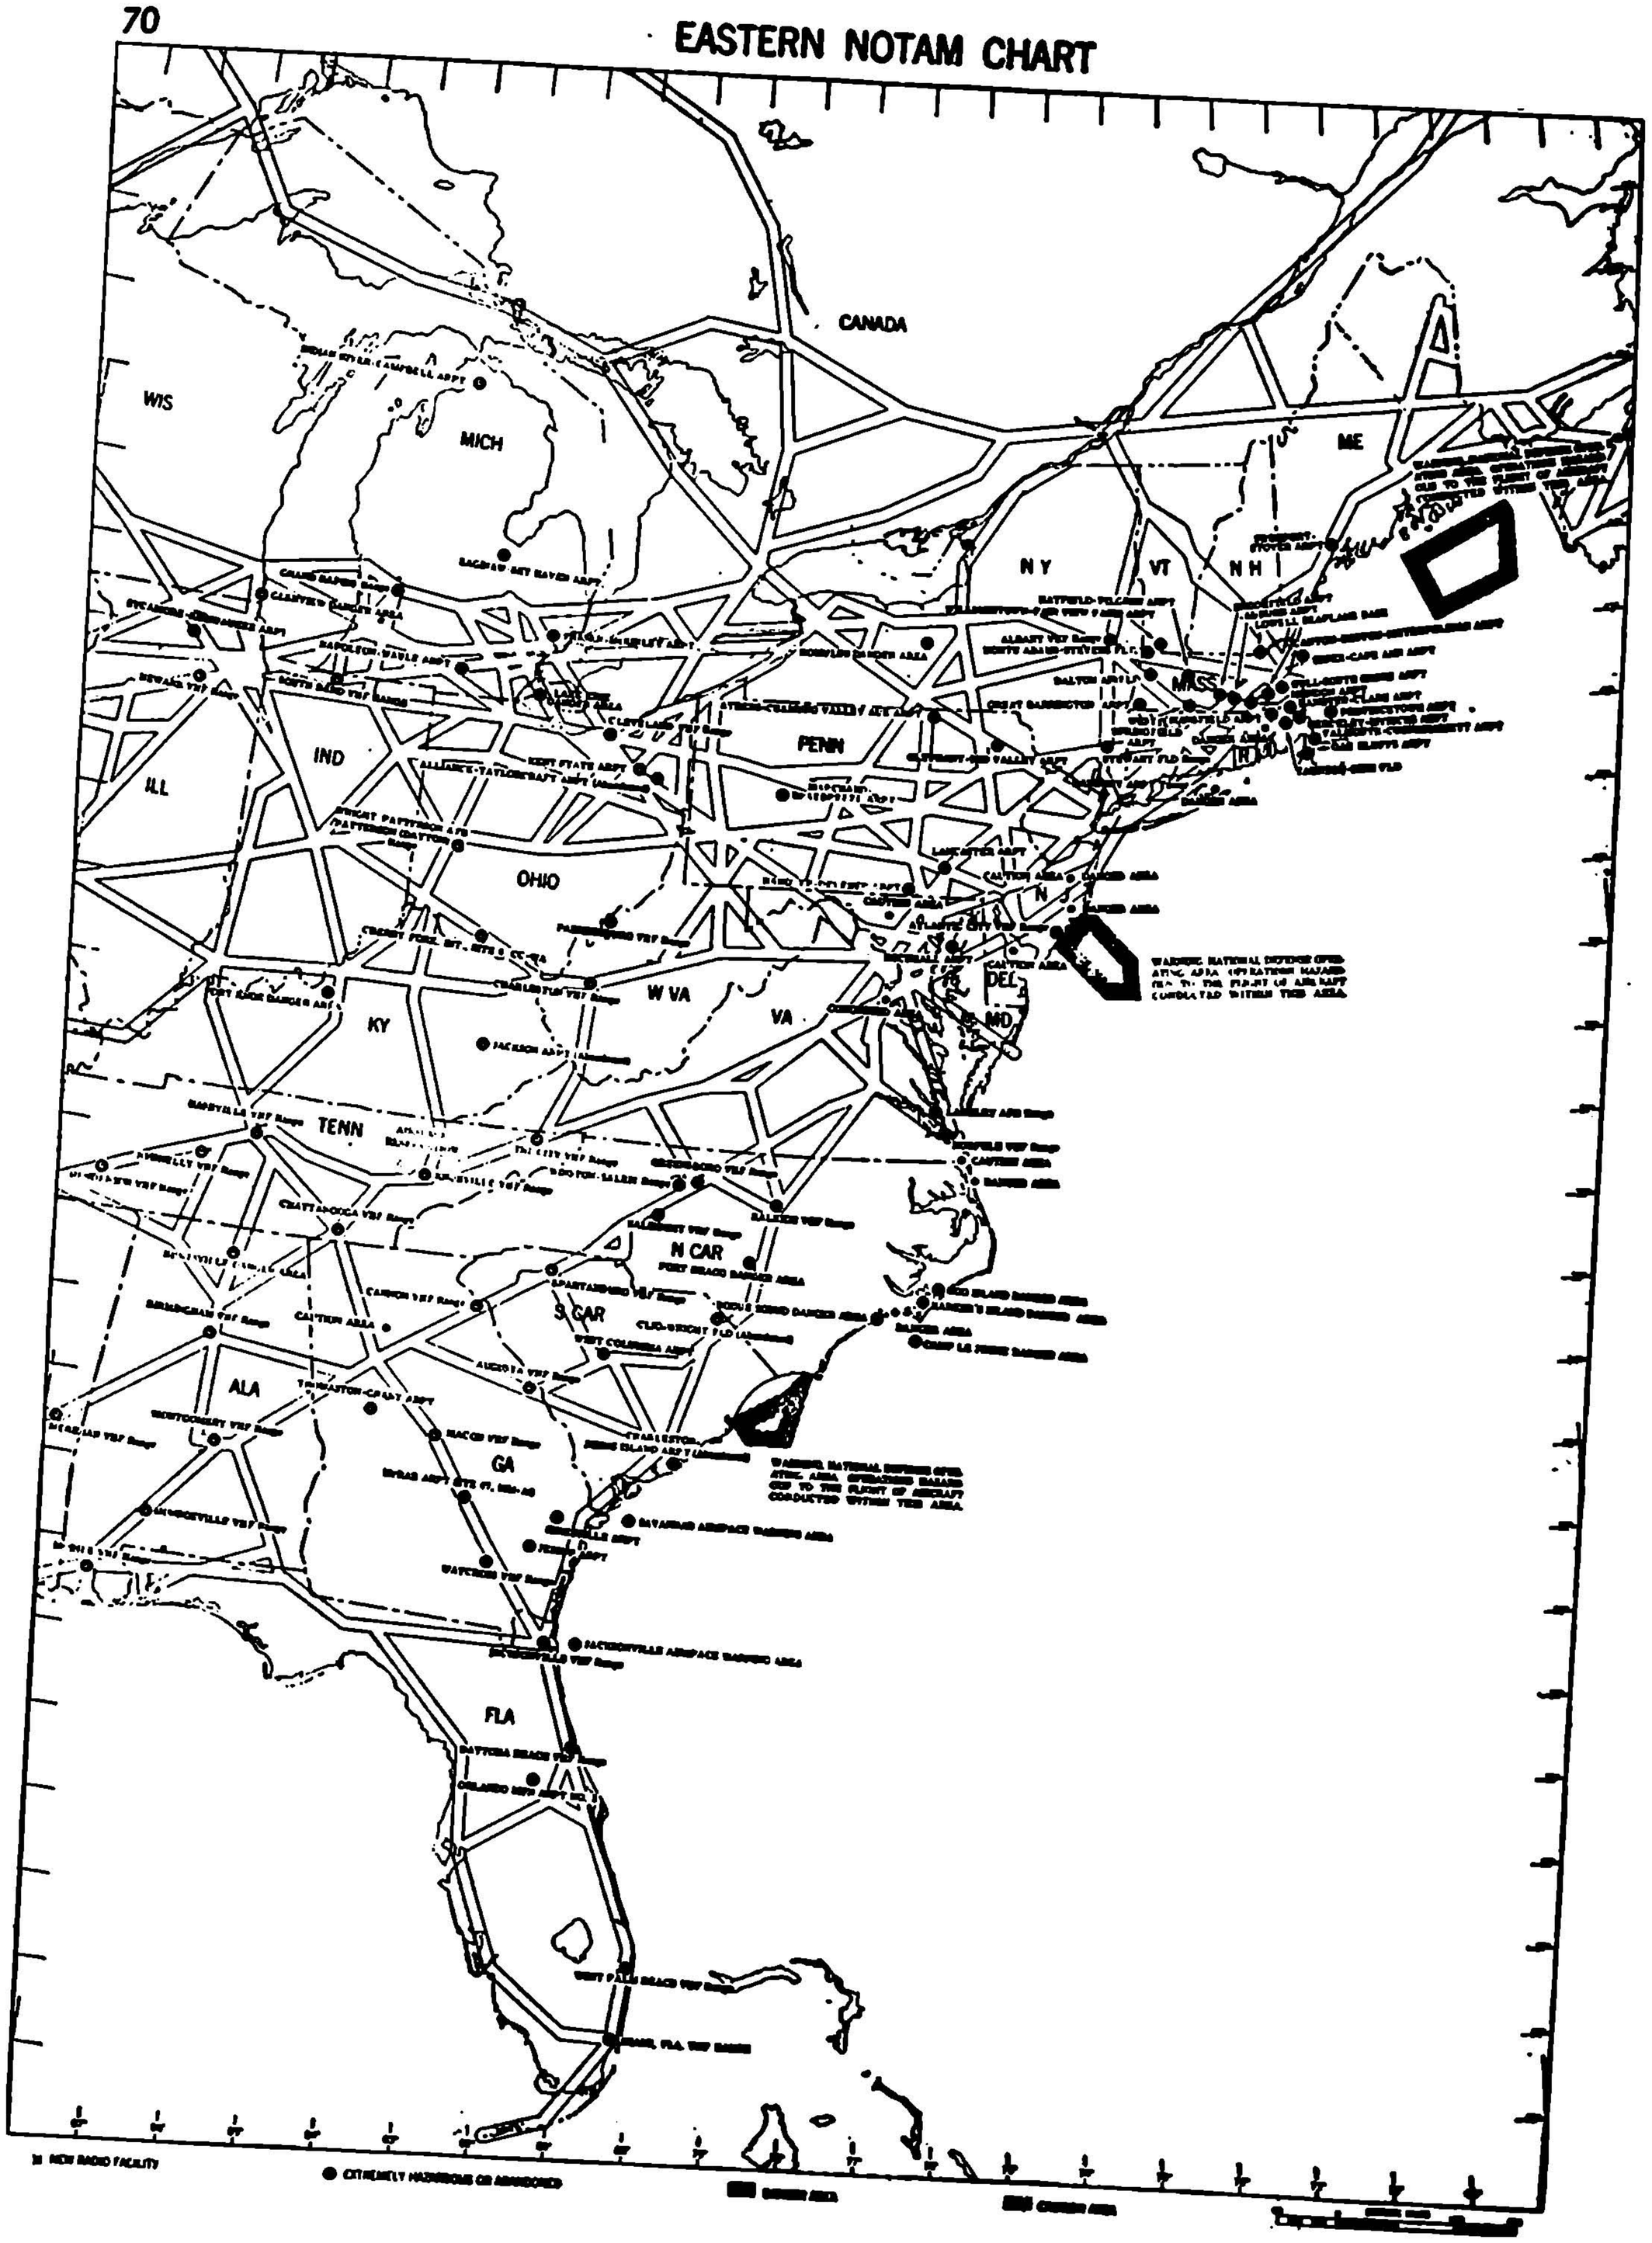
(e) AIRPORTS OR RADIO NAVIGATIONAL AIDS TEMPORARILY UNUSABLE OR USABLE ONLY WITH EXTREME CAUTION (OR AIDS AFFECTED BY A CHANGE OF FREQUENCY, IDENTIFICATION, QUADRANTS, OR RANGE COURSES). BY AN (R)[2]

ONLY DANGER AND CAUTION AREAS AND (R) SYMBOLED FACILITIES, HOWEVER, ARE CUMULATIVE IN NATURE, FOR EXAMPLE, A NEW DANGER OR CAUTION AREA IS SPOTTED UNTIL IT IS INDICATED ON THE NEXT REVISION OF THE PERTINENT SECTIONAL CHART.



NOTAMS REFERRED TO BY THE (R) SYMBOL WILL BE FOUND IN EITHER THE "NOTICE TO AIRMEN" SECTION OR THE "REMARKS" COLUMN OF THE "DIRECTORY OF AIRPORTS" SECTION.

[1] NEW NAVIGATIONAL AIDS OR ABANDONED AIRPORTS AND AIDS ARE INDICATED IN ONLY ONE ISSUE



[2] UNUSABLE AIRPORTS AND AIDS OR AIRPORTS AND AIDS USABLE ONLY WITH EXTREME CAUTION ARE INDICATED AS LONG AS THE HAZARDOUS CONDITIONS REMAIN IN EFFECT. VOR OR VAR RANGES ON-TEST BASIS AND NOT TO BE USED FOR NAVIGATION ARE INCLUDED IN THE FREQUENCY AND IDENTIFICATION TABULATION ON PAGE VI AND PREFIXED BY AN ASTERISK.

U. S. DEPARTMENT OF COMMERCE
CIVIL AERONAUTICS ADMINISTRATION
OFFICE OF AVIATION INFORMATION

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO CIVIL PILOTS AS WELL AS ARMY AND NAVY. All GCA facilities (Air Force, Navy, or CAA) are available to any plane in emergency. To secure GCA assistance, pilots should first call the associated control tower.

In addition to the working frequencies listed below, Air Force and Navy GCA emergency VHF transmissions are made on 140.58 mcs. Simplex service on 3117.5 kcs will be provided at all Air Force and Navy installations to provide an alternate means of communications for scheduled air carrier aircraft. Army towers will relay GCA instructions on 200-400 kcs band to civil aircraft not equipped to receive VHF or HF. Most Navy and CAA GCA units can transmit instructions directly on tower low frequency. Those installations not suffixed by an (&) can transmit instructions directly on tower low frequency.

A minimum of 30 minutes will generally be required to assemble a GCA crew and prepare the equipment for operation AFTER an alert has been received at those locations not providing continuous service. CAA GCA units, however, operate continuously. Pilots desirous of making practice GCA approaches should make their own arrangements with the tower concerned.

N.B. AF and Navy facilities are available to civil aircraft in emergency or by prior arrangement with the C.O. of the respective AFB, NAS or MCAS. Civil minimums are 400' ceiling and 1 mile visibility except in emergency

N.B. It must be remembered that practically all VHF omni-directional ranges (VOR) have not yet been formally commissioned and a great number of the VHF visual-aural ranges (VAR) are in the same status, being on test basis and not to be used for navigation. These on-test basis VHF ranges are indicated by a prefixed asterisk (*) in the above tabulation.

(4-27-46)

* = Test basis-not to be used for navigation. + = voice on 111.1 and 116.1 mcs. - = voice on 111.1 mcs but not on 116.1 mcs. (U) Unmonitored, but usable for navigation.

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(When city and airport names are identical, the airport name is omitted in the interest of space-conservation)

(A) Airport name* (with A in Type column) - Owned or leased totally by U.S. Air Force
(N) " (with N in Type column) - Owned or leased totally by Navy
(CG) " (with CG in Type column) - Owned or leased totally by Coast Guard
(NG) " (with NG in Type column) - Owned or leased totally by National Guard

(A) Airport name - Open to civilians but owned or leased wholly or in part by U.S. Air Force, Air Reserve, U.S. Air Force servicing detachment or contract gas usually available.
(N) " - Open to civilians but owned or leased wholly or in part by Navy
(CG) " - Open to civilians but owned or leased wholly or in part by Coast Guard.
(NG) " - Open to civilians but owned or leased wholly or in part by Army or State Government for Air National Guard. Limited servicing and maintenance for transient military aircraft.
(P) " - Civil airport open to military aircraft. (See Note 2).
* " - C.A.A. Intermediate Field.

* Air Force and Navy fields are listed alphabetically by airport name followed by city name in parenthesis.

N.B. ALL AIRPORTS EXCEPT THOSE CITED WITH AN "A" or an "N" IN THE TYPE COLUMN ARE OPEN TO CIVIL FLIERS. AIRPORTS WITH NO PREFIX ARE EXCLUSIVELY CIVIL AIRPORTS.

TYPE

A	- U.S. Air Force	I	- Intermediate	NG	- National Guard
C	- Commercial	M	- Municipal		
CG	- Coast Guard	N	- Navy	P	- Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified.

CLASS

(See Level Runway and Strip Requirements)

Class	Strip Length	Runway (Paved) Length
8-1	Less than 1800'	Less than 1800'
1	1800-2699'	1800-2499'
2	2700-3699'	2500-3499'
3	3700-4699'	3500-4499'
4	4700-5699'	4500-5499'
5	5700-6699'	5500-6499'
6	6700-7699'	6500-7499'
7	7700-8699'	7500-8499'
8	8700-9699'	8500-9499'
9	9700' +	9500' +

N.B. Length (of longest runway) minus one-quarter of airport elevation equals effective sea level length.

RUNWAYS

In "longest" column is stated length of longest landing area in hundreds of feet.

"h" indicates landing area is hard-surfaced or paved.
"aw" indicates allway field.

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

FACILITIES AND SERVICING

RADIO

R1: Control tower voice
R2: Range (or H facility) with voice
R3: Range (or H facility) and tower
R4: Range (or H facility), tower, and ILS

LIGHTS

L : Incomplete lighting, such as flood or strip lights, which are generally available only on prior request
L1: Beacon only
L2: Beacon and boundary
L3: Beacon, boundary, and obstruction
L4: Beacon, boundary, obstruction, and flood
L5: Beacon, boundary, obstruction, flood, and runway contact
(L5): Identical to L5 except that runway contact lights are high intensity
L6: Beacon, boundary, obstruction, flood, runway contact, and instrument approach
(L6): Identical to L6 except that instrument approach lights are high intensity

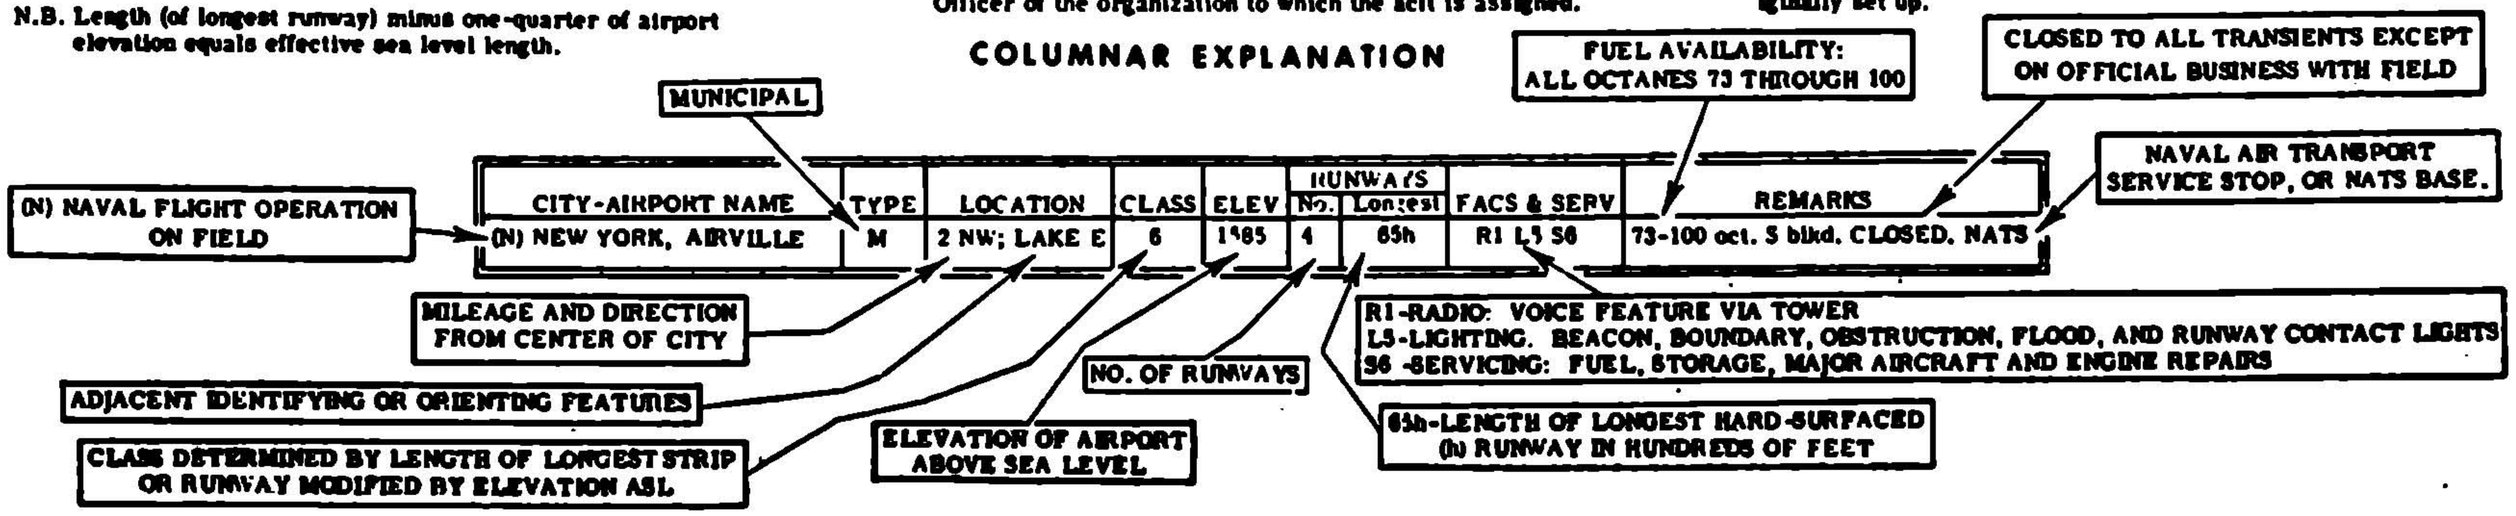
(The class always indicates the highest element available but does not necessarily include all intermediate elements)

SERVICING

(Any S combination in parenthesis indicates only part time or irregular attendant)

S1: Fuel
S2: Fuel, storage
S3: Fuel, storage, minor aircraft repairs
S4: Fuel, storage, minor aircraft, and minor engine repairs
S5: Fuel, storage, major aircraft, and minor engine repairs
S6: Fuel, storage, major aircraft, and major engine repairs

REMARKS



(a) "91 oct." indicates fuel octanes available. "AF", or "Navy", preceding octane indicates USAF or Navy contract fuel available.
(b) "CLOSED" indicates closed to all civil aircraft and all transient military aircraft except on official business with written orders this station or in emergency. "CLOSED MIL" and "CLOSED NAVY" on civil fields indicate same restrictions as above are applicable to armed services.
(c) "Port. B-2 lgts" indicates cone-mounted lights outlining runways These lights are portable and may be shifted from runway to runway, or strips.
(d) "INACT-NO FACS." indicates USAF and/ or Navy airfields used either exclusively by them or municipal airfields used jointly by them and civil interests at which both the USAF and/ or the Navy and the civil interests are inactive. Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the organization to which the acft is assigned.
(e) "USAF and NAVY INACT. CIVIL FACS." indicates municipal airfields used jointly by the USAF and/ or Navy and civil interests at which the USAF, or Navy facilities are inactive but civil facilities are available. Such fields may be used by military aircraft, however, only commercial service is avail.
(f) OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, clearly discernible for contact operations, are frequently omitted, for example. On the other hand, all pole lines within at least a 15-1 glide angle are indicated.
(g) "Fld lights on prior req." indicates field lights are available only by previous phone call, telegram, or letter. It must be remembered that most fields do not have 24-hour operation. Accordingly the field lights, indicated for such a lighted field, (and in some instances, even the rotating beacons) are available only by prior request. When an airport classification indicates a lighted field, and there is no notation in the REMARKS column, the field lights burn all night or will be turned on when a radio request is made or a plane circles the field.
(h) "FEE" indicates landing charges for revenue producing aircraft.

NOTES

1. ← Notam data revising previous issues.
2. "(P)" in City and Airport Name column indicates: (1) those municipal airports improved with public funds and covered by an agreement between the municipality and the U.S. Government permitting government planes to use such fields in common with others and without charge, to the extent possible without restriction of non-military operations, or (2) other civil airports for which legal permits covering their limited use by military aircraft have been procured and filed with the real estate agency of the Department of the Army.
3. "*Effingham, 10, L5-H" in City and Airport Name column indicates that the airport is Effingham CAA Intermediate Field, Site 10 on the St. Louis-Indianapolis Airway. Municipal airports where the lights are maintained by the C.A.A. are listed similarly except that there is no prefixed star.
4. AIRLINE STOP airport names are capitalized.
5. PRIVATE AIRPORTS are available for owner only, and not to be used by others except in emergency. Since no servicing is available for transients no "S" combination is ever assigned these fields.
6. "BLKD" indicates approaches where glide angle to runway is 3:1 or less.
7. "(Formerly Air Force)" or "(Formerly Navy)": These former Air Force and Navy fields are in the process of being disposed of by the War Assets Administration and Farm Credit Administration. Their type is difficult of determination currently and they should be used with caution as some, unable to be disposed of as airport property, are being diverted to agricultural purposes.

** At the end of each state, under the heading of NEW AIRPORTS, will be found, out of alphabetical alignment, all the new airports tabulated after the type for that page had been originally set up.

AIR FORCES SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to Commanding General, Air Transport Command, Attention: Flight Operations Division, A-3. Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over 10 days should be forwarded to the same address for submittal to Chief of Staff, USAF, as required. Restrictions in Air National Guard Fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. That Bureau will forward approved restrictions to the above address for publishing. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration.

In connection with the above the attention of all base operations officers is invited to AF Regulation 55-12 of February 20, 1948, subject, "Notices to Airmen", and to AF Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of AF Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant with itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of AF Regulation 60-8 of August 28, 1947, U.S.A.F. aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated: AFRICA & AZORES - Brookley AFB, Ala., MacDill AFB, Fla., Washington National Airport, D.C., or Westover AFB, Mass. ALASKA - McChord AFB, Wash., or Great Falls AFB, Mont. BERMUDA - Mitchel AFB, N.Y., Brookley AFB, Ala., MacDill AFB, Fla., Washington National Airport, D.C., or Westover AFB, Mass., or Fairfield-Suisun AFB, Calif. CANADA - Great Falls AFB, Mont., Brookley AFB, Ala., McChord AFB, Wash., Washington National Airport, D.C., Selfridge AFB, Mich., or Westover AFB, Mass. CANAL ZONE, CENTRAL AMERICA, MEXICO, & SOUTH AMERICA - March AFB, Calif., MacDill AFB, Fla., Kelly AFB, Tex., or Brookley AFB, Ala. CARIBBEAN - Brookley AFB, Ala., Kelly AFB, Tex., or MacDill AFB, Fla. ENGLAND, GREENLAND, ICELAND, & NORTH IRELAND Washington National Airport, D.C., or Westover AFB, Mass. NOVA SCOTIA & NEWFOUNDLAND - Washington National Airport, D.C., Westover AFB, Mass., Selfridge AFB, Mich., or Brookley AFB, Ala. HAWAII - Fairfield-Suisun AFB, Calif. EUROPEAN THEATER - Brookley AFB, Ala., MacDill AFB, Fla., Washington National Airport, D.C., or Westover AFB, Mass.

V.H.F. CHANNEL ASSIGNMENTS: Following are USAF assignments:

CHANNEL	AF FREQUENCY	CHANNEL	AF FREQUENCY
A	116.1	H	134.10
B	126.18	U	108.3
C	137.88	V	108.7
D	140.58	W	109.1
G	137.70		

MINIMUM SAFE ALTITUDES ON AIRWAYS: Under USAF Regulation 60-16 and policy of USAF, minimum safe altitudes for flight along airways will be identical to those established by the Civil Aeronautics Administration. Action is being taken to amend pertinent USAF flight information publications to show these minimums.

✓ Indicates new or revised Special Notices

IFR CLEARANCE MINIMUMS FOR CIVIL FIELDS: For IFR clearance to civil fields when minimum altitude over field is not shown on let-down chart contained in T.O. 08-15-3, or Pilots Handbook, USAF policy states that the "REGULAR - DAY" minimum as shown in CAA Flight Information Manual will apply. Necessary action is being taken to amend all charts to show the proper minimums.

OFFICIAL AIR FORCE FIELD DESIGNATIONS: The offical names and designations of Air Force Fields have been changed to new designations by the Department of the Air Force General Orders No. 2 of January 13, 1948. The abbreviation "AF Aux." stands for Air Force Auxiliary Field and the abbreviation "AFB" is for Air Force Base.

POLICY ON CONTROL TOWER PROCEDURE: Base Commanding Officers at bases where the tower is operated by CAA will discontinue requesting the tower to determine the highest rank aboard incoming aircraft. This action is taken in an attempt to curtail the congested communications situation and at the request of CAA. In case of VIP, the desired information will be transmitted from point of departure to destination in the flight plan.

UNAUTHORIZED USE OF VHF EMERGENCY FREQUENCY (140.58 MCS): The attention of all operations officers and pilots is invited to AF Letter 100-31, of January 13, 1948, subject, "Unauthorized Use of VHF Emergency Frequency (140.58 mcs.)".

✓ CORRECTIONS FOR AND ADDITIONS TO USAF T.O. 08-15-1: (1) Correct page 84, by showing gnd/air station frequency of 2890 kcs, avail. on req. at Bolling Field.

(2) Correct pages 86,87, by showing Castle AFB, GCA on operational status; Kelly AFB, Tex. freqs of 3105,6210,4495 kcs. as receiving rather than transmitting; and hours of operation 0700-1700 Mon. thru Fri.

(3) Correct page 90, as follows: Williamston, N.C. class: VARW; Grand Junction, ident.: GJT; Dyersburg, Tenn., class: BVAR; Phoenix, Ariz. class: VAR.

(4) Correct data on the following facilities as follows: Lincoln, Nebr. remarks changed to: NG 0800-1630; McGuire AFB (Ft.Dix), N.J. (Formerly Ft. Dix AAB) add (A) after name; Stewart (Newburgh), N.Y., Fuel: ABCJ; Douglas (Charlotte), N.C. Elevation: 748'; Springfield, (Mun.), Ohio, add remarks: Lgts prior req.; Delete second listing for Wright-Patterson AFB/Patterson (Dayton) and list Wright Patterson AFB/Wright (Dayton). Elev.: 830'. Remarks: Closed to all trans. acft.; Reading, Pa. Fuel: A---; Gregg Co. (Longview), Tex., class: P52-L5-S6; Pampa AF Aux. No. 2 (Texas) correct spelling.

(5) Correct chart 23, Boston, by showing minimum altitude between Peabody FM and Chester intxn on Blue 4, as follows: 1500' and Chester intxn to Concord as 2000'.

(6) Correct McChord AFB listing of McChord-Anchorage Air Route freqs to show 6523 kcs rather than 6253.

(7) Correct page 22, by showing control tower at Danbury Arpt, Conn., transmitting on 278 kcs. guarding 3105 kcs, and operating daylight hours.

(8) Correct page 26, by deleting frequencies of A (1) and 118.1 from Toronto (DeHavilland).

(9) Correct page 43, by showing on-request reporting point at intxn of W course of Chanute, Kans., and NE course of Wichita, Kans. radio ranges as "Cassoday". Show name of reporting point at intxn of S course of Hutchinson LF and SW course of Wichita LF radio ranges as "Danville". Show name of reporting point at intersection of SE course of Kansas City and E course of Olathe LF radio ranges as "Belton".

(10) Correct page 46, by showing ident. for Enterprise as ENP; ident. for Indio as IDO.

(11) Correct page 48, by showing distance, Fairfield-Suisun station to field as 4.5; Control tower at Hammer Field, Fresno, Calif. transmits on 278 kcs., guarding 3105,4495, 3117.5, 6210 kcs, and operating 0700-2300; Identification of Newark FMHW is NKC; Ident. of Evergreen FMHW is EVG; Ident. of San Francisco Gap MHW is SFG.

(12) Correct page 14, by showing elevation, bearing and distance for La Crosse Mun. Airport, as 653', 138°, 5.2 mi.

(13) Correct data on the following facilities as follows: Under California: Fresno Air Terminal-Delete remarks; Lockheed Air Terminal (Burbank)-ABC-; Palm Springs-Add to remarks: Air Force contract fuel. Under Florida: Riddle (Clewiston)-Add to remarks:

Cattle on fld.; Under Georgia: McRae Int. 47, MM-AG-Add remarks: Usable with caution. Under Kentucky: Bowling Green-Warren Co.-Class: P40-L5-S6; Under Maine: Portland-Class: P43-L5-S6;

(14) Correct page 51, by showing SW course of Augusta radio range as 46°.

(15) Correct page 50, by showing Columbia radio range as guarding 3105,4495,6210 kcs only. Delete Channels D and (9) from Atlanta Tower listing. Station guards Channel B; Atlanta NAS Tower guards Channel D; Navy channels for Jacksonville Airways, Lawson Airways, Moody Airways, Robins Airways and Shaw Airways as (4-1-). Note to AMC. Channel D is not synonymous with Navy Channel (9), and should not be listed.

(16) Correct page 54, by listing New Orleans NAS with Navy channel (9) rather than (4). New Orleans (Moisant) with Approach Control.

(17) Correct page 58, by deleting listing under Houston LFM.

(18) Correct pages 58,59, by showing Mineral Wells MH facility ident. MWL, on 284 kcs, Channel A, and guarding 4 high frequencies.

(19) Correct page 60, by showing ident. for Alice as ALI; by showing Approach Control at Corpus Christi (Cliff Maus); by showing San Antonio ident as SNK.

(20) Correct page 62, by showing ident. for Carlsbad as CNM; by showing ident. of San Angelo range as GOF; by showing ident. of Midland range as MDD.

(21) Correct page 64, by deleting receiving freqs at Cochise; by showing ident. of Chatsworth FMHW facility as CSW.

(22) Correct page 66, by showing Long Beach, Calif. ILS with voice; by showing ident. of Downey FMHW facility at Los Angeles as DOW; by showing ident. of Chatsworth FMHW at Burbank as CSW.

(23) Correct page 24, by showing facilities now listed with Philadelphia as Philadelphia (International), and those now listed under Philadelphia Northeast under North Philadelphia, because of change in name of airports.

(24) Correct bearing and distance, station to field for Santa Barbara radio range as 74°, 2.2 miles.

(25) Correct page 58, by showing elevation at Austin (Robert Mueller) as 631'.

(26) Correct page 26, by adding LOCKBOURNE AIRWAYS station. Present listing should refer to page 84 rather than 8.

(27) Correct page 96, by deleting from botto m of page "For detailed explanation see page 118".

(28) Correct Alexandria, Minn., radio range class to BMLZ.

(29) Correct Huron, S.D. radio range class to BMRLZ. Delete notice that Huron radio range is inoperative.

(30) Correct Sheridan, Wyo., by deleting notice that Channel A is inoperative.

(31) Correct Pellston (Emmet Co.) Mich. H facility class to BMH. Hours of operation: 0600-2200.

(32) Correct radio range class for Sault Ste Marie to SBMRAZ.

(33) Correct class of H facility for Sault Ste. Marie-Kinross to HW.

(34) Correct page 16, by showing Billings with Approach Control.

(35) Correct page 18, by showing Great Falls ident. as GTF.

(36) Correct page 20, by showing Aberdeen (Moon Island) range operating from 0700-1800 daily and on prior req. Guards 3105, 6210 kcs; by showing Astoria (Clatsop) as operating from 0700-1700 and on prior req.

(37) Correct page 22, by adding Danbury, Conn. tower on 278 kcs.

(38) Correct page 24, by changing Baltimore Ident. to BAL; by showing New Hackensack distance to field as 5.4; by deleting Washington broadcast times.

(39) Correct page 26, by showing tower at Charleston (Kanahwa) on 317 kcs, and guarding 4495 kcs in addition to other frequencies listed; by showing Cleveland tower guarding 4 freqs; by showing Wright Patterson AFB ident. as FFO; by showing Approach Control at Youngstown, Ohio.

(40) Correct page 28, by showing Ft. Wayne radio range class as SBMRLZ.

(41) Correct page 30, by showing Sioux Falls tower as operating during flights of NG aircraft, on request, and during emergency.

(42) Correct page 31, by showing name of intersection NE course of Kansas City and E course of St. Joseph ranges as "Braymer"

(43) Correct page 34 by showing Dubois ident. as DBS.

(44) Correct page 38, by correcting tower listing for Charleston (Kanahwa), as listed for page 26, as shown on Item 39, this page.

(45) Correct Canadian Data as follows: Argentia NAS, Nfld: Control tower transmits on 3295, 4495, 6970 kcs, 126.18, 140.58, 142.74 mcs, 6390 kcs on req. Tower guards 3105, 6210 kcs, together with all of transmitting frequencies. No frequencies are guarded by radio range or localizer. Gnd/air station NWP operates on 4220, 6355 kcs cont; 4385,6770 kcs on request. NATS gnd/air station on 3105,6290 kcs cont.; 7595 kcs, 126.70 mcs on req. GCA facility transmits and guards freqs of 3117.5, 3105, 6390, 3295, 3475, 4495, 4220,4890, 4265,6290,6640,6970,6210 kcs.; 116.1,126.18,140.58,142.74 mcs. Guards 3105,6210 kcs. Calgary, Alta.: Control tower transmits and guards 126.18 mcs, in addition to freqs previously listed. Edmonton, Alta.: VHF/DF on 140.58 and 139.32 mcs., operates 1530Z to 1200Z, or on request other hours. Dartmouth, N.S.: Control tower operates also on Channel A (1); Goose Bay, Lab.: Control tower operates also on Channel A (1); Patricia Bay, B.C.: Control tower operates 0800-2400. Earnest Harmon AFB, Nfld: Control tower transmits and receives on Channels A and B, transmits 278, 3017 kcs., receives 3105,3017.5,4495,6210 kcs., 4780 kcs. on req. Radio range (Class SBRAZ) guards 3105,4495, 6210,3017.5 kcs., Channels A and B. D/F guards: 6475,4220,2890,6355 with 3177.5 kcs on req. WYXN guards: 6475 days and 3177.5 nights with 8280 kcs on request. Airways guards: 4220 kcs day and night, 2890 and 3000 kcs on req.; Channels C and D, 6355 kcs day and night. Argentia, Nfld: Localizer has resumed normal operation. Courses are 161°,251°,341°,71° mag. and toward station. Ottawa: Control tower transmits on 278 kcs rather than 212. Rockcliffe: Tower transmits on 212 kcs, 126.18 mcs.; guards 3105,6210 kcs, 126.18 mcs. St. Hubert: Tower transmits on 212, 4895,5785 kcs., guards 3105,4895,5785 kcs., operates 1400-2200Z..

(46) correct Edmonton Air Traffic Control Center, in accordance with Information Circular No. 0/13/48, of Marc h 5, 1948, which provides air traffic control service for aircraft within the following airways as follows: (a) Those portions of Green Airway #1 from 25 miles W of the Cranbrook, B.C. range station to 25 miles E of the Medicine Hat, Alta. range station. (b) Those portions of Amber Airway #2 from the U.S.-Canadian Border to 25 miles NW of the Snag, Y.T. range station. (c) Those portions of Red Airway #6 from the Edmonton, Alta. range station to 25 miles SE of the Vermilion, Alta. range station. (d) All of Red Airway #7; (e) Those portions of Blue Airway #38 from the intersection of the NE leg of the Haines, Alaska range and the U.S.-Canadian (Alaskan) Border via the intersection of the NE leg of the Haines, Alaska range and the S leg of the Whitehorse, Y.T. range; (Carcross Intersection) to the Whitehorse, Y.T. range station.

In addition to the above, the Edmonton Air Traffic Control Centre provides air traffic control service for aircraft within a radius of 25 miles of the following range stations: Lethbridge, Alta.; Calgary, Alta.; Edmonton, Alta.; Fort Nelson, B.C.; Fort St. John, B.C.; Whitehorse, Y.T.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators No.9, July 29, 1946, Hydrographic Office information concerning naval and marine corps air stations and facilities, including changes in field facilities, operation rules, air/ground communications facilities, instrument approach procedures and navigational aids, should be directed to: The Division of Air Navigation, Hydrographic Office, Washington 25, D.C., for transmittal to the C.A.A. In accordance with Aviation Circular Letter No. 96-46 of June 13, 1946, approval for the closing of any naval or marine corps air station or facility to transient military aircraft for a period in excess of 10 days must be obtained from the Chief of Naval Operations. Also, approval is to be obtained from the Chief of Naval Operations before relocation or modification of any aid to air navigation, such as reorientation of radio ranges'

V.H.F. CHANNEL ASSIGNEMENTS: Following are Navy assignments:

CHANNEL	NAVY FREQUENCY	CHANNEL	NAVY FREQUENCY
1	116.1	6	134.64
2	142.56	7	143.64
3	126.18	8	142.02
4	137.88	9	142.74
5	143.28	GUARD	140.58

RESTRICTIONS ON NAVAL AIRCRAFT AT LA GUARDIA FIELD, INTERNATIONAL AIRPORT, AND NEWARK AIRPORT: La Guardia Field, N.Y., New York International Airport, N.Y., and Newark Airport, N.J., are closed to all Naval air traffic except that involving urgent official business which cannot be properly handled by landing at Floyd Bennett Field.

CIVIL SPECIAL NOTICES

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout, servicing, lighting, or permanent obstructions of existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or constructions, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airways Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide.

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA District Airport Engineer for coordination before they are included in the Airman's Guide.

DIRECTORY OF AIRPORT NOTAMS: Because of space limitations, the airport directory perforce serves as a notam supplement. Notam data revising previous directory issues are indicated by prefixed arrows. The only airport data (other than temporary conditions) carried in the Notices to Airmen section are coordinates (latitude and longitude).

DIRECTORY AIRPORT NAME CHANGES: Air Force and Navy fields (normally listed under airport name rather than city name) released by the services as surplus to their needs and established as civil fields are carried under the heading of "New Airports or Fields out of Alphabetical Alignment" until the Airport Directory is retyped.

ACKNOWLEDGMENT OF SUBMITTED AIRMAN'S GUIDE DATA: An under-manned staff prevents an individual acknowledgment of data submitted for inclusion in the Airman's Guide by telegram, teletype dispatch, or letter. Your cooperation in permitting a Guide citation to suffice as an acknowledgment will be appreciated.

CIVIL USAGE OF MILITARY FIELDS: USAF and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

CIVIL USE OF MILITARY GCA UNITS: It must be recognized that, while Navy and Air Force GCA units may be used by civil fliers in emergency or by prior arrangement with the Commanding Officer of the fields having such units, civil ceiling and visibility minimums of 400' and 1 mile respectively are mandatory, except in emergency.

USE OF AIRPORT UTILITY FREQUENCIES - 121.9 AND 121.7 MCS: The airport ground control frequencies of 121.9 mcs (standard civil channel) and 121.7 mcs (alternate channel) are provided to eliminate the frequency congestion caused by numerous radio contacts between the tower and taxiing aircraft and the tower and airport utility vehicles thus providing a clear VHF channel for arriving and departing aircraft. The ground control frequency is used for the issuance of taxi information, clearances, and any other contacts between the tower and aircraft or vehicles operating on the airport.

Landing aircraft should guard the appropriate ground control frequency (normally 121.9 mcs) as soon as the aircraft has cleared the active runway. At locations where a ground control frequency is not available or the aircraft is not equipped with the VHF ground control channel, the tower will handle all transmissions to aircraft on the ground over its low frequency channel (278 kcs or equivalent). Departing aircraft should communicate with the control tower on the appropriate ground control channel (121.9 or 121.7 mcs) for taxi and clearance information and should remain tuned to that frequency until the pilot is ready to request take-off clearance. At the time, the pilot should communicate with the tower on the appropriate airborne VHF channel. Further communication with the tower, if necessary, should be made on the latter frequency. Aircraft not VHF equipped should guard the tower low frequency channel (278 kcs or equivalent) for taxi information and take-off clearance.

CANADIAN AIRPORT UTILITY FREQUENCIES: The Department of Reconstruction and Supply (formerly the Department of Transport) of Canada has adopted the airport utility frequency 121.9 mcs at 15 airport control stations in Canada. This practice will be applied generally, in the future, with the second airport utility frequency 121.7 mcs to be assigned only if and when congestion is experienced on 121.9 mcs.

V.H.F. IFR FLIGHTS: Until further notice, Air Traffic Control will be exercised on the assumption that aircraft are utilizing intermediate frequency radio ranges.

If a pilot desires to conduct IFR flight using VHF ranges over all or a portion of the route, his flight plan should so indicate. Further, flights should not be conducted on civil airways in IFR weather using VHF ranges unless the A.T.C. clearances so authorize.

PRIVATE FLIER VHF FREQUENCIES: CAA Communications Stations and Towers guard the private flier frequencies of 122.1 mcs for transmission to CAA Communications Stations and 122.5 mcs for transmission to CAA operated towers.

CAA Communications Stations normally reply to itinerant aircraft on the voice feature of the range, low frequency or VHF, whichever is applicable. Replies are made on 111.1 mcs if VHF reply has been requested on other than range frequency. CAA airport control towers will reply to itinerant aircraft on one of the frequencies in the 118.3 to 121.3 mcs band as cited in the "Transmitting Frequencies and Identifiers" listing on Page VI.

RADIOTELEPHONE COMMUNICATIONS: The word ROGER in radiotelephone communications means "I have received all of your last transmission", and its use in any other sense by CAA stations and towers is not authorized. In order to avoid confusion it is suggested that pilots engaging in air-ground contacts also limit the use of ROGER to acknowledgment of transmissions.

Pilots enroute are requested to avoid, if possible, calling airway communications stations at or about 15 and 45 minutes past the hour (which are the scheduled broadcast times) to request weather information, as such calls may delay starting of scheduled broadcasts and cause inconvenience to other persons who are dependent on the broadcasts for weather reports.

(4-27-48)

VISUAL-AURAL RANGE (VAR) MONITORING: Only visual courses of VAR facilities are monitored continuously.

RADAR BEACONS: The radar beacon is an electronic beacon designed to serve as an aid to aircraft navigation for such aircraft as are equipped with proper radar equipment. Its purpose is somewhat similar to ordinary low frequency radio ranges, but radar beacons furnish more information. From a radar beacon signal, the radar operator of an aircraft can obtain both the range and azimuth of the beacon. The signal is also coded, so the particular beacon can be identified by reference to a chart or radar beacon list. Thus, the radar operator can obtain rapidly a navigational "fix". Microwave beacons transmit only when interrogated by a special radar pulse length reserved for this function alone.

The essential difference between a radar and a radar beacon is that, unlike the radar, which depends on a reflection of its own energy to determine the existence and position of an object, the radar beacon is made up of a receiver.-transmitter combination which sends out a coded signal when actuated or "triggered" by a radar signal of the proper frequency in order to receive the radar beacon signals "triggered" by the radar set.

An advantage of radar beacon is that a single beacon in an area will enable aircraft to navigate under all weather conditions if fitted with the necessary radar interrogating equipment, and at a much greater range than radar alone.

"Racon List, Book I", Hydrographic Office Publication No. 520, gives location, code, operating agency, and all information necessary to use these radar beacons.

BONE-SHAPED (DUMB-BELL) FAN MARKERS: The bone-shaped fan markers have been commissioned primarily for approach control purposes as they provide a more definite holding pattern being only 1-1/2 miles wide through the center of the pattern instead of 3 miles as in the elliptical shaped fan marker. Eventually all approach control fan markers will be bone-shaped. In some cases fan markers taken over from other agencies, especially the Navy, are not used for approach control purposes even though they have the bone-shaped pattern which will be retained.

INSTRUMENT LANDING SYSTEM (ILS) APPROACHES: Effective March 15, 1948, pilots are requested to give advance information to Air Traffic Control when planning to make an ILS approach, upon reaching the reporting point preceding the holding fix at airport of intended landing. This will permit assignment to the proper holding pattern and eliminate unnecessary delays in landing. Failure to use this procedure, however, will not preclude the pilot's right to request an ILS approach after reaching the holding point if weather conditions or other factors make such request advisable.

INSTRUMENT APPROACH LIGHT SYSTEMS: Normally neon approach light systems will be operated regardless of the runway being used whenever the light intensity is equivalent to that between dusk and dawn, day or night, regardless of weather conditions or when otherwise necessary or requested.

✓ FLIGHT INFORMATION MANUAL USE OF "WRP" IN CLASSIFYING THREE-LETTER LOCATION IDENTIFIERS: The contraction "WRP", as used in Chapter I of the current Flight Information Manual, indicates merely a ground weather reporting station or a locale from where weather reports are received by telephone or over which some pilots are prone to issue weather reports. Categorically, locations typed as WRP are not compulsory reporting points for traffic control nor are they points over which pilots are required to report current weather conditions.

✓ CHANGE OF ON-REQUEST REPORTING POINT: Due to a recent realignment of the S leg of Chanute, Kans., LF radio range, this leg now intersects the NE leg of the Tulsa range at the Verdigris FM. Therefore, the Claremore Intersection should be deleted as an On-Request reporting point, and the Verdigris Intersection should be substituted in lieu thereof as an On-Request reporting point.

✓ LOCATION AND RELOCATION OF CENTER CONTROL AREAS AND FLIGHT ADVISORY AREAS: Concurrent with the designation of Red Civil Airway No. 30, from Shreveport, La., to New Orleans, La., the control area boundary between New Orleans and Fort Worth Centers was established at a point 50 mi. NW of Alexandria, La. The New Orleans Center assumed control of Blue Airway No. 45 from Caroline Intersection to Baton Rouge radio range station.

Relocation of present flight advisory area boundaries of New Orleans, Ft. Worth, and San Antonio Centers necessitated by the above also effected concurrently with the designation of Red Civil Airway No. 30.

✓ MINIMUM ENROUTE ALTITUDE REVISION: The minimum enroute altitude between Melbourne and West Palm Beach on Amber Airway No. 7 is 1600'. (Correct Flight Information Manual Supplement, dated April 15, 1948).

✓ AERONAUTICAL CHART AND PUBLICATION CORRECTIONS: (1) Correct C & G S Radio Facility Chart #31, dated March 31, 1948, by including Rocky Mount.

(2) Correct C & G S Radio Facility Chart #16, by showing Ft. Bridger radio range stn ident. as "FBR" instead of HM. Also correct magnetic bear. and dist. from rng stn to arpt to 247°, 1.8 mi. (This also corrects Great Salt Lake World Aeronautical Chart #305).

(3) Correct C & G S, Kansas City Aeronautical Chart, dated March 25, 1948, by changing St. Joseph, Rosecrans Tower freq. to 308 kcs., instead of 278 kcs.

(4) Correct C & G S, Phoenix Sectional Aeronautical Chart, dated March 4, 1948, by reversing the A & N quadrants on the W leg of Gila Bend, Arizona radio range station.

WEATHER REPORTING SERVICE

Weather Reporting Location	Type of Report	Lat., Long.	Elev.	Action Taken
Lakeland, Florida	Hourly			Discontinued
Childress, Texas	Hourly			Discontinued
Newport, Oregon	SW	44-38,124-04	159	Begun
North Head, Washington	SW	46-18,124-05	211	Begun

NOTE: Wheeling, W. Va. (Wheeling, Ohio County Airport) supplementary weather reports discontinued and hourly reports inaugurated in lieu thereof. Preparation of terminal forecasts discontinued for Lakeland, Florida.

METEOROLOGICAL SERVICES AVAILABLE TO CIVIL PILOTS: Weather forecasting and reporting services for civil aviation are provided by the United States Weather Bureau of the Department of Commerce. Observations and reports are made at hourly intervals at approximately 500 stations and special reports are made for sudden changes in weather conditions.

The stations from which forecasts and reports may be obtained fall in three categories as follows: Airway Forecast Centers: At these 18 offices forecasters are on duty 24 hours of every day to provide forecasts, information, and advice concerning aviation weather.

Albuquerque, N.M.	Denver, Colo.	Minneapolis, Minn.
Atlanta, Ga.	Ft. Worth, Tex.	New Orleans, La.
Billings, Mont.	Kansas City, Mo.	Salt Lake City, Utah
Boston, Mass.	LaGuardia Field, N.Y.	San Francisco, Calif.
Chicago, Ill.	Los Angeles, Calif.	Seattle, Wash.
Dayton, Ohio	Miami, Fla.	Washington, D. C.

Flight Advisory Weather Service Units: These offices are located in the 26 CAA Airway Traffic Control Centers and are staffed 24 hours a day to give short range detailed information and advice. The weather service available from FAWS should be particularly helpful to pilots in the air, who can obtain it by calling any Airway Communications Station by radio.

Weather Bureau Airport Stations and Airway Communications Stations: Most of these stations are open 24 hours a day, and weather reports, regional forecasts and terminal forecasts as distributed by teletype may be obtained from them. In many cases, however, professional forecasters are not on duty throughout the 24 hours at these stations and requests for specific trip forecasts must be made a sufficient time in advance to permit obtaining the information from the appropriate forecast center. Where full meteorological service is required, at least two hours' notice (in addition to communication time) should be given for a flight exceeding 500 miles from point of departure to point of first landing, and at least one hours' notice for flights not exceeding 500 miles.

Requests for trip forecasts should include details of the route to be followed, time of departure, estimated time of arrival, air speed and type of aircraft, flight altitude and whether flights will be made VFR or IFR.

The attention of all pilots is also directed to the fact that weather reports and other information are broadcast at 15 and 45 minutes past the hour from all continuously operated CAA radio range stations. A listing of the commercial weather broadcasts may be obtained by writing to the Chief, U.S. Weather Bureau, Washington, D. C.

TELETYPE NOTAMS: Throughout the year climatic conditions (snow storms, floods, etc) render many fields temporarily unusable or unsafe. In addition, there are intermittent maintenance operations in progress on many fields. Radio facilities suffer temporary power failures or course misalignments, and lighting facilities are temporarily inoperative. Because these temporary conditions cannot be given immediate coverage in the Airman's Guide, full cognizance must be taken of Teletype Notam service which gives the desired coverage on any facility or field at which teletype transmitting stations are based. Cross-country pilots, accordingly, should consult these Teletype Notams for latest available data on air navigation aids. These teletype notams are posted in CAA Communications Stations and in all Air Force Field and Naval Air Station Operations Offices having teletype drops.

FOREIGN SPECIAL NOTICES

INTERNATIONAL NOTAMS: The only source of international notams at the present time is the C.A.A. Overseas-Foreign Aeronautical Communications Stations at the following locations: New York, N.Y.; Miami, Fla.; New Orleans, La.; Balboa, Canal Zone; San Francisco, Calif.; Seattle, Wash.; Honolulu, Hawaii; Anchorage, Alaska.

In the immediate future a daily International Notams recapitulation, covering all foreign Class I and Class II Notams received in Washington will be forwarded to the ninety-odd domestic U.S. international airdromes and Air Force-Navy Foreign Clearing Stations.

Air Force requests for this publication should be addressed to Flight Operations Division, Asst. Chief of Staff, A-3, Headquarters, Air Transport Command, Washington, D.C

FOREIGN ENTRY PROCEDURES, AIRPORTS OF ENTRY, CUSTOMS REPORTS, CIVIL AIRCRAFT CLEARANCE FOR FOREIGN COUNTRIES: These procedures and regulations are now incorporated into the Flight Information Manual. Only amendments to the data contained in the Manual will hereafter be carried in the Airman's Guide.

DISTRESS PROCEDURE: If it is believed essential, any radio station of the aeronautical mobile service near an aircraft in distress may impose silence either on all stations of the aeronautical mobile service in the vicinity or on any station which impedes the distress traffic.

In either case, use is made of the service abbreviation "QRT" followed by the word DISTRESS; the instructions being addressed "TO ALL STATIONS" or to one station only, according to circumstances. The use of the abbreviation "QRT" must be reserved, so far as practicable for the aircraft in distress and the station on which controls the distress traffic.

When the station in distress wishes to impose silence, it shall use the abbreviation "QRT" followed by the distress signal "SOS" in lieu of the word "DISTRESS".

It should be understood that the station in distress is the only station authorized to use "QRT SOS"; other stations may use "QRT DISTRESS".

CLEARANCE OF NON-SCHEDULED FLIGHTS TO COSTA RICA: The Government of Costa Rica does permit irregular air carriers to make direct application for flight permits through its consular offices in the United States. Applicants who apply directly to the Government in San Jose, Costa Rica are referred back to a Costa Rican consular office in the United States.

Also, the Government of Costa Rica accepts applications for flight permits which have come through the United States diplomatic channels, i.e., the Department of State and the American Embassy.

EL-ARISH AIRPORT, EGYPT DANGER AREA: Anti-aircraft and air firing practice is being conducted continuously day, night until further notice within an area of 25 mile radius centered on El-Arish Airport at 31-00 N lat., and 33-50 E long. All aircraft must avoid this area.

LONDON, ENGLAND: Pilots entering or operating within this area should be familiar with all notams available at the New York International Notam Office.

N.B. The British Government has reported several violations of local air traffic rules. Disciplinary action will be taken on future violations.

PRECAUTIONS BEFORE ENTERING GREECE: All air carriers and others concerned are advised to use designated International Air Routes in and out of Greece. All pilots should be briefed on international visual signals between aircraft as Greece has indicated they intend to shoot down all intercepted foreign aircraft that are not recognized or fail to comply with instructions when intercepted.

IRELAND, SHANNON, RINEANNA AIRPORT: Control tower and other facilities at Rineanna Airport destroyed by fire. GCA truck re-established on permanent site Runway 23/05. Temporary airdrome control established in Terminal Bldg R/T freqs. 2870 kcs, and 118.1 mcs. reduced power. (4-20)

ITALY, ROME, CIMPANO AIRPORT: All aircraft use emergency runway only (parallel to main strip). E side of fld will be under const. (asphalt re-surfacing) until about September 15, 1948. Emergency dry weather strip: 6300 x 110'. Lighting on emergency strip ready about April 20.

DANGER AREA IN THE VICINITY OF ENIWETOK ATOLL, PACIFIC OCEAN: Effective January 31, 1948, a Danger Area was established in the vicinity of Eniwetok Atoll, about 2400 miles WSW of Honolulu, Hawaii, by the Atomic Energy Commission. The Danger Area, which will be activated throughout the rest of the calendar year 1948, is described as follows: "Beginning with a point at 10-15 N lat., and 160-35 E long, N along the meridian of 160-35 E long, to a point at 12-45 N lat., 160-35 E long, thence E along the parallel of 12-45 N lat, to a point at 12-45 N lat., and 163-55 E long., thence S along the meridian of 163-55 E long, to a point at 10-15 N lat., and 163-55 E long, thence W to the point of beginning".

Because of the grave hazards resulting from tests of military weapons in this area it should be categorically avoided under all circumstances until further notice.

PERUVIAN PROHIBITED AREAS: The President of Peru has decreed that flight is prohibited over the following zones: Callao - lat 12-02, long. 77-16, to lat 12-02, long. 77-08; to lat 12-08, long. 77-08; to lat 12-08, long. 77-17.

Pisco - lat 14, long. 76-28; to lat 14, long. 76-14, to lat 14-14, long. 76; to lat 14-25, long. 76, to lat 14-25, long. 76-28.

Matarini - lat 16-54, long. 72-15; to lat 16-54, long. 72-05; to lat 17-05, long. 72-05, to lat 17-05, long. 72-15.

CLOSING OF PHILIPPINE AIRPORTS: The following five airports have been closed because of construction: Ragabag, Nueva Vizcaya; Lucena, Tayabas; Dast, Camarines Norte; Masbate, Masbate; Cotabato, Mindanao.

The following five air strips have been forbidden to C-47s and other planes weighing more than 10,000 pounds including cargo and passengers, until the runways are lengthened. These air strips are as follows: Balor, Tayabas; Capiz, Capiz; Cagayan, Occidental Misamis; Plaridel, Bulacan; Calapan, Mindoro.

Another nine strips have been closed to regular use by commercial planes but may be used by C-47s and C-45s for emergency stopovers. They are as follows: Alabat, Tayabas; Catarman, Samar, Naguilian, La Union; Badas-Placer, Surigao; Culion, Palawan; Rosales, Pangasinen; Catanauan, Quezon; Ilagen, Isabela; Wasig, Mindoro.

(4-27-48)

Bear. and dist, stn to Rock Springs Arpt: 267°, 2.2 mi. Associated control stn lctd on Rock Springs Arpt. Stn class: VORW.
ROCK SPRINGS MUN ARPT: 100' of snow fence 4.5' high const 100' W of glide path bldg. Fence runs in a N/S line. N end of fence 350' S of centerline of E/W rnwy. (1-22)
SHERIDAN CO. ARPT: N/S rnwy unsafe hvy acft. Taxi strips parallel all rnwys except N/S rnwy and terminate at ramp. Equip. on fld intermittently. (2-23)
TEAPOT ROCK BCN SITE 190 CYS-GTF: To be discont. (4-9)

New editions of the charts listed below will be published in about one month, making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum for immediate requirements. As soon as the charts are available for distribution a second notice will appear in this publication.

Bellingham	Portland	WAC 357	Washington Local
Klamath Falls	Seattle	WAC 358	3069a
Kootenai	Spokane	WAC 409	
La Grande	Washington, D. C.	WAC 410	
Norfolk	WAC 215	25DF	

A new edition (or new chart) of the charts listed below which make former prints obsolete is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION."

NEW CHARTS

OF 333 Providence, Rhode Island Theodore Francis Greene Airport February, 1948.

CANCELED CHARTS

AL 246A, 562, 594.

When ordering charts from the U. S. Coast and Geodetic Survey, correct remittances should accompany all orders. Sectional charts, price 25 cents each, should be ordered by name; World Air charts, 25 cents each, by number with prefix (WAC); Approach and Landing charts, 5 cents each, by number with the prefix (AL); Flight charts, 25 cents each, by number with the prefix (FC); Direction Finding Charts, 40 cents each, by number and with the suffix as in 22 DF; Local charts, 25 cents each, by name as Miami local; and Obstruction Plans, 40 cents each, by number with the prefix (OP). Consult the Dates of Latest Prints of Instrument Approach and Landing charts and Obstruction Plans for further information concerning these series of charts.

(4-27-48)

DATES OF LATEST PRINTS

U. S. Coast and Geodetic Survey

Aeronautical Charts

Dates in small type indicate minor changes which are not of sufficient importance to make the previous print obsolete. All charts carrying dates older than those shown in large type on this list are obsolete for use in flight.

INTERNATIONAL NOTAMS! SPECIAL NOTICE

A resume of all Class I (received by radio-telegraph or teletype) and Class II (postal) notams, covering foreign facilities, submitted to the C.A.A. is being released in a daily publication entitled "International Notams".

This publication is posted in the C.A.A. Airways Communications Stations of all domestic international airdromes, Air Force, and Navy Foreign Clearing Stations, and the operations offices of airports used by non-scheduled operators for international operations where there are no C.A.A. Airways Communications Stations.

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO CIVIL PILOTS AS WELL AS ARMY AND NAVY. All GCA facilities (Air Force, Navy, or CAA) are available to any plane in emergency. To secure GCA assistance, pilots should first call the associated control tower.

In addition to the working frequencies listed below, Air Force and Navy GCA emergency VHF transmissions are made on 140.58 mcs. Simplex service on 3117.5 kcs will be provided at all Air Force and Navy installations to provide an alternate means of communications for scheduled air carrier aircraft. Army towers will relay GCA instructions on 200-400 kcs band to civil aircraft not equipped to receive VHF or HF. Most Navy and CAA GCA units can transmit instructions directly on tower low frequency. No AF units can transmit directly on tower low frequency. Those installations not suffixed by (&) can transmit directions directly on tower low freq.

A minimum of 30 minutes will generally be required to assemble a GCA crew and prepare the equipment for operation AFTER an alert has been received at those locations not providing continuous service. CAA GCA units, however, operate continuously. Pilots desirous of making practice GCA approaches should make their own arrangements with the tower concerned.

N.B. AF and Navy facilities are available to civil aircraft in emergency or by prior arrangement with the C.O. of the respective AFB, NAS or MCAS. Civil minimums are 400' ceiling and 1 mile visibility except in emergency

(A) = Air Force Facility. G.P. = Glide Path. (L6) = High Intensity Lights. (W) = Without Voice. (&) = On test basis, unmonitored and not to be used for navigation. (5-11-48)

MMK's, OMK's are at the same locations as the middle and outer markers unless otherwise specified.

TRANSMITTING FREQUENCIES AND IDENTIFIERS

It must be remembered that practically all VHF omni-directional ranges (VOR) have not yet been formally commissioned and a great number of the VHF visual-aural ranges (VAR) are in the same status, being on test basis and not to be used for navigation. These on-test basis VHF ranges are indicated by a prefixed asterisk (*) in the following tabulation.

(See Page IX for additional facilities)

LEGEND: * : Test basis-not to be used for navigation. + : voice on 111.1 and 116.1 mc. - : voice on 111.1 but not on 116.1 mc. (U) : Unmonitored, but usable for navigation.

VAR Monitoring Classification for Air Traffic Control Purposes: Category I = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continuously by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. N.B. Category I indicated by parenthetical (1)

Category II = If all except (D) of the conditions of Category I are met. N.B. Category II indicated by parenthetical (2). Category III = If facility monitored solely through use of an automatic visual course monitor and automatic transfer unit. Normally, VAR's which are not controlled by an INSAC and located too distant from an INSAC to be monitored with a VHF receiver will fall into Category III. N.B. Category III indicated by parenthetical (3).

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(When city and airport names are identical, the airport name is omitted in the interest of space-conservation)

(A) Airport name* (with A in Type column) - Owned or leased totally by U.S. Air Force

(N) " (with N in Type column) - Owned or leased totally by Navy

(CG) " (with CG in Type column) - Owned or leased totally by Coast Guard

(NG) " (with NG in Type column) - Owned or leased totally by National Guard

(A) Airport name - Open to civilians but owned or leased wholly or in part by U.S. Air Force, Air Reserve, U.S. Air Force servicing detachment or contract gas usually available.

(N) " - Open to civilians but owned or leased wholly or in part by Navy

(CG) " - Open to civilians but owned or leased wholly or in part by Coast Guard.

(NG) " - Open to civilians but owned or leased wholly or in part by Army or State Government for Air National Guard. Limited servicing and maintenance for transient military aircraft.

(P) " - Civil airport open to military aircraft. (See Note 2).

* " - C.A.A. Intermediate Field.

* Air Force and Navy fields are listed alphabetically by airport name followed by city name in parenthesis.

N.B. ALL AIRPORTS EXCEPT THOSE CITED WITH AN "A" or an "N" IN THE TYPE COLUMN ARE OPEN TO CIVIL FLIERS. AIRPORTS WITH NO PREFIX ARE EXCLUSIVELY CIVIL AIRPORTS.

TYPE

A	- U.S. Air Force	I	Intermediate	NG	- National Guard
C	- Coommercial	M	- Municipal		
CG	- Coast Guard	N	- Navy	P	Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified.

CLASS

(Sea Level Runway and Strip Requirements)

Class	Strip Length	Runway (Paved) Length
3-1	Less than 1600'	Less than 1600'
1	1600-2699'	1600-2499'
2	2700-3699'	2500-3499'
3	3700-4699'	3500-4499'
4	4700-5699'	4500-5499'
5	5700-6699'	5500-6499'
6	6700-7699'	6500-7499'
7	7700-8699'	7500-8499'
8	8700-9699'	8500-9499'
9	9700' +	9500' +

N.B. Length (of longest runway) minus one-quarter of airport elevation equals effective sea level length.

RUNWAYS

In "longest" column is stated length of longest landing area in hundreds of feet.

"h" indicates landing area is hard-surfaced or paved.

"aw" indicates allway field.

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

FACILITIES AND SERVICING

RADIO

R1: Control tower voice

R2: Range (or H facility) with voice

R3: Range (or H facility) and tower

R4: Range (or H facility), tower, and ILS

LIGHTS

L : Incomplete lighting, such as flood or strip lights, which are generally available only on prior request

L1: Beacon only

L2: Beacon and boundary

L3: Beacon, boundary, and obstruction

L4: Beacon, boundary, obstruction, and flood

L5: Beacon, boundary, obstruction, flood, and runway contact

(L5): Identical to L5 except that runway contact lights are high intensity

L6: Beacon, boundary, obstruction, flood, runway contact, and instrument approach

(L6): Identical to L6 except that instrument approach lights are high intensity

(The class always indicates the highest element available but does not necessarily include all intermediate elements)

SERVICING

(Any S combination in parenthesis indicates only part time or irregular attendant)

S1: Fuel

S2: Fuel, storage

S3: Fuel, storage, minor aircraft repairs

S4: Fuel, storage, minor aircraft, and minor engine repairs

S5: Fuel, storage, major aircraft, and minor engine repairs

S6: Fuel, storage, major aircraft, and major engine repairs

REMARKS

(a) "91 oct." indicates fuel octanes available. "AF" , or "Navy", preceding octane indicates USAF or Navy contract fuel available.

(b) "CLOSED" indicates closed to all civil aircraft and all transient military aircraft except on official business with written orders this station or in emergency. "CLOSED MIL" and "CLOSED NAVY" on civil fields indicate same restrictions as above are applicable to armed services.

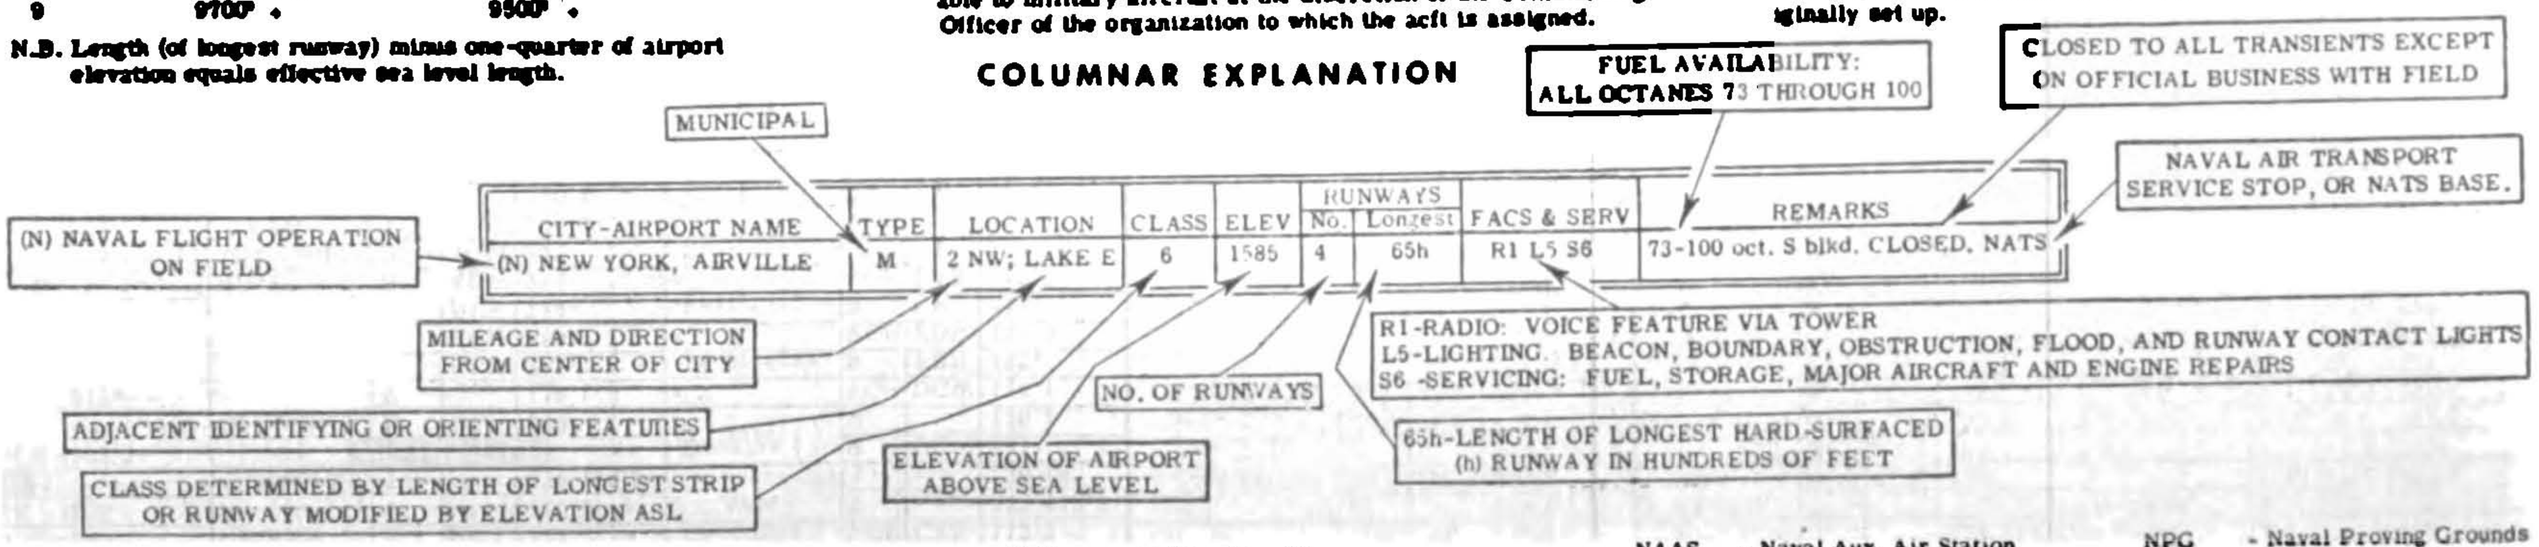
(c) "Port. B-2 lgts" indicates cone-mounted lights outlining runways These lights are portable and may be shifted from runway to runway, or strips.

(d) "INACT-NO FACS." indicates USAF and/ or Navy airfields used either exclusively by them or municipal airfields used jointly by them and civil interests at which both the USAF and/ or the Navy and the civil interests are inactive. Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the organization to which the acft is assigned.

(e) "USAF and NAVY INACT. CIVIL FACS." indicates municipal airfields used jointly by the USAF and/ or Navy and civil interests at which the USAF, or Navy facilities are inactive but civil facilities are available. Such fields may be used by military aircraft, however, only commercial service is avail.

(f) OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, clearly discernible for contact operations, are frequently omitted, for example. On the other hand, all pole lines within at least a 15-1 glide angle are indicated.

(g) "Fld lights on prior req." indicates field lights are available only by previous phone call, telegram, or letter. It must be remembered that most fields do not have 24-hour operation. Accordingly the field lights, indicated for such a lighted field, (and in some instances, even the rotating beacons) are available only by prior request. When an airport classification indicates a lighted field, and there is no notation in the REMARKS column, the field lights burn all night or will be turned on when a radio request is made or a plane circles the field.



(h) "FEE" indicates landing charges for revenue producing aircraft.

NOTES

1. ← Notam data revising previous issues.
2. "(P)" in City and Airport Name column indicates: (1) those municipal airports improved with public funds and covered by an agreement between the municipality and the U.S. Government permitting government planes to use such fields in common with others and without charge, to the extent possible without restriction of non-military operations, or (2) other civil airports for which legal permits covering their limited use by military aircraft have been procured and filed with the real estate agency of the Department of the Army.
3. "*Effingham, 10, L6-E" in City and Airport Name column indicates that the airport is Effingham CAA Intermediate Field, Site 10 on the St. Louis-Indianapolis Airway. Municipal airports where the lights are maintained by the C.A.A. are listed similarly except that there is no prefixed star.
4. AIRLINE STOP airport names are capitalized.
5. PRIVATE AIRPORTS are available for owner only, and not to be used by others except in emergency. Since no servicing is available for transients no "S" combination is ever assigned these fields.
6. "BLED" indicates approaches where glide angle to runway is 3:1 or less.
7. "(Formerly Air Force)" or "(Formerly Navy)": These former Air Force and Navy fields are in the process of being disposed of by the War Assets Administration and Farm Credit Administration. Their type is difficult of determination currently and they should be used with caution as some, unable to be disposed of as airport property, are being diverted to agricultural purposes.

** At the end of each state, under the heading of NEW AIRPORTS, will be found, out of alphabetical alignment, all the new airports tabulated after the type for that page had been originally set up.

COLUMNAR EXPLANATION

AIRPORT NAME ABBREVIATIONS

AFB - U.S. Air Force Base
CGAS - Coast Guard Air Station
LTA - Lighter than Air
MCAS - Marine Corps Air Station
MCAAF - Marine Corps Aux. Air Facility
NAAS - Naval Aux. Air Station
NAF - Naval Air Facility
NAS - Naval Air Station
NPG - Naval Proving Grounds
OLF - Outlying Field (Navy)
